jira_issues_comments:

1. **body:** [~jtulach] could you do it for us once again. I hope the build.xml does not need to be patched this time, so the steps would be easier.
label: code-design
2. OK, just running: {code:java} incubator-netbeans\$ git checkout 11.0 incubator-netbeans\$ rm -rf *; git checkout -f . incubator-netbeans\$ ant build incubator-netbeans\$ ant gen-sigtests-release{code} and it fails. In {{platform/netbinox}}, in {{webcommon/libs.graaljs}} and who know where else... We need to include {{ant gen-sigtests-release}} into the Travis gate!
3. Closed as the issue has been resolved more than 180 days.
