1. **summary:** rm /user/<username>/.Trash/____ only moves it back to .Trash
   description: In 0.15 or before, any dfs -rm call for files under Trash were deleted. From 0.16, it just renames it back to Trash. In Trash.java:moveToTrash() {noformat} if (path.toString().startsWith(trash.toString())) {noformat} seems like trash.toString() is fully qualified, and path.toString() is not.

jira_issues_comments:

1. Here is a patch and a test for this bug... It's my first patch to Hadoop, I just hope it is OK

3. Brice, You picked up some spurious whitespace changes in your patch. Can you please re-create your patch without them? Thanks! Other than that, it looks good.
4. Oops. Here is a second patch, without those spaces.
5. I just committed this with the slight change of using Path.makeQualified instead of string append. Thanks, Brice!
