1. **summary:** Broken links in the components nav.adoc
description: The website build
[fails][https://builds.apache.org/job/Camel.website/job/master/238/console] with broken links in the component nav.adoc. {code} 11:47:43 \$ antora --generator @antora/xref-validator site.yml 11:48:30 Unresolved xrefs (grouped by origin): 11:48:30 11:48:30 repo: https://github.com/apache/camel.git | branch: master | component: components | version: latest 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: constant-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: exchangeProperty-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: file-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: header-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: ref-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: simple-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: tokenize-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: xtokenize-language.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: microprofile-health.adoc 11:48:30 path: docs/components/modules/ROOT/nav.adoc | xref: reactor.adoc {code} Same can be seen if the xref verifier is run on the doc module via {{./mvnw -f docs verify}}

jira_issues_comments:

1. **body:** Okay those are missing docs, the last 2 has been corrected. But the general docs was in camel-core and with this splitup there is a little issue in that tool. Let me try to get them working, eg you can also see the WARN if you build catalog-camel+catalog
label: documentation
2. Is index.adoc generated?
3. okay should be fixed now
4. bq. Is index.adoc generated? From what I remember only nav.adoc files are generated, I think the generated files have [a header][https://github.com/apache/camel/blob/master/docs/generated.txt].
