1. **summary:** Some tests do not use ephemeral ports
description: For example, seems like most of the tests bind the master to port 60000. This doesn't work on shared build machines where multiple hbase test targets might run concurrently.

jira_issues_comments:

1. This might fix broken hudson on trunk
2. It's broken by the new master testing stuff. MiniHBaseCluster.init expects to catch a BindException but now it's getting a RuntimeException with the bind being a cause.
3. Sets master port to 0. Tests seem to still pass.
4. **body:** +1, makes my multi-cluster replication test happy.
label: test
5. Committed to trunk. Hopefully this fixes hudson.
6. Committed this to 0.20 branch as well (Stack +1ed offline)
7. This issue was closed as part of a bulk closing operation on 2015-11-20. All issues that have been resolved and where all fixVersions have been released have been closed (following discussions on the mailing list).
