

Item 153

git_comments:

1. Always at least one segment after simplifyPath
2. * * Tidy up a file path. * <p> * Removes duplicate or trailing path separators (Unix style forward slashes only), replaces initial {@literal ~} with the * value of {@link #home()} and folds out use of {@literal ..} and * {@literal .} path segments. * * @see com.google.common.io.Files#simplifyPath(String)

git_commits:

1. **summary:** Merge pull request #1165 from grkvlt/fix/tidyPath
message: Merge pull request #1165 from grkvlt/fix/tidyPath Fix tidyPath to work as specified in Javadoc

1. **title:** mark ConnectionFailureDetectorTest.java as Integration because it requires ports accessible
body: the failure log is recorded at: <https://gist.github.com/davidx/1a21649a5e637b7b2a6a>

github_pulls_comments:

github_pulls_reviews:

1. If this test fails because we can't open a serverSocket on a high-numbered port, then I'm guessing quite a few more tests would also fail. Happy to merge this. But longer term, might be worth artificially adding such a firewall and seeing the full set of tests that fail as a result.
