1. **summary:** Remove unnecessary getRow overloads in HRS
   description: HRS currently contains: public RowResult getRow(final byte [] regionName, final byte [] row, final long ts) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns, final long ts) The first two call the last one which calls HR.getFull. Changes will be made to HTable to map all getRow calls to a single getRow HRS method.
2. **summary:** Remove unnecessary getRow overloads in HRS
   description: HRS currently contains: public RowResult getRow(final byte [] regionName, final byte [] row, final long ts) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns, final long ts) The first two call the last one which calls HR.getFull. Changes will be made to HTable to map all getRow calls to a single getRow HRS method.
3. **summary:** Remove unnecessary getRow overloads in HRS
   description: HRS currently contains: public RowResult getRow(final byte [] regionName, final byte [] row, final long ts) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns) public RowResult getRow(final byte [] regionName, final byte [] row, final byte [][] columns, final long ts) The first two call the last one which calls HR.getFull. Changes will be made to HTable to map all getRow calls to a single getRow HRS method.
4. **summary:** Remove unnecessary getRow overloads in HRS

jira_issues_comments:

1. Reviewed patch. +1. Cannot commit until 0.2 branch is created.
2. Committed to 0.2 branch and trunk. Thanks for the patch Jonathan!
3. -1 This patch changed all lines of HRegionServer. (apears to be whitespace change) This makes maintaining other patches a PITA...
4. Hmm. The patch doesn't change all lines. Was it when you did the application Jim that all lines changed?
5. **body:** Fixed whitespace diffs in HRegionServer
