1. **summary:** Lucene web site broken links
description: The new website is live, so I ran a dead-link checker on it to see if anything is broken. Here is the list of dead links. A bunch of them are from JavaDoc or from RefGuide, but some are also missing graphics on the site itself. Feel free to grab broken links and commit fixes either to lucene-site repo or lucene-solr repo as you see fit. When a link is fixed, please change (x) into (/) here so we see progress. Some of the broken links are in legacy changes.html, guess we don't need to fix those. h2. Website h3. 14. summary: Lucene web site broken links

description: The new website is live, so I ran a dead-link checker on it to see if anything is broken. Here is the list of dead links. A bunch of them are from JavaDoc or from RefGuide, but some are also missing graphics on the site itself. Feel free to grab broken links and commit fixes either to lucene-site repo or lucene-solr repo as you see fit. When a link is fixed, please change (x) into (/) here so we see progress. Some of the broken links are in legacy changes.html, guess we don't need to fix those. h2. Website h3. label: documentation

jira_issues_comments:

1. [~vajda@apache.org] can you fix the PyLucene related parts?
2. The crawl is done with "[linkinator|https://github.com/JustinBeckwith/linkinator]", and when we believe we are done we can run this command to re-check: {code:java} npm install -g linkinator linkinator http://lucene.apache.org --silent --recursive --skip '(issues.apache.org/\d_\d_\d/guide/\d_\d_\d/tika/)' {code}
3. [~jan.asf@cominvent.com], Please, include a link to instructions on where the source to site moved to and how one publishes changes to it. Thanks !
4. <https://lucene.apache.org/site-instructions.html> - if those instructions are not clear enough, please let us know and we will improve the README
5. Would it be possible to also do a link check and figure out if we can switch a href links to HTTPS? Just trigger the link and then check if a 301-redirect is sent by the target webserver? We have many links in our web page to sites, that already have switched to HTTPS, and we should really update our links to them. I am planning to enforce HTTPS for Lucene's website soon (once the problem with LucidWorks search is fixed, see LUCENE-9227), so I'd also like to review all external links. If we have images and scripts still using HTTP, it would also be good to know! ASAP to make LUCENE-9227 possible. I did a quick grep, but maybe I missed some of those. Where possible I changed all CSS/JS to use schema-less URL ({foo.bar/file.js}). On example I fixed was the Google Fonts on Solr being hardcoded to HTTP (and this caused the fonts on Solr's page be showing incorrect with https).
6. [~jan.asf@cominvent.com], I've not used git before with the ASF repository (PyLucene still uses svn). What credentials do I use to push my changes to the lucene site repo at github ?
7. If you want to push to github, you will use your normal github credentials, but you must link your account first at <https://gitbox.apache.org/setup/>
8. I believe, I'm now done with the pylucene/jcc broken links (I don't know what the magic character is for turning red Xs into green Vs so I didn't do that). I also don't know what the git command-line is to merge the site changes from master to the production branch so I didn't do that either. I'm happy to do so if someone tells what that is (I'm a bit of a git noob and don't want to break something or do it the wrong etiquette way).
9. There is currently a lot of new stuff in the staging branch which was not yet merged. We can do this. The easiest to do this is to first switch to production branch, then do a pull to get the latest changes from server (just to be safe). After that you can do a pull from the master branch, which is also somehow a merge. For the website I prefer to do this as it's fastest. But you can also trigger a manual merge. Result is same. Don't do that now, as Jan may want to wait a bit until his homepage changes are verified to work. Uwe
10. "I don't know what the magic character is for turning red Xs into green Vs" Edit the comment and switch to the text view in the lower left. Then an x or / in parens magically turns into: (x) (/)..... Or use the emoji dropdown, second from the right in the menu bar... Best, Erick
11. Aha. The '/' is the magic one for a green V. Thank's Eric.
12. Commit 8389b87e39e72feb1262ff994d57217f1d127cc8 in lucene-solr's branch refs/heads/master from Jan Høydahl [<https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=8389b87>] LUCENE-9229: Fix some broken links Change some wiki -> cwiki links Signed-off-by: Jan Høydahl <janhoy@apache.org>
13. Commit 42b725462ff013f737e577af75c0f244e1959919 in lucene-solr's branch refs/heads/branch_8x from Jan Høydahl [<https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=42b7254>] LUCENE-9229: Fix some broken links Change some wiki -> cwiki links Signed-off-by: Jan Høydahl <janhoy@apache.org> (cherry picked from commit 8389b87e39e72feb1262ff994d57217f1d127cc8)
14. **body:** Please help get rid of broken links in RefGuide, JavaDocs and Website. If everyone pick a handful of links in areas you care about this list can be cleared in a few days!
label: documentation
15. **body:** Still plenty of broken links to fix if anyone wants to contribute! We can still target 8.5 refGuide for refGuide links!
label: documentation
16. **body:** Updated the list to include all the wiki.apache.org links in the Ref Guide I fixed a few weeks ago.
label: documentation
17. I fixed all the ones I could for the Ref Guide (commit incoming) - the ones I did not fix are ones I cannot find a suitable replacement and don't understand the topic well enough to know if simply removing the link entirely is a reasonable choice.
18. Commit 32a2076c605e80cda1c8c93b1e5a0ffe5e90e84e in lucene-solr's branch refs/heads/master from Cassandra Targett [<https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=32a2076>] LUCENE-9229: fix Ref Guide broken links
19. Commit d45ad8165a826ed88f2063b85799666bd8083c74 in lucene-solr's branch refs/heads/branch_8x from Cassandra Targett [<https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=d45ad81>] LUCENE-9229: fix Ref Guide broken links
20. Commit d5fe7c2ad18e75f57ac9bd080c6feb12b42bffb1 in lucene-solr's branch refs/heads/branch_8_5 from Cassandra Targett [<https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=d5fe7c2>] LUCENE-9229: fix Ref Guide broken links
