1. **summary:** JarRunHandler wraps all exceptions in a RestHandlerException
description: The {{JarRunHandle}} wraps every exception during the job-submission in a {{RestHandlerException}}, which should only be used for exceptions where we are aware of the underlying cause. As a result the stacktraces from exceptions thrown during job-submission are not forwarded to users.

jira_issues_comments:

1. master: f3c5dd960ff81a022ece2391ed3aee86080a352a 1.8: a3e3852973f854b7e73439856f090f22f7953f80 1.7: a35bfef06f359cb369372881016c9777ff5dbda6
2. Although the exception is now properly exposed in the logs it is not in the webui. iirc there will be a major update on the webui, will that include a fix for that?
