3. @TisonKun probably yes it is flaky btw this time the job built the PR and not the master branch <https://ci-hadoop.apache.org/blue/organizations/jenkins/zookeeper-precommit-github-pr/detail/PR-1460/1/pipeline> please @anmolnar @symat @hanm take a look and merge
4. I have restarted the job (@TisonKun you should be able to do that as well, as you are a Curator commiter now)
5. Thanks @eolivelli ! I committed to master branch.

![image](https://user-images.githubusercontent.com/9931878/93570965-5f8ae380-f9c6-11ea-84ba-ef5feaa93ce2.png)

7. the "unstable" tests are not unstable. They are deterministically failing. Just took a quick look and I think <https://github.com/apache/zookeeper/pull/1462> should fix them all.
