1. **title:** [FLINK-11509] Remove invalid test ClientConnectionTest
   body: ## What is the purpose of the change This test tests legacy class StandaloneClusterClient, and in the new (Rest)ClusterClient we don't have those futures. So we can drop it directly. ## Brief change log Delete `ClientConnectionTest.java`. ## Verifying this change This change is a trivial rework / code cleanup without any test coverage. ## Does this pull request potentially affect one of the following parts: - Dependencies (does it add or upgrade a dependency): (no) - The public API, i.e., is any changed class annotated with `@Public(Evolving)`: (no) - The serializers: (no) - The runtime per-record code paths (performance sensitive): (no) - Anything that affects deployment or recovery: JobManager (and its components), Checkpointing, Yarn/Mesos, ZooKeeper: (no) - The S3 file system connector:(no) ## Documentation - Does this pull request introduce a new feature? (no) - If yes, how is the feature documented? (not applicable) cc @tillrohrmann

github_pulls_comments:

1. Thanks a lot for your contribution to the Apache Flink project. I'm the @flinkbot. I help the community to review your pull request. We will use this comment to track the progress of the review. ## Review Progress * ❌ 1. The [description] looks good. * ❌ 2. There is [consensus] that the contribution should go into to Flink. * ❓ 3. Needs [attention] from. * ❌ 4. The change fits into the overall [architecture]. * ❌ 5. Overall code [quality] is good. Please see the [Pull Request Review Guide] (https://flink.apache.org/reviewing-prs.html) for a full explanation of the review process.<details> <summary>Bot commands</summary> The @flinkbot bot supports the following commands: - `@flinkbot approve description` to approve the 1st aspect (similarly, it also supports the `consensus`, `architecture` and `quality` keywords) - `@flinkbot approve all` to approve all aspects - `@flinkbot attention @username1 [@username2 ..]` to require somebody's attention - `@flinkbot disapprove architecture` to remove an approval </details>
