

Item 182

git_comments:

1. Use LinkedHashSet on client-side so that we don't need to serialize the min**Value** and max**Value** but can infer them based on the first and last position. TODO: consider using a regular HashSet as we never serialize from the server-side

git_commits:

1. **summary:** Cleanup InListExpression by removing unnecessary empty set member variable
message: Cleanup InListExpression by removing unnecessary empty set member variable
