1. **summary:** Add some verbose log to MasterProcedureScheduler
description: As discussed in HBASE-21364, we divided the patch in HBASE-21364 to two, the critical one is already submitted in HBASE-21364 to branch-2.0 and branch-2.1, but I also added some useful logs which need to commit to all branches.

2. You don't want to just use TRACE-level in this class [~allan163]?
 3. **body:** [~allan163] +1 on commit for this -- we need more detail in these parts -- but one question is why not TRACE-level logging on the class? Thanks.
label: code-design
 4. [~stack], if TRACE is open, there are many other logs... By setting a verbose flag we can control the log we want...
 5. Understood sir but my fear is that you will be only one that 'knows' of this flag whereas the general population knows that to get more detail, they enable TRACE. If the output is overwhelming, +1 on your flag instead. Add flag as release note and commit. Thanks.
 6. Pushed on branch-2.1 and branch-2.0. Didn't spend time on figuring why it doesn't apply to branch-2. Leaving open in case you want to put a patch up for branch-2 [~allan163].
 7. Let me resolve this altogether. Can open new issue for forward port if wanted.
 8. Argh. Commit broke compile. Reverted it from branch-2.1 and branch-2.0 for now.
 9. Can be done in 2.1.2, I think.
 10. bq. Can be done in 2.1.2, I think. nod
