1. **summary:** Update Dockerfile to use official Java repository
   description: The old {{dockerfile/java:openjdk-7-jdk}} repository is no longer working (see
   https://forums.docker.com/t/dockerfile-java-oracle-java7-repo-not-found-issue/1472), so it needs
   updating.
   label: test

   updating.

jira_issues_comments:

1. **body:** Here's a patch to fix this. With this change the tests all pass with {{./build.sh test}} except for
   AVRO-1688.
   label: test
2. +1
3. Commit 1687572 from tomwhite@apache.org in branch 'avro/trunk' [https://svn.apache.org/r1687572]
   AVRO-1689. Update Dockerfile to use official Java repository.
4. SUCCESS: Integrated in AvroJava #519 (See [https://builds.apache.org/job/AvroJava/519/]) AVRO-1689.
   Update Dockerfile to use official Java repository. (tomwhite: rev 1687572) * /avro/trunk/CHANGES.txt *
   /avro/trunk/share/docker/Dockerfile
