1. **summary:** improve efficiency of snowballfilter
description: snowball stemming currently creates 2 new strings and 1 new stringbuilder for every word.
all of this is unnecessary, so don't do it.
label: code-design
2. **summary:** improve efficiency of snowballfilter
description: snowball stemming currently creates 2 new strings and 1 new stringbuilder for every word.
all of this is unnecessary, so don't do it.

jira_issues_comments:

1. **body:** trivial patch, i left the string-based stuff alone (even though it could be improved) since we no longer use them with this patch.
label: code-design
2. **body:** i tested this with some English, benchmark pkg, etc and at most it seems to only improve processing speed 10%. but I think its worth the trouble since its an easy improvement. i'll commit in a few days if no one objects.
label: code-design
3. looks good robert. Nice improvement.
4. Committed revision 897449.
