**github\_issues\_comments:**

**github\_pulls:**

**github\_pulls\_comments:**

**github\_pulls\_reviews:**

**jira\_issues:**

1. **summary:** Skip website module in build  
**description:** Right now all maven commands will build the website module, which is a no-op and just clutters the output of the build. We should just disable this for speedup and decrease in confusion.  
**label:** code-design
2. **summary:** Skip website module in build  
**description:** Right now all maven commands will build the website module, which is a no-op and just clutters the output of the build. We should just disable this for speedup and decrease in confusion.
3. **summary:** Skip website module in build  
**description:** Right now all maven commands will build the website module, which is a no-op and just clutters the output of the build. We should just disable this for speedup and decrease in confusion.

**jira\_issues\_comments:**

1. **body:** Done, output is much cleaner now.  
**label:** code-design
2. UNSTABLE: Integrated in helix #1284 (See [<https://builds.apache.org/job/helix/1284/>]) [HELIX-501]  
Skip website module in build by default (kanak: rev 010fe5c513884ef7299ed0257ffec61d46c7b90f) \*
