jira_issues_comments:

1. I found occurrences of this in docs for multiple sub-projects, at least HDFS and MapReduce, so I'm filing the jira in Common for now.
2. Attaching a patch.
3. Thanks for taking this, Akira. It looks like you're taking the approach of deleting the links. I think this is fine, because we have all the direct links in the left nav, and the user always has the browser back button too. It streamlines the pages a bit too. Does anyone else out there object to removing the Go Back links? If not, let's go ahead with this approach. To make this change comprehensive, we'll need to update some additional files. Here is what I turned up in a grep of 'Go Back' across the whole repo: `hadoop-common-project/hadoop-auth/src/site/apt/BuildingIt.appt.vm` `hadoop-common-project/hadoop-auth/src/site/apt/Configuration.appt.vm` `hadoop-common-project/hadoop-auth/src/site/apt/Configuration.appt.vm` `hadoop-common-project/hadoop-auth/src/site/apt/Examples.appt.vm` `hadoop-common-project/hadoop-auth/src/site/apt/Examples.appt.vm` `hadoop-hdfs-project/hadoop-hdfs/src/site/apt/CentralizedCacheManagement.appt.vm` `hadoop-hdfs-project/hadoop-hdfs/src/site/apt/HdfsNfsGateway.appt.vm` `hadoop-hdfs-project/hadoop-hdfs/src/site/apt/ViewFs.appt.vm` `hadoop-hdfs-project/hadoop-hdfs-httpfs/src/site/apt/ServerSetup.appt.vm` `hadoop-hdfs-project/hadoop-hdfs-httpfs/src/site/apt/ServerSetup.appt.vm` `hadoop-hdfs-project/hadoop-hdfs-httpfs/src/site/apt/UsingHttpTools.appt.vm` `hadoop-hdfs-project/hadoop-hdfs-httpfs/src/site/apt/UsingHttpTools.appt.vm` `hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-core/src/site/apt/DistributedCacheDeploy.appt.vm` `hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-core/src/site/apt/EncryptedShuffle.appt.vm` `hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-core/src/site/apt/MapReduce_Compatibility_Hadoop1_Hadoop2.appt.vm` `hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-core/src/site/apt/PluggableShuffleAndPluggableSort.appt.vm` `hadoop-tools/hadoop-sls/src/site/apt/SchedulerLoadSimulator.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/CapacityScheduler.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/FairScheduler.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/HistoryServerRest.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/MapredAppMasterRest.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/NodeManager.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/NodeManagerRest.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/ResourceManagerRest.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/TimelineServer.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/WebServicesIntro.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/WritingYarnApplications.appt.vm` `hadoop-yarn-project/hadoop-yarn/hadoop-yarn-site/src/site/apt/YarnCommands.appt.vm`
4. {color:green}+1 overall{color}. Here are the results of testing the latest attachment <http://issues.apache.org/jira/secure/attachment/12644788/HADOOP-10602.patch> against trunk revision . {color:green}+1 @author{color}. The patch does not contain any @author tags. {color:green}+0 tests included{color}. The patch appears to be a documentation patch that doesn't require tests. {color:green}+1 javac{color}. The applied patch does not increase the total number of javac compiler warnings. {color:green}+1 javadoc{color}. There were no new javadoc warning messages. {color:green}+1 eclipse:eclipse{color}. The patch built with eclipse:eclipse. {color:green}+1 findbugs{color}. The patch does not introduce any new Findbugs (version 1.3.9) warnings. {color:green}+1 release audit{color}. The applied patch does not increase the total number of release audit warnings. {color:green}+1 core tests{color}. The patch passed unit tests in `hadoop-hdfs-project/hadoop-hdfs` `hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-core` `hadoop-tools/hadoop-sls`. {color:green}+1 contrib tests{color}. The patch passed contrib unit tests. Test results: <https://builds.apache.org/job/PreCommit-HADOOP-Build/3941//testReport/> Console output:

<https://builds.apache.org/job/PreCommit-HADOOP-Build/3941//console> This message is automatically generated.

5. **body:** Thanks [~cnauroth] for the comment. The approach of the v1 patch was to delete the only "dead" links. bq. we have all the direct links in the left nav, and the user always has the browser back button too. Now I agree with you. I'll update the patch to remove all the "Go Back" links. By the way, removing all the "Go Back" links makes [hadoop-yarn/hadoop-yarn-site/index.html](http://hadoop-yarn.apache.org/hadoop-yarn-site/index.html) not linked from anywhere. I think we can remove the document because [hadoop-yarn/hadoop-yarn-site/YARN.html](http://hadoop-yarn.apache.org/hadoop-yarn-site/YARN.html) is a superset of it.
label: documentation
6. Attached a patch to remove all the "Go Back" links.
7. Updated the patch to remove 'Go Back' link from XAttr document.
8. +1, pending Jenkins run for the latest patch. I built the site, and it looked good. Thanks, Akira. I'm going to hold off committing until Tuesday, 5/27, just in case anyone objects to removal of the Go Back links.
9. {color:red}-1 overall{color}. Here are the results of testing the latest attachment <http://issues.apache.org/jira/secure/attachment/12646287/HADOOP-10602.3.patch> against trunk revision . {color:green}+1 @author{color}. The patch does not contain any @author tags. {color:green}+0 tests included{color}. The patch appears to be a documentation patch that doesn't require tests. {color:green}+1 javac{color}. The applied patch does not increase the total number of javac compiler warnings. {color:green}+1 javadoc{color}. There were no new javadoc warning messages. {color:green}+1 eclipse:eclipse{color}. The patch built with eclipse:eclipse. {color:green}+1 findbugs{color}. The patch does not introduce any new Findbugs (version 1.3.9) warnings. {color:green}+1 release audit{color}. The applied patch does not increase the total number of release audit warnings. {color:red}-1 core tests{color}.
