

Item 5

git_comments:

1. 0.6->0.7
2. upgrading from 0.6 to 0.7.
3. if hints become incompatible across versions of cassandra, that logic (and associated purging) is managed here.

git_commits:

1. **summary:** truncate hints if starting 0.7 for the first time. patch by gdusbabek, reviewed by jbellis.
CASSANDRA-1414
message: truncate hints if starting 0.7 for the first time. patch by gdusbabek, reviewed by jbellis.

jira_issues_comments:

1. **body:** can we name the method something like `purgeIncompatibleHints` (so it doesn't imply we blow away all hints at startup), and include in the log message that they are snapshotted in case they need to roll back? (I see you included it in NEWS already.)
label: code-design
2. +1 otherwise
3. committed.
4. Integrated in Cassandra #518 (See [<https://hudson.apache.org/hudson/job/Cassandra/518/>]) truncate hints if starting 0.7 for the first time. patch by gdusbabek, reviewed by jbellis. CASSANDRA-1414
