1. **summary:** Add tags in Apache ECharts GitHub repo.

description: As one of the famous data visualization libs, Apache ECharts does not appear in the GitHub "data-visualization" topic list: <https://github.com/topics/data-visualization?o=desc&s=stars> It probably because there are no such relative tags in echarts GitHub repo. Could you help echarts to add tags in GitHub? This is the doc about how to add tags for "GitHub topic": <https://docs.github.com/en/enterprise/2.15/user/articles/classifying-your-repository-with-topics#:~:text=About%20topics,-With%20topics%2C%20you&text=Topics%20appear%20on%20the%20main,d%20like%20to%20a%20repository.> And the tags wish to be added are: data-visualization charts charting-library visualization apache data-viz canvas svg Thank you very much.

jira_issues_comments:

1. Please see <https://cwiki.apache.org/confluence/display/INFRA/git+-+.asf.yaml+features#git.asf.yamlfeatures-Repositorymetadata> - this is a self-serve process.

2. **body:** Thank you [~humbedooh] very much. I have done it with the tutorial.
