1. **summary:** [hbase] Recent renaming or META tables breaks hbase shell
description: The meta table was recently renamed from --META-- to .META. Now shell throws a syntax error if I try to list content of this table.
2. **summary:** [hbase] Recent renaming or META tables breaks hbase shell
description: The meta table was recently renamed from --META-- to .META. Now shell throws a syntax error if I try to list content of this table.

4. **summary:** [hbase] Recent renaming or META tables breaks hbase shell
description: The meta table was recently renamed from --META-- to .META. Now shell throws a syntax error if I try to list content of this table.

jira_issues_comments:

1. Here's a patch to add '.' to list of allowed ID characters.
2. **body:** Committed fix. Built on 3 different local machines and no javadoc warnings. Resolving.
