1. **summary:** Javadoc - improve summaries etc
   description: The javadoc could use to be polished for eg. summaries statis the Apache license instead of a short brief summary what the class/package does etc. It's all the javadoc also for the components.
   label: code-design
2. **summary:** Javadoc - improve summaries etc
   description: The javadoc could use to be polished for eg. summaries statis the Apache license instead of a short brief summary what the class/package does etc. It's all the javadoc also for the components.

jira_issues_comments:

1. **body:** - Remove unused imports *DONE*
    label: code-design
2. - XPathLanguage should be moved to language package and not the builder.xml package as now
3. - Add missing summaries for Exceptions in Camel *DONE*
4. **body:** - Fix layput problems on the published javadoc *DONE* - Add missing class javadoc for public classes in Camel core *DONE*
    label: documentation
5. **body:** - track down Eclipse non javadoc to see if it can be removed: (non-Javadoc) *DONE*
    label: documentation
6. Thanks Hadrian I have removed the @deprecations
7. **body:** - XPathAnnotationExpressionFactory, DefaultAnnotationExpressionFactory, AnnotationExpressionFactory should be moved from the bean component to a better suited package
    label: code-design
8. @Claus The Reporting* classes are used by the camel-maven-plugin!
9. **body:** Pheeevv no more javadoc polishing for ... a while ;)
    label: documentation
10. **body:** - Add Ref as a Component *DONE* - Remove duplicated javadoc in classes that should use the javadoc from the interface *DONE* - Prefer to have javadoc on interfaces rather than impl classes *DONE*
    label: code-design
11. **body:** - ListPollingConsumer on the SEDA component is not used - marked as @deprecated but we should consider deleting it *DONE*
    label: code-design
12. - Fixed loggers to be transient and commons-logging *DONE*
13. - ReportingTypeConverterLoader and the likes has been marked as @deprecated (not used at all) *No used by camel maven plugin* - Out.class from the util package has been removed (not used at all) *DONE*
14. - consider renaming InstrumentationAgentImpl to DefaultInstrumentationAgent *DONE* - look for other xxxImpl could be renamed to a more appropriate name *DONE, only InstrumentationAgentImpl exists*
15. Damm for some obsure reason someone is using Out in camel-jms. - Fixed by adding Out.java as ValueHolder.java and updated camel-jms *DONE*
