

Item 326

git_comments:

1. * * Returns this searchers executor or `null` if no executor was provided

git_commits:

1. **summary:** Expose IndexSearchers executor in order to enable searcher cloning (#732)
message: Expose IndexSearchers executor in order to enable searcher cloning (#732) Today if an executor was added to the IndexSearcher it's impossible to clone the searcher with it's cache, similarity and caching policy since the executor is not exposed. This adds a simple getter to make cloning easier.
