1. **summary:** Fix flaky travis build on checking license header
   message: Fix flaky travis build on checking license header Descriptions of the changes in this PR:
   Problem In some environments, `BK_VERSION` is computed as `Downloading`, which is not a valid
   bookkeeper version. It fails the `dev/check-binary-license` script. ``` [0K$ if ["$TRAVIS_OS_NAME"
   == "linux"]; then dev/check-binary-license ./bookkeeper-dist/server/target/bookkeeper-
   server-${BK_VERSION}-bin.tar.gz; fi tar: ./bookkeeper-dist/server/target/bookkeeper-server-
   Downloading: Cannot open: No such file or directory tar: Error is not recoverable: exiting now tar:
   ./bookkeeper-dist/server/target/bookkeeper-server-Downloading: Cannot open: No such file or directory
   tar: Error is not recoverable: exiting now tar: ./bookkeeper-dist/server/target/bookkeeper-server-
   Downloading: Cannot open: No such file or directory tar: Error is not recoverable: exiting now ```
   Solution Remove this `BK_VERSION` setting and use "*" in the file path. Author: Sijie Guo
   <sijie@apache.org> Reviewers: Ivan Kelly <ivank@apache.org> This closes #1183 from
   sijie/address_travis_yml

1. **title:** Fix flaky travis build on checking license header
   body: Descriptions of the changes in this PR: *Problem* In some environments, `BK_VERSION` is
   computed as `Downloading`, which is not a valid bookkeeper version. It fails the `dev/check-binary-
   license` script. ``` [0K$ if ["$TRAVIS_OS_NAME" == "linux"]; then dev/check-binary-license
   ./bookkeeper-dist/server/target/bookkeeper-server-${BK_VERSION}-bin.tar.gz; fi tar: ./bookkeeper-
   dist/server/target/bookkeeper-server-Downloading: Cannot open: No such file or directory tar: Error is
   not recoverable: exiting now tar: ./bookkeeper-dist/server/target/bookkeeper-server-Downloading: Cannot
   open: No such file or directory tar: Error is not recoverable: exiting now tar: ./bookkeeper-
   dist/server/target/bookkeeper-server-Downloading: Cannot open: No such file or directory tar: Error is
   not recoverable: exiting now ``` *Solution* Remove this `BK_VERSION` setting and use "*" in the file
   path.

github_pulls_comments:

1. The IT failure is a result of there being no docker networks available, probably due to failed runs of tests.
   will push fix.
2. IGNORE IT CI
3. This change is only related to travis ci.
