1. **summary:** Service generation needs to make service name capitalized, since Ruby modules need to be constant.
description: service generator needs to capitalize service names, since services are ruby modules and ruby modules are constants.

jira_issues_comments:

1. Hi Gary, I agree here too, but can't see the patch.
2. Ah, scratch that, just beat you to it. I'll take a look.
3. Looks good to me, +1
4. **body:** here is the correct version. misspelled function name.
label: documentation
5. +1 - We've been running this internally for the better part of a year. I'm pretty sure I've sent it in before, but David didn't like it for some reason.
6. Ok, pushed in 750160.
7. Wow. That was fast. Thanks Kevin.
