1. **summary:** zkcli should allow alternative locations for log4j configuration
description: zkcli uses the log4j configuration in the local directory: {code} sdir=""dirname \"\$0\"""
PATH=\$JAVA_HOME/bin:\$PATH \$JVM -Dlog4j.configuration=file:\$sdir/log4j.properties -classpath
"\$sdir/../../solr-webapp/webapp/WEB-INF/lib/*:\$sdir/../../lib/ext/*" org.apache.solr.cloud.ZkCLI
"\${1+"\$@"}" {code} which is a reasonable default, but often people want to use a "global" log4j
configuration. For example, one may define a log4j configuration that writes to an external log directory
and want to point to this rather than copying it to each source checkout.

jira_issues_comments:

1. is it time to just kill zkcli and move it's functionality into bin/solr ?
2. bq. is it time to just kill zkcli and move it's functionality into bin/solr ? probably :). In any case that would be a 7.x change, right? This would be useful in 6.x imo.
3. Here's a patch that lets you specify the log4j configuration file via the LOG4J_PROPS environment variable. I'd appreciate someone looking at the windows code since I can't test.
4. **body:** Looks okay to me, though caps style doesn't match existing in the batch file.
label: code-design
5. **body:** Here's a patch that matches the caps style (I had been copying the style from solr.cmd)
label: code-design
6. **body:** Looks okay to me too (though can't test on windows either).
label: test
7. Commit 0dec8f9415a9d97a93870a416e96366db60a72fa in lucene-solr's branch refs/heads/master from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=0dec8f9>] SOLR-9047: zkcli should allow alternative locations for log4j configuration
8. Commit 67ebfb1cc257808e53f74d9c38a9729ded87a330 in lucene-solr's branch refs/heads/branch_6x from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=67ebfb1>] SOLR-9047: zkcli should allow alternative locations for log4j configuration
9. Thanks for taking a look Mark and Christine. Committed to trunk and 6.1.
10. Commit ad152d23d5e70121f5e6ddc4bae5dabb288b96c2 in lucene-solr's branch refs/heads/branch_6x from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=ad152d2>] SOLR-9047: fix windows script
11. Commit 6e2d80d3a8f4434499bbeee81afa47a52252c143 in lucene-solr's branch refs/heads/master from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=6e2d80d>] SOLR-9047: fix windows script
12. Manually correcting fixVersion per Step #S5 of LUCENE-7271
13. Commit 66c16651baa88a2dcdef392e2f76870334136821 in lucene-solr's branch refs/heads/branch_5_5 from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=66c1665>] SOLR-9047: zkcli should allow alternative locations for log4j configuration

14. Commit 1eb3093311682a2db108dd5e6d6f4aea52bee973 in lucene-solr's branch refs/heads/branch_5x from [~gchanan] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=1eb3093>] SOLR-9047: zkcli should allow alternative locations for log4j configuration
15. Commit c64b1194af9328c4da7bc5f5f08cbac93db3e7bf in lucene-solr's branch refs/heads/branch_5x from [~steve_rowe] [<https://git-wip-us.apache.org/repos/asf?p=lucene-solr.git;h=c64b119>] SOLR-9047: Remove misplaced CHANGES entry
16. Reopening to backport to 6.0.2, 5.6 and 5.5.2.
17. Bulk close issues released with 5.5.2.
