github_pulls:

1. **title:** MINOR: Align the UID inside/outside container
   body: The root cause of causing permission issue is that the uid outside container is not 1000 so container
   (has uid 1000) can't modify the file of ```/opt/kafka-dev``` ### Committer Checklist (excluded from
   commit message) - [ ] Verify design and implementation - [ ] Verify test coverage and CI build status - [ ]
   Verify documentation (including upgrade notes)

github_pulls_comments:

1. @ijuma @hachikuji please take a look. I'd like to see all green from our QA.
2. @chia7712 , great to see you have the same thoughts to fix this issue. It's quite annoying to keep breaking
   the PR build. The change LGTM. Let's see the build results!
3. > Tune the set of tests to address the timeouts Figure out how to surface more convenient test output
   (logging and such) The list is LGTM. BTW, #9673 is trying to fix failed ```connect_distributed_test.py```.
   Please take a look :)
4. > Tune the set of tests to address the timeouts Figure out how to surface more convenient test output
   (logging and such) @hachikuji Please ping me on the jira when you create related tickets :)
