github_pulls_comments:

1. Hi Hyoungjun, thanks for your contribution. I left some comments. Please reflect them. Thanks.
2. The patch seems to be gone stale. It requires rebase against the latest revision.
3. I think RpcErrorController is unnecessary class. we've got the DefaultRpcController already
4. @babokim, could I take this issue?
5. @jinossy Thanks
6. Thank you. I will upload the patch to jira.

github_pulls_reviews:

1. Would you add some descriptions of each errorController?
2. This function is not used anymore.
3. It would be better to change 'if clause' to 'catch clause'. Here is an example. ``` ... } catch (ClosedChannelException e) { remainingRetries = 0; LOG.warn("Last retry, exiting "); throw new RuntimeException(e); } catch (Throwable t) { LOG.error(t.getMessage(), t); remainingRetries -= 1; } finally { ... ```
4. Sorry, I mmisunderstood that the throwable can be ClosedChannelException. But, this code looks tricky. Are there any better way to handle this exception?
5. I agree that we need a better way to handle RPC exception. I think it is better to deal with handling RPC exception in the new issue.
6. I'll remove.
7. I'll add a comment.
8. Thanks for your comment. I agree with you.
