1. **summary:** Test Apache Camel on Java 9
   description: To find out early if we have problems with Java 9 and Apache Camel.

jira_issues_comments:

1. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1460 Support for java 9
   https://issues.apache.org/jira/browse/CAMEL-10141 This PR adds support for java 9 up to camel-core in the reactor build order. I've tested with
   the latest java 9 (Build 156). I'll squash the commits once approved (left them for clarity). Thanks! You can merge this pull request into a Git
   repository by running: $ git pull https://github.com/johnpoth/camel CAMEL-10141 Alternatively you can review and apply these changes as the
   patch at: https://github.com/apache/camel/pull/1460.patch To close this pull request, make a commit to your master/trunk branch with (at least)
   the following in the commit message: This closes #1460 ---- commit 2a7519bd264db12ce5535b94dca5422f614c2c47 Author: jpoth
   <poth.john@gmail.com> Date: 2017-02-09T11:18:21Z CAMEL-10141 Tools.jar is no longer present in java 9 commit

   maven jar plugin for java 9 support commit 0cc95d885fdfd99f3acff450127d881fc04a4684 Author: jpoth <poth.john@gmail.com> Date: 2017-
   02-09T12:20:52Z CAMEL-10141 The inal plugin isn't compatible with java 9 and isn't unmaintained so lets remove it and rely on the rat plugin
   instead commit db07ce88dd86631cfa46c8040904ae199725f013 Author: jpoth <poth.john@gmail.com> Date: 2017-02-10T17:44:51Z CAMEL-
   10141 Lets build camel-core and have some unit tests pass commit a1b8ca2e3428acb92188ce95bc875496578a004c Author: jpoth
   <poth.john@gmail.com> Date: 2017-02-13T15:58:47Z CAMEL-10141 Lets pass all unit tests in camel-core on java 9 ----
2. It would be a good idea to add a CI job that uses JDK9 so we can have it test the source code how it compiles / tests on Java 9.
   https://builds.apache.org/view/A-D/view/Camel/
3. Hi [~davsclaus] I'd be happy to set that up unfortunately I don't have the rights to do so.
4. I setup a java 9 job that builds the project without testing. https://builds.apache.org/view/A-D/view/Camel/job/Camel.trunk.notest.java9/ Then
   we can add a build that does testing as well later. At first we need the CI server to be able to build the code first.
5. Merged your PR and kicked off the build https://builds.apache.org/view/A-D/view/Camel/job/Camel.trunk.notest.java9/1/
6. There is some weird maven error at https://builds.apache.org/job/Camel.trunk.notest.java9/1/consoleText The CI server is using Maven 3.3.3. I
   am using an older 3.2.5 davsclaus:/Users/davsclaus/workspace/connectors (master)/$ mvn --version Apache Maven 3.2.5
   (12a6b3acb947671f09b81f49094c53f426d8cea1; 2014-12-14T18:29:23+01:00) Maven home: /opt/apache-maven-3.2.5
7. John, what JDK 9 version did you use? The CI server are using JDK9 b156 with jigsaw
8. Github user johnpoth closed the pull request at: https://github.com/apache/camel/pull/1460
9. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1465 CAMEL-10141 Upgrade maven javadoc plugin for java
   9 support You can merge this pull request into a Git repository by running: $ git pull https://github.com/johnpoth/camel CAMEL-10141
   Alternatively you can review and apply these changes as the patch at: https://github.com/apache/camel/pull/1465.patch To close this pull request,
   make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #1465 ---- commit
   2bb1a445cb3c59ddf1f52f5ccbc82032f7358c78 Author: jpoth <poth.john@gmail.com> Date: 2017-02-14T13:01:37Z CAMEL-10141 Upgrade
   maven javadoc plugin for java 9 support ----
10. Hi [~davsclaus], I wasn't using the deploy profile when testing, if we want to use it we need to upgrade the maven javadoc plugin to 2.10.4, I just
    pushed a [PR|https://github.com/apache/camel/pull/1465]. The build with java 9 will still fail somewhere after camel-core. Maybe it's worth
    holding off merging this PR and wait until we can fully build the camel project with Java 9? Not sure. Cheers.
11. Github user johnpoth closed the pull request at: https://github.com/apache/camel/pull/1465
12. The CI server now builds on java 9 and it shows what failures we have. There are still problems. So there is more work needed to get it all
    building on Java 9.
13. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1481 Camel 10141 have more projects build on JAVA 9
    https://issues.apache.org/jira/browse/CAMEL-10141 This PR makes several modules build on JAVA 9 (see commit descriptions). Thanks! You
    can merge this pull request into a Git repository by running: $ git pull https://github.com/johnpoth/camel CAMEL-10141 Alternatively you can
    review and apply these changes as the patch at: https://github.com/apache/camel/pull/1481.patch To close this pull request, make a commit to
    your master/trunk branch with (at least) the following in the commit message: This closes #1481 ---- commit
    3a040336de8bf8ddc4ab6ed59ad75caac1338463 Author: jpoth <poth.john@gmail.com> Date: 2017-02-20T10:01:11Z CAMEL-10141 make
    CXF code gen plugin work on JAVA 9 commit 894a5e4a04db7462748b14eaeae265cedab33c15 Author: jpoth <poth.john@gmail.com> Date:
    2017-02-20T10:04:20Z CAMEL-10141 Tool.jar is no longer present in JAVA 9 commit 1cf8c7a47ea360ff9e5eab6e8279511d67b0cbd2 Author:
    jpoth <poth.john@gmail.com> Date: 2017-02-21T09:50:04Z CAMEL-10141 Make xsd schema generation via ant tasks work on Java 9 ----
14. Github user johnpoth closed the pull request at: https://github.com/apache/camel/pull/1481
15. Thanks John for all the PRs. We are getting closer. Now it seems we have trouble with groovy / scala / grape not building on Java 9.
16. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1496 CAMEL-10141 skip camel-jibx build on java 9 as well
    https://issues.apache.org/jira/browse/CAMEL-10141 We are skipping camel-jibx on JAVA 8 and it's failing on JAVA 9: ``` [ERROR] Failed to
    execute goal org.jibx:maven-jibx-plugin:1.3.1:test-bind (default) on project camel-jibx: Superclass java.lang.Object of class

<poth.john@gmail.com> Date: 2017-02-27T16:49:02Z CAMEL-10141 skip camel-jibx buid on java 9 as well ----

17. Github user johnpoth closed the pull request at: https://github.com/apache/camel/pull/1496
18. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1503 Camel 10141 This builds Camel on Java 9
    https://issues.apache.org/jira/browse/CAMEL-10141 This builds Camel on Java 9. Before building you must set ``` MAVEN_OPTS="--add-
    modules java.activation --add-exports=java.xml/com.sun.org.apache.xml.internal.resolver.tools=ALL-UNNAMED --add-
    exports=java.xml/com.sun.org.apache.xml.internal.resolver=ALL-UNNAMED --add-opens java.base/java.text=ALL-UNNAMED --add-opens
    java.desktop/java.awt.font=ALL-UNNAMED --add-opens java.base/java.util=ALL-UNNAMED --add-opens java.base/java.lang=ALL-
    UNNAMED --add-opens java.base/java.lang.reflect=ALL-UNNAMED --add-opens java.base/java.util.regex=ALL-UNNAMED --add-opens
    java.base/java.net=ALL-UNNAMED" ``` I've added some scripts under buildingtools for convenience. Thanks! You can merge this pull request
    into a Git repository by running: $ git pull https://github.com/johnpoth/camel CAMEL-10141 Alternatively you can review and apply these
    changes as the patch at: https://github.com/apache/camel/pull/1503.patch To close this pull request, make a commit to your master/trunk branch
    with (at least) the following in the commit message: This closes #1503 ---- ----
19. Github user johnpoth closed the pull request at: https://github.com/apache/camel/pull/1503
20. Almost there the spring boot starter of camel-groovy fails due camel-groovy is skipped in Java 9 I think. As the groovy dsl is being deprecated
    we may want to separate them so camel-groovy is just groovy and camel-groovy-dsl is the deprecated dsl that requires the groovy compiler.
21. Have moved the dsl out of camel-groovy so java 9 should be able to build that part now
22. Awesome :) Now that you mention that, I'm guessing the camel scala starter will fail too
23. **body:** Ah yeah lets remove the SB starter module as it brings no value and its deprecated also
    label: code-design
24. Yay the CI server can now build the code with java 9 https://builds.apache.org/job/Camel.trunk.notest.java9/ Next task is to add a job that runs
    the full test as well.
25. Setup a java9 full test job https://builds.apache.org/view/A-D/view/Camel/job/Camel.trunk.fulltest.java9/
26. That's awesome :-) I can take a look at the remaining failures
27. GitHub user johnpoth opened a pull request: https://github.com/apache/camel/pull/1540 Camel 10141
    https://issues.apache.org/jira/browse/CAMEL-10141. This PR makes more modules pass their tests in Java 9. You can merge this pull request
    into a Git repository by running: $ git pull https://github.com/johnpoth/camel CAMEL-10141 Alternatively you can review and apply these
    changes as the patch at: https://github.com/apache/camel/pull/1540.patch To close this pull request, make a commit to your master/trunk branch

35. Now that https://github.com/apache/camel/pull/1668 has been merged it'd be nice to have a green CI build :) It looks like the [builds|https://builds.apache.org/view/A-D/view/Camel/job/Camel.trunk.fulltest.java9/] are failing because of some memory problems so we'd need to increase that and try out a new build and upgrade to Java 9 build 166 if needed. Thanks!

36. JDK 9 b156 is the latest Apache CI have in their possible selections. I bumped the MAVEN_OPTS memory from 3000 to 3500

37. There is this test error in camel-core {code} Failed org.apache.camel.converter.IOConverterCharsetTest.testToInputStreamFileDirectByteDumpWithCharsetLatin1 Failing for the past 6 builds (Since Unstable#280) Took 12 ms. add description Error Message both input streams deliver the same byte sequence Stacktrace junit.framework.AssertionFailedError: both input streams deliver the same byte sequence at org.apache.camel.converter.IOConverterCharsetTest.testToInputStreamFileDirectByteDumpWithCharsetLatin1(IOConverterCharsetTest.java:106) {code}
