616. rosslamont commented on issue #163: [NETBEANS-54] Module Review maven.indexer URL: https://github.com/apache/incubator-netbeans/pull/163#issuecomment-339822005 Thanks Javier, I didn't know about that. Is this something committers do? Or something I was meant to do as a contributor? I mis-spoke in my prior comment, what I was concerned about was squashing a conflict merge, i.e. the additional commits are to do with sorting out the conflict with base (I don't know why GitHub made me do 2 commits. I read somewhere git can get confused with how it tracks conflicts if you mess around with squashing. Is there something else I can do to finish this as a contributor? Cheers Ross > On 27 Oct 2017, at 5:40 am, Javier A. Ortiz Bultron <notifications@github.com> wrote: > > In all my GitHub projects I can configure how PR are handled. From allowing all types (merge, squash, etc.) to selecting one or some of them. > > If squashing is the preferred way it should be probably the only option. 643. javydreamercsw commented on issue #207: [NETBEANS-54] Module Review o.n.upgrader URL: https://github.com/apache/incubator-netbeans/pull/207#issuecomment-340523909 Is that the only place it is used? I wouldn't be surprised it was used from somewhere else. if not, why not making it a proper properties file? i.e. systemoptionsimport.properties --- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

644. matthiasblaesing commented on issue #207: [NETBEANS-54] Module Review o.n.upgrader URL: https://github.com/apache/incubator-netbeans/pull/207#issuecomment-340538401 I would not rename the file. I would consider the use of the Properties parser as an implementation detail and not call it a properties file (in fact I consider this a misuse of Properties). The loose syntax I see: - each line is interpreted independently - a leading # introduces a comment - empty lines are ignored - lines with content represent a single file to be imported So I would merge it as is. --- This is an automated message from the Apache Git Service. 646. junichi11 commented on issue #207: [NETBEANS-54] Module Review o.n.upgrader URL: https://github.com/apache/incubator-netbeans/pull/207#issuecomment-340621456 Thank you for reviewing it! Probably, only this place. Generally, `key=value` form is used in a *.property file. But it does not have "=value". I guess that the author just wanted to get an item per line and the author just used the Properties because it could do that. (We can imagine this from Matthias's comment.) So it would be better we use the current file name. --- This is an automated message from the Apache Git Service. 733. geertjanw commented on issue #225: [NETBEANS-54] exclude .ser files via Rat exclusions URL: https://github.com/apache/incubator-netbeans/pull/225#issuecomment-341903209 Can someone advise how to resolve the conflict here? -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

734. matthiasblaesing commented on issue #235: [NETBEANS-54] Module Review html.editor URL: https://github.com/apache/incubator-netbeans/pull/235#issuecomment-341903714 My reading of NbReaderProvider is, that there can't be comments in the catalog files. At this point the catalog files are useless, as the corresponding DTDs are not present anymore. I raised [NETBEANS-114](https://issues.apache.org/jira/browse/NETBEANS-114) for this. To get this on I would do this: - remove the license from the catalog files - add excludes to build.xml for rat: ```xml <exclude name="html.editor/src/org/netbeans/modules/html/editor/options/ui/formatSample.html" /> <!--user visible file template--> <exclude name="html.editor/src/org/netbeans/modules/html/editor/resources/HTMLExample" /> <!--user visible file template--> <exclude name="html.editor/src/org/netbeans/modules/html/editor/resources/XHTMLExample" /> <!--user visible file template--> <exclude name="html.editor/src/org/netbeans/modules/html/editor/todo.txt" /> <!--no degree of creativity--> <exclude name="html.editor/src/org/netbeans/modules/html/editor/DTDs/*/catalog" /> <!--no degree of creativity--> ``` -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

735. matthiasblaesing closed pull request #238: [NETBEANS-54] Module Review o.eclipse.equinox.common URL: https://github.com/apache/incubator-netbeans/pull/238 This is a PR merged from a forked repository. As GitHub hides the original diff on merge, it is displayed below for the sake of provenance: As this is a foreign pull request (from a fork), the diff is supplied below (as it won't show otherwise due to GitHub magic): diff --git a/o.eclipse.equinox.common/external/binaries-list b/o.eclipse.equinox.common/external/binaries-list index 72d560dd6..18a56387f 100644 --- a/o.eclipse.equinox.common/external/binaries-list +++ b/o.eclipse.equinox.common/external/binaries-list @@ -14,4 +14,4 @@ # KIND, either express or implied.

749. matthiasblaesing commented on issue #225: [NETBEANS-54] exclude .ser files via Rat exclusions URL: https://github.com/apache/incubator-netbeans/pull/225#issuecomment-341929759 @geertjanw if it helps you or others I'm ok with this, but I'll stay with the CLI tools, which also happily work with non-github repositories. Remember: sourceforge mostly died because they decided that "free project hosting" does not pay bills and then began to modify projects binaries - if github pulls a stunt like that, I will just go on and work against the apache hosted repository. What is more with the CLI (or other local tools) I can pull from other sources than github, so if contributers don't like github, but host their changes in another public git repository (bitbucket, gitlab, ...) we can still pull their changes. --- This is an automated message from the Apache Git Service. 775. matthiasblaesing closed pull request #218: [NETBEANS-54] Module Review xml.jaxb URL: https://github.com/apache/incubator-netbeans/pull/218 This is a PR merged from a forked repository. As GitHub hides the original diff on merge, it is displayed below for the sake of provenance: As this is a foreign pull request (from a fork), the diff is supplied below (as it won't show otherwise due to GitHub magic): -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

776. geertjanw commented on issue #271: [NETBEANS-54] excluding specific files, e.g., licenses via Rat URL: https://github.com/apache/incubator-netbeans/pull/271#issuecomment-343864526 So, should I simply close this one, is everything handled in #272? -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

777. matthiasblaesing commented on issue #271: [NETBEANS-54] excluding specific files, e.g., licenses via Rat URL: https://github.com/apache/incubator-netbeans/pull/271#issuecomment-343998973 No, #272 makes the exclude you introduced in 2033 obsolete, so that should be removed, The `VERSIONS.txt` excludes can be replaced with a single wildcard exclude as shown above. -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

778. matthiasblaesing commented on issue #271: [NETBEANS-54] excluding specific files, e.g., licenses via Rat URL: https://github.com/apache/incubator-netbeans/pull/271#issuecomment-345548468 @geertjanw I extended your work by adding the ALv2 header to all VERSION.txt files. You established this in a prior fix and I think it is a good idea. Please see here: https://github.com/matthiasblaesing/incubator-netbeans/tree/pr271-followup You can full that into your tree as: ``` git pull https://github.com/matthiasblaesing/incubator-netbeans.git pr271-followup ``` -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

779. geertjanw commented on issue #271: [NETBEANS-54] excluding specific files, e.g., licenses via Rat URL: https://github.com/apache/incubator-netbeans/pull/271#issuecomment-346583435 OK, I'll use that to pull this into my tree, but does anything from here need to be pushed to Apache NetBeans Git? Sorry, it's getting too complex for me in this PR, if there's a way you can commit this, that would be great. --

780. asfgit closed pull request #271: [NETBEANS-54] excluding specific files, e.g., licenses via Rat URL: https://github.com/apache/incubator-netbeans/pull/271 This is a PR merged from a forked repository. 785. matthiasblaesing opened a new pull request #311: [NETBEANS-54] Various module reviews URL: https://github.com/apache/incubator-netbeans/pull/311 - Removed unused files without license headers - Added various headers - Added various exclusions With this we are down to only one module: hibernate. The hibernate XSDs are only licensed under LGPL and so can't be included. I would not add them to the excludes. -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

786. geertjanw commented on issue #311: [NETBEANS-54] Various module reviews URL: https://github.com/apache/incubator-netbeans/pull/311#issuecomment-348637305 Awesome, merging. -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

787. geertjanw closed pull request #311: [NETBEANS-54] Various module reviews URL: https://github.com/apache/incubator-netbeans/pull/311 This is a PR merged from a forked repository. As GitHub hides the original diff on merge, it is displayed below for the sake of provenance: As this is a foreign pull request (from a fork), the diff is supplied below (as it won't show otherwise due to GitHub magic): diff --git a/css.editor/todo b/css.editor/todo index b72e8caf8..1ca059e31 100644 --- a/css.editor/todo +++ b/css.editor/todo @@ -1,3 +1,6 @@ +Licensed to the Apache Software Foundation (ASF) under one or more contributor +license agreements; and to You under the Apache License, Version 2.0. + Css modules list (source http://www.css3.info/modules/) * Selectors diff --git a/java.hints/build.xml b/java.hints/build.xml index be6dfb4b2..d73020e16 100644 --- a/java.hints/build.xml +++ b/java.hints/build.xml @@ -20,13 +20,5 @@ --> <project name="java.hints" default="netbeans" basedir="."> - <import file="../nbbuild/templates/projectized.xml"/> - - <target name="test" depends="pre-test,projectized-common.test"> - </target> - - <target name="pre-test"> - <property name="test.unit.excludes.files" location="test-excludes.txt"/> - </target> - + <import file="../nbbuild/templates/projectized.xml"/> </project> diff --git a/java.hints/test-excludes.txt b/java.hints/test-excludes.txt deleted file mode 100644 index beb5f9e05..000000000 --- a/java.hints/test-excludes.txt +++ /dev/null @@ -1 +0,0 @@ -**/JavaHintsProviderTest* diff --git a/java.hints/test/unit/src/org/netbeans/modules/java/hints/errors/Class.template b/java.hints/test/unit/src/org/netbeans/modules/java/hints/errors/Class.template index 864746b92..e7172a25c 100644 --- a/java.hints/test/unit/src/org/netbeans/modules/java/hints/errors/Class.template +++ b/java.hints/test/unit/src/org/netbeans/modules/java/hints/errors/Class.template @@ -1,3 +1,21 @@ +<#-- Licensed to the Apache Software Foundation (ASF) under one + or more contributor license agreements. 788. [~GeertjanWielenga], [~bdelacretaz] What is the current status of this mega issue? It has not been updated 12/07/2017. Please resolve/close it if its possible!

789. Good point. I think this issue can be closed once we have graduated from the Apache incubator. Since that can only be done once each and every license-related issue is solved, the fact that we'll be a top level Apache project will be evidence that we can close this specific issue as resolved.

790. I'm closing this one as we have graduated.
