13. Merging to master / 2.0.

github_pulls_reviews:

1. I removed this variable ``SPARK_YARN_APP_NAME`` here, I'm not sure is there anyone using this variable to set application name.
2. This section is mostly redundant with the configuration table. You should instead just redirect the user to read that, if you really want to add something.
3. Thanks a lot @vanzin for your suggestion, actually the reason I want to emphasize here is that we want deliver a better approach for users to start spark on yarn. I will reorganize the words. Thanks a lot.
4. This needs a little bit of editing: "basically you could specify through" -> "you can specify" ", for the details" -> ". For details," "to distributed cache" -> "to the distributed cache"
5. Remove "just"; "file, it will automatically" -> "file. It will automatically be". Back-tick `--files``
6. Small nits for readability: "...can specify ``spark.yarn.archive`` or ``spark.yarn.jars``". For details, please refer..." "...Spark will create a zip file with all jars under ``$SPARK_HOME/jars``, and upload it to..."
7. Done, thanks @vanzin .
