   description: We have everything all setup to run a test node on localhost:9170, why not create an ant target to do that? Patch to follow.
5. **summary:** test run from ant
   description: We have everything all setup to run a test node on localhost:9170, why not create an ant target to do that? Patch to follow.
6. **summary:** test run from ant
   description: We have everything all setup to run a test node on localhost:9170, why not create an ant target to do that? Patch to follow.

jira_issues_comments:

1. **body:** can we name it so that it's clear it's running w/ the test conf so it's less likely to confuse the unwary? run-test-conf may be too verbose...
   label: code-design
2. Verbose isn't a problem for me (but maybe I'm just spoiled by command completion). How about {{run-test-mode}}, or {{test-run}}? Those seem to make it patently obvious what it does.
3. v2 also includes a description that might help drive home the point for some.
4. +1
5. Integrated in Cassandra #1176 (See [https://builds.apache.org/job/Cassandra/1176/]) run cassandra from ant Patch by eevans; reviewed by jbellis for CASSANDRA-3420 eevans : http://svn.apache.org/viewcvs.cgi/?root=Apache-SVN&view=rev&rev=1190745 Files : * /cassandra/trunk/build.xml
