

git_comments:

1. * True iff the indication config key is set _at_ this location (not parents) * @deprecated since 0.6.0 use {@link #hasConfig(ConfigKey, boolean)}
2. * Returns all config set, either inherited (argument true) or locally-only (argument false)
3. * Returns all config set _at_ this location (not inherited) * @deprecated since 0.6.0 use {@link #getAllConfig(boolean)}
4. * Returns configuration set at this location or inherited or default
5. * True iff the indication config key is set, either inherited (second argument true) or locally-only (second argument false)
6. * @since 0.6.0 (?) - use getDisplayName
7. * @deprecated since 0.6.0 use {@link #getRawLocalConfigBag()}
8. TODO shouldn't have to copy config bag as it should be inherited (but currently it is not used inherited everywhere; just most places)
9. uninformative net.schmizz.sshj.connection.ConnectionException: Request failed (reason=UNKNOWN) may mean remote Subsystem is disabled (e.g. for FTP) if key is missing, get a UserAuth error
10. * private key should be inherited, so confirm that happens correctly

git_commits:

1. **summary:** Merge pull request #793 from ahgittin/misc
message: Merge pull request #793 from ahgittin/misc change Location API for clarity on when config is inherited or not

github_pulls:

1. **title:** Rename base package from brooklyn to org.apache.brooklyn
body: Refs BROOKLYN-162 Update package names of brooklyn-cli. Also fix brooklyn-qa after new code was merged. mvn clean install works. Also deployed some blueprints successfully.

github_pulls_comments:

1. [incubator-brooklyn-pull-requests #1573](https://builds.apache.org/job/incubator-brooklyn-pull-requests/1573/) SUCCESS This pull request looks good
2. Looks good, tested, reviewed, fixed conflicts due to renames.

github_pulls_reviews:

jira_issues:

1. **summary:** Update package names to org.apache.brooklyn.*
description: As discussed on the list we should update the package names sooner rather than later. This issue is meant to track the progress of that task. To see what packages need conversion, use: {noformat}find . -name brooklyn | grep -v target | grep -v org/apache/brooklyn | grep -v com/acme/sample{noformat} To look for stale items in a project once you think you've updated, the following can be useful (it's imperfect, but handy): {noformat}grep -r "[^e].brooklyn[^\w]" . | grep -v import | grep -v artifactId{noformat} In some cases, split packages are being addressed by this refactoring. ([~hzbarcea@gmail.com] is there a separate issue for that?) To minimize interference I added the list of subprojects. Please add your name to the module you want to take care of so others would know you are taking care of it. I'd suggest adding a check mark to what's already done and committed (v) and a (userid) for wip. Note however that things may not have been updated, so also use the command above. {noformat} (v) ./api/ ./camp/camp-base/ ./camp/camp-server/ (v) ./camp/ (hadrian) ./core/ (v) ./core/src/test/dependencies/osgi/entities/ (v) ./core/src/test/dependencies/osgi/more-entities-v1/ (v) ./core/src/test/dependencies/osgi/more-entities-v2-evil-twin/ (v) ./core/src/test/dependencies/osgi/more-entities-v2/ ./examples/global-web-fabric/ (v) ./examples/ (v) ./examples/simple-messaging-pubsub/ (v)

39. GitHub user CMoH opened a pull request: <https://github.com/apache/incubator-brooklyn/pull/814> brooklyn-software-osgi: add org.apache package prefix Refs BROOKLYN-162 All tests that are part of the Integration profile are marked WIP. I did not run any live tests. There are 2 more issues for this project: 1. src/test/resources contains a hello-world.jar that is used as test OSGi bundle. Shouldn't this be part of the osgi-test-bundles processed by hadrian? 2. Talking of split packages: the sources also contain the classes org.osgi.jmx.Item and org.osgi.jmx.JmxConstants, each with the following note: ``java /* * BROOKLYN NOTE: This is a verbatim copy of the original in org.osgi.enterprise-4.2.0, * reproduced here to avoid pulling in the rest of that bundle and its chain of dependencies. * The only difference is this comment and the suppress warnings. */ `` As far as I can see org.osgi.enterprise-4.2.0 has no dependencies, though it does bundle a lot more classes. You can merge this pull request into a Git repository by running: `$ git pull https://github.com/CMoH/incubator-brooklyn rename_org_apache_2` Alternatively you can review and apply these changes as the patch at: <https://github.com/apache/incubator-brooklyn/pull/814.patch> To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #814 ---- commit 8601629a4f524dd2780663b96b6bc775c78a028a Author: Ciprian Ciubotariu <cheepeero@gmx.net> Date: 2015-08-12T08:07:50Z brooklyn-software-osgi: add org.apache package prefix ----
40. Github user asfgit closed the pull request at: <https://github.com/apache/incubator-brooklyn/pull/813>
41. Github user aledsage commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/805#issuecomment-130348972> @ygy there's a test failure: ``org.apache.brooklyn.rest.domain.EntitySummaryTest.testSerializeToJSON``. The test says it's expecting ``"type":"org.apache.brooklyn.entity.webapp.tomcat.TomcatServer"`` but found ``"type":"brooklyn.entity.webapp.tomcat.TomcatServer"``. This fails because <https://github.com/apache/incubator-brooklyn/blob/master/software/webapp/src/main/java/brooklyn/entity/webapp/tomcat/TomcatServer.java> has not yet been updated. Did you modify ``fixtures/entity-summary.json`` in this PR?

commit ee12c779464536a3deeb7312397549d8817aabf3 Author: Hadrian Zbarcea
<hadrian@apache.org> Date: 2015-08-13T02:51:35Z [BROOKLYN-162] Rename ./api/event; use the no split package convention ----
50. Github user hzbarcea commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/816#issuecomment-130513415> @bostko I saw what you did in this pull request too late. The build failed because you missed a couple of imports in the quickstart archetype, but by now I think I created a bunch of conflicts with the last commits. For the package rename I think we should go straight to using the convention we agreed upon to avoid the split package problem. I don't know if you want to rework this. If not that's ok, I can take care of it.
51. Github user hzbarcea commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/818#issuecomment-130519196> @asfbot tests pass, merging.
52. Github user asfgit closed the pull request at: <https://github.com/apache/incubator-brooklyn/pull/818>
53. 114. Github user aledsage commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/842#issuecomment-132321952> Thanks @iyovcheva - I think we should move to renaming things in bigger chunks than this. Our package renaming is taking a long time, and multiple change PRs are ending up causing merge conflicts for each other. I think we're going to have a blast at lots of renaming tonight. I'll merge this first though (after I check that it builds locally for me).
115. Github user aledsage commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/842#issuecomment-132322990> Actually, @ahgittin has commented on IRC that he will try to "finish the rest" tonight. I expect he'll rename these packages to a prefix like ``org.apache.brooklyn.location.jclouds.*``, so me merging this could cause him merge conflicts. I'll leave @ahgittin to decide whether to merge this, or whether his work is going to supersede this tonight.
116. Github user hzbarcea closed the pull request at: <https://github.com/apache/incubator-brooklyn/pull/841>
117. Github user ahgittin commented on the pull request: <https://github.com/apache/incubator-brooklyn/pull/842#issuecomment-132480359> hi @iyovcheva can you close? this conflicts w #844 which does a slightly different rename (inter alia). any comments you have there are welcome.

[BROOKLYN-162] move packages As discussed in <https://github.com/apache/incubator-brooklyn/pull/854> See individual commits descriptions for details of changes. Copy-pasted below for your convenience. commit e7420b1e4194cbe597a9d467bddc1a197804af50 Author: Aled Sage <aled.sage@gmail.com> Date: Thu Aug 20 11:32:42 2015 +0100 move
WindowsPerformanceCounterSensors to o.a.b.core.sensor.windows - Was previously in software-base, in o.a.b.sensor.winrm. - Renamed to .windows to be consistent with .feed.windows - Moved to core to be consistent with .sensor.ssh and .sensor.http commit 1dde632fe624e1efec91573715c9470e12fd18e9 Author: Aled Sage <aled.sage@gmail.com> Date: Thu Aug 20 11:27:20 2015 +0100 Move
HttpRequestSensor to o.a.b.core.sensor.http commit 080d2de0806f5524886b4d6d8bfea7c71a45dbc7 Author: Aled Sage <aled.sage@gmail.com> Date: Thu Aug 20 11:24:20 2015 +0100 Move
o.a.b.sensor.ssh contents to core - Moved SshCommandEffector (which strangely was in .sensor.ssh) to o.a.b.core.effector.ssh - Moved SshCommandSensor (which strangely was in .sensor.ssh) to

o.a.b.core.sensor.ssh - Changed these classes to reference config in BrooklynConfigKeys, rather than in SoftwareProcess.* - Added BrooklynConfigKeys.SHELL_ENVIRONMENT, which SoftwareProcess now uses. - Made SshCommandSensor.makeCommandExecutingInDirectory public and marked as @Beta (was previously static package-private, for use by SshCommandEffector as well). - Split SshCommandIntegrationTest into two: - SshCommandEffectorIntegrationTest (and removed unnecessary tempFile creation) - SshCommandSensorIntegrationTest (and moved tempFile creation/deletion into setUp/tearDown) commit 8e439bdb398e12d12c4c7d5aeff31497207be742 Author: Aled Sage <aled.sage@gmail.com> Date: Thu Aug 20 10:47:38 2015 +0100 Move HasBrooklynManagementContext to o.a.b.core.mgmt - Was previously in o.a.b.camp.brooklyn.api, in the core module You can merge this pull request into a Git repository by running: \$ git pull https://github.com/aledsage/incubator-brooklyn refactor/move-packages-20150820 Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-brooklyn/pull/856.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #856 ---- commit 8e439bdb398e12d12c4c7d5aeff31497207be742 Author: Aled Sage <aled.sage@gmail.com> Date: 2015-08-20T09:47:38Z Move HasBrooklynManagementContext to o.a.b.core.mgmt - Was previously in o.a.b.camp.brooklyn.api, in the core module commit 080d2de0806f5524886b4d6d8bfea7c71a45dbc7 Author: Aled Sage <aled.sage@gmail.com> Date: 2015-08-20T10:24:20Z Move o.a.b.sensor.ssh contents to core - Moved SshCommandEffector (which strangely was in .sensor.ssh) to o.a.b.core.effector.ssh - Moved SshCommandSensor (which strangely was in .sensor.ssh) to o.a.b.core.sensor.ssh - Changed these classes to reference config in BrooklynConfigKeys, rather than in SoftwareProcess.* - Added BrooklynConfigKeys.SHELL_ENVIRONMENT, which SoftwareProcess now uses. - Made SshCommandSensor.makeCommandExecutingInDirectory public and marked as @Beta (was previously static package-private, for use by SshCommandEffector as well). - Split SshCommandIntegrationTest into two: - SshCommandEffectorIntegrationTest (and removed unnecessary tempFile creation) - SshCommandSensorIntegrationTest (and moved tempFile creation/deletion into setUp/tearDown) commit 1dde632fe624e1efec91573715c9470e12fd18e9 Author: Aled Sage <aled.sage@gmail.com> Date: 2015-08-20T10:27:20Z Move HttpRequestSensor to o.a.b.core.sensor.http commit e7420b1e4194cbe597a9d467bddc1a197804af50 Author: Aled Sage <aled.sage@gmail.com> Date: 2015-08-20T10:32:42Z move WindowsPerformanceCounterSensors to o.a.b.core.sensor.windows - Was previously in software-base, in o.a.b.sensor.winrm. - Renamed to .windows to be consistent with .feed.windows - Moved to core to be consistent with .sensor.ssh and .sensor.http ----

122. Github user ahgittin commented on the pull request: https://github.com/apache/incubator-brooklyn/pull/856#issuecomment-132986626 looks great, merging. i don't like the way related items are split up e.g. `Windows*` spread across a sub-package `windows` in different parents `o.a.b.feed` and `o.a.b.core.sensor`. however rather than resolving this with higher-level `windows` namespace inside `core` (which i was doing, but you've talked me out of it) i think we should resolve this with finer granular projects, so there is e.g. `o.a.b.ecosystem.windows` which contains windows-specific things. this would justify osgi hierarchy dominating most things as osgi project and product area become more closely aligned. (somehow we'll have to manage the package transition but we will find a way!)
123. Github user ahgittin commented on the pull request: https://github.com/apache/incubator-brooklyn/pull/856#issuecomment-132987110 not immediately btw -- the osgi project expansion can wait for a while, maybe after 1.0. @hzbarcea tells me we can have multiple repos at apache within this project (that is distinct from *apache* sub-projects), so we could e.g. move things like chef and windows etc into a `brooklyn-ecosystems` repo.
124. Github user asfgit closed the pull request at: https://github.com/apache/incubator-brooklyn/pull/856
125. I think this is complete now. Shouldn't we close it?
126. GitHub user aledsage opened a pull request: https://github.com/apache/incubator-brooklyn/pull/942 Fix add-app-wizard for enums (WIP) Attempting to fix: ![screen shot 2015-10-07 at 22 53 55] (https://cloud.githubusercontent.com/assets/593113/10352437/f7f3739c-6d46-11e5-9302-4171b4fdd0e5.png) My change reverts a change that sneaked in as part of the commit "[BROOKLYN-162] package rename to org.apache.brooklyn: software/webapp"! However, when I just ran with it in a downstream project, it seemed not to alter the behaviour at all. Maybe my javascript was cached or maybe the downstream build actually downloaded the latest snapshot Brooklyn (rather than taking my local build)?! You can merge this pull request into a Git repository by running: \$ git pull https://github.com/aledsage/incubator-brooklyn fix/add-app-wizard-for-enums Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-brooklyn/pull/942.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #942 ---- commit
