1. **summary:** MINOR: Reduce logging level for controller connection failures from `error` to `warn`
   message: MINOR: Reduce logging level for controller connection failures from `error` to `warn` Before we switched from `BlockingChannel` to `NetworkClient`, we were always reporting a successful connection due to the fact that `BlockingChannel.connect` catches and swallows all exceptions. We are now reporting failures (which is better), but `error` seems too noisy (as can be seen in our tests). Author: Ismael Juma <ismael@juma.me.uk> Reviewers: Jun Rao <junrao@gmail.com> Closes #280 from ijuma/reduce-connection-failure-logging-level
