jira_issues_comments:

1. I'd like to see this in 1.5, if possible.
2. yeah, this is needed for 1.5
3. I'm going to work on this. At the same time, I agree with Dave Medinets about the MockAccumulo documentation- in its current form, it doesn't give much info. I'll probably combine the MockAccumulo and MAC docs into a single html.
4. **body:** Could delete the mock html file and put the documentation in the user manual. Those html files predate the user manual.

9. [~ctubbsii] I'm finishing this up now. Is it too late to incorporate this into the RC?
10. {quote}I'm finishing this up now. Is it too late to incorporate this into the RC?{quote} Too late for RC2, but if that fails, it can go in RC3. Don't let that stop you from contributing it to the 1.5 branch, though. It can go in 1.5.1 if RC2 passes a vote.
11. I'm having issues getting pdflatex on my Mac. I've looked over the changes I made several times but need someone with the appropriate binaries to execute the latex plugin and verify that this builds as expected.
12. [~sonixbp] The standard community distribution of LaTeX is [TeXLive|<http://www.tug.org/texlive/>], and the Mac version is called [MacTeX|<http://tug.org/mactex/>]. I've never had a problem with pdflatex on Mac with MacTeX (but it's been awhile since I used a Mac).
13. I had installed MaCTeX and it didn't look like it had the right binaries but I'll try this again and dig a little deeper. Thanks Chris!
14. Integrated in Accumulo-1.4.x #302 (See [<https://builds.apache.org/job/Accumulo-1.4.x/302/>]) Applying patch ACCUMULO-1380 (Revision 1481697) Result = SUCCESS cjnolet : Files : * /accumulo/branches/1.4/docs/mockAccumulo.html * /accumulo/branches/1.4/docs/src/user_manual/accumulo_user_manual.tex * /accumulo/branches/1.4/docs/src/user_manual/chapters/development_clients.tex
