1. **summary:** refactor some WALCellCodec related code
   description: Currently I'm working on export HLog to another FileSystem, then I found the code of WALCellCodec and its related classes is not that clean. And there are several TODOs. Thus I tried to refactor the code based one these TODOs. e.g. {code} // TODO: it sucks that compression context is in WAL.Entry. It'd be nice if it was here. // Dictionary could be gotten by enum; initially, based on enum, context would create // an array of dictionaries. static class BaosAndCompressor extends ByteArrayOutputStream implements ByteStringCompressor { public ByteString toByteString() { // We need this copy to create the ByteString as the byte[] 'buf' is not immutable. We reuse // them. return ByteString.copyFrom(this.buf, 0, this.count); } {code}

9. **body:** bq. throw new RuntimeException("There should not throw exception since NodeCompressor do not throw any exceptions") NodeCompressor ==> NoneComperssor. And please use the IOException as the cause. bq. familyDict.init(Byte.MAX_VALUE); The new impl is Short.MAX_VALUE? Why change this? bq. @deprecated Since 2.1.0. To be removed in hbase-3.0.0. deparcated since hbase 3.0.0. And please check that there are no use about the deprecated method setCompressionContext.
   label: code-design

10. [~zghaobac] thx for review. {quote} The new impl is Short.MAX_VALUE? Why change this? {quote} I think they are all Short.MAX_VALUE... fixed.. The other 2 problems are also fixed. The only use of setCompressionContext now is in WAL, and I deprecated it, too. There are no other uses to these two method.

12. [~stack] Can we remove a public method from a IA.LimitPrivate interface when take a major release, etc. 3.0.?

13. bq. Can we remove a public method from a IA.LimitPrivate interface when take a major release, etc. 3.0.? Technically you can do this: "A major upgrade allows the HBase community to make breaking changes." And LimitedPrivate is "...used for internals we expect to be pluggable, such as coprocessors." I appreciate the work done in this patch but could we deprecate the old and point at the new instead? If possible? It may not be possible.

14. **body:** Thanks [~stack]. The deprecated method setComprssionContext not used anymore, so I thought it is better to remove it directly. [~tianjingyun] Let's remove it directly. +1 for other parts. And please attach a patch for branch-2, too.
    label: code-design
15. [~zghaobac] do you mean remove setComprssionContext at this patch? or 3.0?
