github_pulls:

1. **title:** Reduced Logging verbosity for GoogleCloudStorageDownloadOperator
   body: Make sure you have checked _all_ steps below. ### JIRA - [X] My PR addresses the following
   [Airflow JIRA](https://issues.apache.org/jira/browse/AIRFLOW/) issues and references them in the PR
   title. For example, "[AIRFLOW-XXX] My Airflow PR" -
   https://issues.apache.org/jira/browse/AIRFLOW-2025 ### Description - [X] Here are some details about
   my PR, including screenshots of any UI changes: Changes logging level to debug, which is a more
   appropriate level for what is trying to be achieved. ### Tests - [X] My PR adds the following unit tests
   __OR__ does not need testing for this extremely good reason: - Testing shouldn't be required to change
   the logging level ### Commits - [X] My commits all reference JIRA issues in their subject lines, and I
   have squashed multiple commits if they address the same issue. In addition, my commits follow the
   guidelines from "[How to write a good git commit message](http://chris.beams.io/posts/git-commit/)": 1.
   Subject is separated from body by a blank line 2. Subject is limited to 50 characters 3. Subject does not
   end with a period 4. Subject uses the imperative mood ("add", not "adding") 5. Body wraps at 72
   characters 6. Body explains "what" and "why", not "how" - [X] Passes `git diff upstream/master -u --
   "*.py" | flake8 --diff` No, there is an existing failure against the above command, this pull request does
   not touch this line

github_pulls_comments:

1. LGTM merged
2. # [Codecov](https://codecov.io/gh/apache/incubator-airflow/pull/2967?src=pr&el=h1) Report > Merging
   [#2967](https://codecov.io/gh/apache/incubator-airflow/pull/2967?src=pr&el=desc) into [master]

jira_issues:

1. **summary:** GoogleCloudStorageDownloadOperator print file contents to log files
   description: The logging for this Operator prints the file contents of the file to the log file. This could potentially lead to large log files if a large file was to be downloaded.

jira_issues_comments:

1. This is also a potential security issue, as the downloaded file might contain sensitive information.
2. I've created a pull request to change the debug level to debug. There is an argument to stay the file contents shouldn't even be logged as per [~criccomini]'s comment Pull request is here: [https://github.com/apache/incubator-airflow/pull/2967]
3. Commit 18d09a9481800baf8c546814564aafcfa8ed0e1b in incubator-airflow's branch refs/heads/master from Kristian Jones [https://git-wip-us.apache.org/repos/asf?p=incubator-airflow.git;h=18d09a9] [AIRFLOW-2025] Reduced Logging verbosity Closes #2967 from britishbadger/reduce_logging_verbosity
