1. **summary:** /v2/ should not be an alias for /v2/collections  
**description:** Spinoff from SOLR-10711 Currently `{{/v2}}` is [a hardcoded alias|<https://github.com/apache/lucene-solr/blob/9fa04ecc9521d4528dc61a2447a199d9ce56a86a/solr/core/src/java/org/apache/solr/api/V2HttpCall.java#L82-L87>] for `{{/v2/collections}}` (but similar aliasing is not done for `_introspect`. It would be more useful to reserve `{{/v2}}` as a generic entry-point that works both in cloud and standalone mode. Perhaps instead that endpoint should report something similar as `{{bin/solr status}}`, i.e. version, node name, cluster size (nodes) and status (red/green/yellow), number of collections, number of local cores and a simple help text for how to use the API?  
**label:** documentation
2. **summary:** /v2/ should not be an alias for /v2/collections  
**description:** Spinoff from SOLR-10711 Currently `{{/v2}}` is [a hardcoded alias|<https://github.com/apache/lucene-solr/blob/9fa04ecc9521d4528dc61a2447a199d9ce56a86a/solr/core/src/java/org/apache/solr/api/V2HttpCall.java#L82-L87>] for `{{/v2/collections}}` (but similar aliasing is not done for `_introspect`. #### jira\_issues\_comments:

1. **body:** [~janhoy] Do you think this result returned from `{{/v2}}` is clear enough? Because `v2` api is self-documented apis, users can follow then link to have a glance at `v2` api `{ "responseHeader": { "status": 0, "QTime": 0 }, "documentation": "https://cwiki.apache.org/confluence/display/solr/v2+API", "description": "V2 API root path" }`  
**label:** documentation
2. Better than a stacktrace for sure. Do we also need `/v2/_introspect` support?
3. **body:** [~janhoy] `{{_introspect}}` is documentation page for correspond command. But `{{/v2}}` is a welcome page more than a command. So I don't think we need `{{/v2/_introspect}}` support. BTW: Error message will be nicely written by SOLR-10406  
**label:** documentation
4. bq. But `{{/v2}}` is a welcome page more than a command. So I don't think we need `{{/v2/_introspect}}` support. I disagree - see also SOLR-10410. It currently returns a 404, which is unfriendly. I think it should return something other than a 404 - perhaps a list of endpoints? Or a pointer to where a user can get the list of endpoints?
5. Oh, ok. So [~ctargett] do you think that above response will appropriate for both `/v2` and `/v2/_introspect`?
6. bq. do you think that above response will appropriate for both `/v2` and `/v2/_introspect`? IMO, that would be fine.
7. Commit 6075956b65ab378f67c3c7c2d3116ec8d43a312e in lucene-solr's branch refs/heads/master from [~caomanhdat] [ <https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=6075956> ] SOLR-10715: `/v2/` should not be an alias for `/v2/collections`
8. Commit 41d12df6d247b678b1a24c26567a08c2135b68ce in lucene-solr's branch refs/heads/master from [~caomanhdat] [ <https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=41d12df> ] SOLR-10715: Welcome message should work for `_introspect`

9. Commit d845bc9f221df28bbdff740be5e48bb4302bf400 in lucene-solr's branch refs/heads/branch\_6x from [~caomanhdat] [ <https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=d845bc9> ] SOLR-10715: /v2/ should not be an alias for /v2/collections
10. Commit 661a3c46d42114b5d3c3f20b0c412b4b5deb5afb in lucene-solr's branch refs/heads/master from [~caomanhdat] [ <https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=661a3c4> ] SOLR-10715: Move change entry to 6.7.0
