**github\_issues\_comments:**

1. 感谢你的反馈, Weex目前是隶属于Apache Software Foundation的项目, 因此在Github渠道我们鼓励使用英文反馈问题。下面我将使用Google Translate将你的问题翻译成英语, 并以英语回答。 > [iOS] XCode11 package, iOS13 system phone, use <text> component, font is not Apple's default apple font Change it to whatever you want by using [font-family](https://weex.apache.org/docs/styles/text-styles.html#font-family)
2. **body:** > 感谢你的反馈, Weex目前是隶属于Apache Software Foundation的项目, 因此在Github渠道我们鼓励使用英文反馈问题。下面我将使用Google Translate将你的问题翻译成英语, 并以英语回答。 > > > [iOS] XCode11 package, iOS13 system phone, use component, font is not Apple's default apple font > > Change it to whatever you want by using [font-family](https://weex.apache.org/docs/styles/text-styles.html#font-family) 你好, 请问具体怎么设置 font-family 呢? 判断 iOS 原生环境, 然后给每个 text 组件都设置一遍 font-family: PingFang; 吗? 好像效率很低, 还不确定是否能生效, 多封装一层组件似乎没必要。 请问推荐的详细解决方案是什么样呢? Hello, what's the value be setted to `font-family`? Check if in the iOS native environment, and set `font-family: PingFang;` to every `<text>` or wrap an component (e.g. `<my-text>`) to replace all `<text>`? It seems ugly, and not sure it'll work. Would you mind offer an more detail and effective solution?

4. @wqyfavor Have a look?
5. **body:** 尝试了以下 `font-family` 属性, 或者设置 `style` 属性样式, 但都无效: All attemps below not working, help please~ 求助~ ``css .test-1 { font-family: 'PingFang', sans-serif; } .test-2 { font-family: 'PingFang'; } .test-3 { font-family: 'PingFangSC'; } `` --- Append: ``css .test-4 { font-family: sans-serif; } `` Not working, too.

6. Help~
7. @YorkShen This issue has a wide range of impact on iOS. More obvious is that the text is centered vertically.
8. > @YorkShen This issue has a wide range of impact on iOS. More obvious is that the text is centered vertically. @QC-L Sorry, I am not an iOS developer. Maybe @jianhan-he @wqyfavor could have a look.
9. @QC-L can you try like as : font-family: PingFang SC
10. Tried, but still not work. jianhan-he <notifications@github.com> 于2019年11月25日周一 下午5:25写道: > @QC-L <https://github.com/QC-L> can you try like as : font-family: > PingFang SC > > — > You are receiving this because you commented. > Reply to this email directly, view it on GitHub > <https://github.com/apache/incubator-weex/issues/2859?email\_source=notifications&email\_token=ABAFNFVWZ5HQUEAEZ3KRUCTQVOKYBA5CNFSM4IR6QTP2YY3PNVWWK3TUL52HS4DFVREXG43VMVE558066284>, > or unsubscribe > <https://github.com/notifications/unsubscribe-auth/ABAFNFV6BSLXDPRIWWOEDKTQVOKYBANCNFSM4IR6QTPQ> > .
11. There are lots of log like this: `` CoreText note: Client requested name ".SFUI-Regular", it will get TimesNewRomanPSMT rather than the intended font. All system UI font access should be through proper APIs such as CTFontCreateUIFontForLanguage() or +[UIFont systemFontOfSize:]. ``
12. @krimeshu which version of weexsdk do you use? pr: https://github.com/apache/incubator-weex/pull/2936 has already fix this bug.
13. > @krimeshu which version of weexsdk do you use? pr: #2936 has already fix this bug. 0.24.0
14. you can try the version of 0.28.0. It has already fixed. @krimeshu
15. > you can try the version of 0.28.0. It has already fixed. @krimeshu Upgraded to 0.28.0, bug resolved, thank you!
