1. **summary:** delete.rb should require user to provide the column  
**description:** HBASE-18142 made an intentionally incompatible change to delete.rb Most notably from a user, the help message is now inaccurate: only two arguments must be provided (table name and row) whereas it was required to also provide a column to delete. [~chunhao], [~chia7712], might one of you folks be able to submit a patch to fix this up (maybe get those release notes added to HBASE-18142 too? ;))

**jira\_issues\_comments:**

1. Thanks [~elserj] to point this bug...My bad:( The delete.rb should always require the column as it is used to delete the specified version of the specified column. bq. maybe get those release notes added to HBASE-18142 too? I have added the release notes to HBASE-18142.

3. +1 [~chia7712]. Thanks for fixing this. I thought it was a bit confusing to have delete.rb and delete\_all.rb seemingly doing the same thing :)
4. {quote}I thought it was a bit confusing to have delete.rb and delete\_all.rb seemingly doing the same thing {quote} Agreed. But it also proves our delete is vary powerful to do the fine-grained ops. :) Push to all active branches. Thanks for your reviews. [~elserj]
