2. * * * @param artemisInstance * @param serverName it will be used on logs * @param id it will be used to add on the port * @param timeout * @return * @throws Exception
3. this dependency is here to make sure this module is only executed after the distribution is created. Otherwise it will get here before the build eventually. e.g if you use mvn install -T 20
4. this makes it easier in certain envs

1. GitHub user clebertsuconic opened a pull request: <https://github.com/apache/activemq-artemis/pull/1168> ARTEMIS-1089 Fixing Replication catchup slow I couldn't bring the test I created as part of this on master. I still wanted to bring the fix, but I'm not going to bother about the smoke-test created there now. You can merge this pull request into a Git repository by running: \$ git pull <https://github.com/clebertsuconic/activemq-artemis> 1.x-replication Alternatively you can review and apply these changes as the patch at: <https://github.com/apache/activemq-artemis/pull/1168.patch> To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #1168 ---- commit a9ba3be18ba98386b6f1c086893d1c5c0da88f35 Author: Clebert Suconic <clebertsuconic@apache.org> Date: 2017-04-02T23:20:42Z ARTEMIS-1089 Fixing Replication catchup slow ----
2. Commit 739dd82f31f7642f44e6c8cdd60967a07f33d71b in activemq-artemis's branch refs/heads/master from Clebert Suconic [<https://git-wip-us.apache.org/repos/asf?p=activemq-artemis.git;h=739dd82>] ARTEMIS-1089 Adding test for replication sync slow
3. Commit 0b62f698c3aaff5c109e625185332d2506afdaf4 in activemq-artemis's branch refs/heads/master from Clebert Suconic [<https://git-wip-us.apache.org/repos/asf?p=activemq-artemis.git;h=0b62f69>] ARTEMIS-1089 Fixing Replication catchup slow
4. Commit 7929fff893e1510390ae8e6a7924aa0e4f3864c0 in activemq-artemis's branch refs/heads/1.x from Clebert Suconic [<https://git-wip-us.apache.org/repos/asf?p=activemq-artemis.git;h=7929fff>] ARTEMIS-1089 Fixing Replication catchup slow
5. GitHub user clebertsuconic opened a pull request: <https://github.com/apache/activemq-artemis/pull/1171> ARTEMIS-1089 Moving smoke tests under ./tests/smoke-tests This is moving the smoke tests creates as part

- of the relication tests. They are also now based on junit tests. And to support starting servers I am exposing basedir to unit tests in general. You can merge this pull request into a Git repository by running: `$ git pull https://github.com/clebertsuconic/activemq-artemis` test Alternatively you can review and apply these changes as the patch at: <https://github.com/apache/activemq-artemis/pull/1171.patch> To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #1171 ---- commit 2473f133ddf92897e01df32d0376a137e11edae9 Author: Clebert Suconic <clebertsuconic@apache.org> Date: 2017-04-05T00:20:56Z ARTEMIS-1089 Moving smoke tests under ./tests/smoke-tests This is moving the smoke tests creates as part of the relication tests. They are also now based on junit tests. And to support starting servers I am exposing basedir to unit tests in general. ----
6. Github user mtaylor commented on the issue: [@clebertsuconic](https://github.com/apache/activemq-artemis/pull/1168) I've merged this. Can you manually close please.

 15. Github user franz1981 commented on the issue: <https://github.com/apache/activemq-artemis/pull/1183> I've a similar issue to solve [ARTEMIS-1098](<https://issues.apache.org/jira/browse/ARTEMIS-1098>) but I'm trying to understand where is the best point where put the (connection) flow control management. For my use case it could be: 1. "hidden" in the [ChannelImpl::send](<https://github.com/apache/activemq-artemis/blob/177480d8684fe0ecffa597878e07fb17ffcb5b8c/artemis-core-client/src/main/java/org/apache/activemq/artemis/core/protocol/core/impl/ChannelImpl.java#L306>) for not batched writes (this will impact the streaming of large message AFAIK but maybe others use cases) 2. implement a new method ChannelImpl::sendControlled (or similar) that will perform flow controlled sends and will be called (right now) only by [ActiveMQSessionContext::sendLargeMessageChunk](<https://github.com/apache/activemq-artemis/blob/177480d8684fe0ecffa597878e07fb17ffcb5b8c/artemis-core-client/src/main/java/org/apache/activemq/artemis/core/protocol/core/impl/ActiveMQSessionContext.java#L468>) to reduce the impact on other use cases I'm not seeing (right now) other ways to do it, but I want to be consistent to what you've done here: do you have any suggestions?
 16. Commit 911888e8d19c98400a68f969b1c8f86bff51fa17 in activemq-artemis's branch refs/heads/master from Clebert Suconic [<https://git-wip-us.apache.org/repos/asf?p=activemq-artemis.git;h=911888e>] ARTEMIS-1089 Improving flow control on replication
