Item 196
git_comments:

1. False positive since we use hamcrest-all
2. allow using transitive Flink dependencies for brevity
3. transitive powermock test dependencies; excluded for brevity

git_commits:

1. **summary:** [FLINK-16173][build] Reduce noise for used undeclared dependencies

1. **summary:** Reduce noise for used undeclared dependencies
   description: When analyzing dependency usages there are a bunch of noisy entries, particularly around transitive Flink dependencies, hamcrest and powermock, that would create more work than benefit. These should be allowed to be used without having an explicit dependency.
