1. **title:** SOLR-14939: JSON range faceting to support cache=false parameter
body: <https://issues.apache.org/jira/browse/SOLR-14939>

github_pulls_comments:

github_pulls_reviews:

1. Here (and in the else) I think I would explicitly do `setCache(false)` as it feels more readable to me, but I don't have strong opinions on that.
2. Might as well store the string directly?
