   body: Annotate HttpSolrCall and V2HttpCall as thread-safe

github_pulls_comments:

1. I think you already did this in #1203
2. @madrob - this is a PR against 8x.

   label: requirement

jira_issues_comments:

1. I don't think we need a new JIRA for each class, so will keep this open and continue adding annotations. I personally feel we don't need changelog entry for each of the commits. Feel free to speak up if you think otherwise.
2. Commit 3c0146196aefd7fc05429650ea205a04bbb00524 in lucene-solr's branch refs/heads/master from Anshum Gupta [https://gitbox.apache.org/repos/asf?p=lucene-solr.git;h=3c01461] SOLR-14206: Annotate HttpSolrCall as thread-safe (#1203) * SOLR-14206: Annotate HttpSolrCall and V2HttpCall as thread-safe
