   message: Merge branch 'pr/169' This closes #169

github_issues:

github_issues_comments:

github_pulls:

1. **title:** [NETBEANS-54] Module Review o.apache.commons.httpclient
   body: Updated to maven coordinates for external resource : commons-httpclient-3.1.jar (Apache 2.0)

github_pulls_comments:

1. Has corrected now usename , email-id with a force push
2. I pushed the commit to master. This PR is still a bit strange. For some reason you managed to push three commits into this. Two held the same change with different authors and one merged these two commits. Whatever I removed the merge and the commit with the wrong author and so this is done.

1. **summary:** Clarify the status of donated files from ApacheNetBeansDonation1.zip
   description: Reviewing the software grant [1] provided with the first NetBeans code donation, my understanding is that not all files found in that zip are donated. The grant indicates that the contents of that file [2] ("Code File") are donated "excluding any third-party and separately licensed material contained within the Code File". I don't think we can consider that code ready to release as is, due to the uncertainty that this creates w.r.t to which files are donated and which are not. The zip archive contains about 45'000 files. I see the following options: a) Review all files and include only those which are not "third-party and separately licensed material". How such files are identified needs to be defined and documented, either in scripts under version control or as a set of rules. The review process must be documented and traceable, so that we can go back to it if problems are found in the future. b) Get an updated grant which does not mention such exclusions. If someone sees other options please discuss here or on the NetBeans dev list, referencing this ticket. [1] in svn under private/documents/grants/oracle-america-netbeans.pdf , ASF members have access [2] under http://bits.netbeans.org/download/apache-donation/ - SHA256(ApacheNetBeansDonation1.zip)= 7f2ca0f61953a190613c9a0fbcc1b034084b04a4d55d23c02cefffc354e7c24a

jira_issues_comments:

1. For the record, the phrase in the grant does not simply say "excluding any third party or separately licensed material contained within the Code File". Instead, the full phrase is: "excluding any third party or separately licensed material contained within the Code File, such separately licensed material including without limitation the Licensor and third party material specifically identified below, and which may also include material identified in the THIRDPARTYLICENSE.txt file at: https://netbeans.org/downloads/licence/8.2/nb82-THIRDPARTYLICENSE.txt".
2. I don't necessarily see a problem with option a, i.e., the need to review all files and include only those which are not "third party and separately licensed material". I.e., that would mean doing a check for (a) JAR files and other binaries [of which none will be found, since we removed them prior to doing the donation] and (b) copyright notices. I.e., if we find files that are not licensed to Oracle, we need to evaluate on a case-by-case basis whether they can be released under Apache. We have already gone through that process as part of preparing the ZIP file for donation to Apache and can go through that process again, if needed.
3. bq. if we find files that are not licensed to Oracle, we need to evaluate on a case-by-case basis whether they can be released under Apache. That's an option indeed, provided someone writes a script to identify those files and assuming their number is not too high. You'll also need some heuristics to classify some files as irrelevant for this analysis, things like small configuration files etc.
4. **body:** Yes, we'll document all the steps and processes we'll follow and also track everything here.
   label: documentation
5. **body:** Option a is what all newly incubating projects do as part of due diligence IP Clearance. The only difference here is the size of the grant. I agree with Gj that the process for determining which of the files is suitable for Apache Netbeans is under way and needs to be documented here and followed.
   label: documentation
6. We have set up a Wiki page for processing all the incoming repos from NetBeans, here: https://cwiki.apache.org/confluence/display/NETBEANS/NetBeans+Transition+Process
7. **body:** When I was relicensing the jackpot30 repository, I wrote a fairly strict tool (attached as JavaApplication9 for the record - please be warned it is not polished in any way) to do the replace. The tool (intentionally) does not accept different formattings, comment marks, etc. to minimize risk of errors. The only "fuzzy" element the tool accepts are years in the headers (i.e. it does not care too much about years, if they are on particular places). I believe the only files I touched by hand were: -increment-spec-versions (broken license header, only one file with that header in the repo) -cmdline/tool/scripts/jackpot.bat (sole .bat file in the repo, "standard" header AFAIK, didn't seem necessary to put the pattern in the tool) -standard-nbm-license.txt (contains license that is copied into the built modules, replaces with Apache License Version 2.0) -LICENSE -NOTICE Maybe we could use this as a start for the main repository, polish the tool a little and make a collection of all license headers types in the repository (I assume there'd be a few dozens of them, given any detail in formatting, comment characters, etc. will lead to a different license header type). We could manually review just these collected headers, and then relicense the files with those specific headers that are found to be OK (and discuss those that are not OK, should there be any). Then we would be left with files that don't have a license header (like manifests, form files, etc.), and we could discuss which of them need it and how to check their origin. Any insights/opinions?
   label: code-design
8. This sounds great to me. Let's document this process here: https://cwiki.apache.org/confluence/display/NETBEANS/NetBeans+Transition+Process
9. bq. Let's document this process here: https://cwiki.apache.org/confluence/display/NETBEANS/NetBeans+Transition+Process I think jira tickets would provide more information than the table found there: what tools are used, explanations about exceptions or edge cases, tips and tricks for next time etc. They can be subtasks of this ticket so the overview stays here.
10. **body:** I was trying to look at a tool that would help us categorize licenses in the main sources. The tool is attached in "convert-headers-1.zip". The (current) output is in "categorized-1.zip". It contains 4 kinds of sources: -do-not-have-cddl0: list of files that do not contain string "CDDL" -have-cddl-not-recognized-filetype0: list of files that contain string "CDDL", but the tool cannot (yet) detect the header -lic*: a detected variant of the licence header (normalized - leading comment marks, leading and trailing whitespaces removed, paragraphs joined on one line, copyright years replaced with "<YEARS>"), with a list of files that contain this specific license header -par*: the header above is split by paragraphs, and each unique paragraph gets a "par" file. Seems it may be easier to review the paragraphs rather than the full license headers (which may contain many duplicated text, with just small differences among variants). Currently, the do-not-have-cddl0 list has 14627 files (so we to do some more work to categorize that), the have-cddl-not-recognized-filetype0 has 667 files, there are 155 license header variants, and 132 variants of the license header paragraphs. Any feedback/opinions on this? Does this look like a viable direction?
    label: code-design
11. Excellent, thanks for all the work on this. I think the most important thing from the Apache perspective is that we document this, by means of an issue, so that we have a reference point later -- possibly years from now -- about what steps we took to establish ownership of the donated code. Gj
12. **body:** So, I was looking at (some of) the most commonly used license headers. They are typically like this ("<YEARS>" is automatically added by the attached tool and is supposed to represent a year or a span of years): --- DO NOT ALTER OR REMOVE COPYRIGHT NOTICES OR THIS HEADER. Copyright <YEARS> Oracle and/or its affiliates. All rights reserved. Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners. The contents of this file are subject to the terms of either the GNU General Public License Version 2 only ("GPL") or the Common Development and Distribution License("CDDL") (collectively, the "License"). You may not use this file except in compliance with the License. You can obtain a

copy of the License at http://www.netbeans.org/cddl-gplv2.html or nbbuild/licenses/CDDL-GPL-2-CP. See the License for the specific language governing permissions and limitations under the License. When distributing the software, include this License Header Notice in each file and include the License file at nbbuild/licenses/CDDL-GPL-2-CP. Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the GPL Version 2 section of the License file that accompanied this code. If applicable, add the following below the License Header, with the fields enclosed by brackets [] replaced by your own identifying information: "Portions Copyrighted [year] [name of copyright owner]" Contributor(s): The Original Software is NetBeans. The Initial Developer of the Original Software is Sun Microsystems, Inc. Portions Copyright <YEARS> Sun Microsystems, Inc. All Rights Reserved. If you wish your version of this file to be governed by only the CDDL or only the GPL Version 2, indicate your decision by adding "[Contributor] elects to include this software in this distribution under the [CDDL or GPL Version 2] license." If you do not indicate a single choice of license, a recipient has the option to distribute your version of this file under either the CDDL, the GPL Version 2 or to extend the choice of license to its licensees as provided above. However, if you add GPL Version 2 code and therefore, elected the GPL Version 2 license, then the option applies only if the new code is made subject to such option by the copyright holder. --- Variations I've noted: -the "If you wish..." section moved before "Contributors:" -various whitespace/empty line changes -"Copyright (c) <YEARS> Oracle and/or its affiliates. All rights reserved." instead of "Copyright <YEARS> Oracle and/or its affiliates. All rights reserved." -the "If you wish..." section not included/missing Variants of the Contributors section I've noted: -Portions Copyrighted <YEARS> Sun Microsystems, Inc. -empty section These variations seem minor to me, so if the original text would be OK, the variants should hopefully be OK as well. This should cover headers of files listed in lic10, lic133, lic139, lic23, lic3, lic47, lic52, lic61, lic62, lic68, lic89 from the attached file (converted-1.zip). A header that differs somewhat more is this (e.g. lic145 from the attached file): --- DO NOT ALTER OR REMOVE COPYRIGHT NOTICES OR THIS HEADER. Copyright <YEARS> Sun Microsystems, Inc. All rights reserved. The contents of this file are subject to the terms of either the GNU General Public License Version 2 only ("GPL") or the Common Development and Distribution License("CDDL") (collectively, the "License"). You may not use this file except in compliance with the License. You can obtain a copy of the License at http://www.netbeans.org/cddl-gplv2.html or nbbuild/licenses/CDDL-GPL-2-CP. See the License for the specific language governing permissions and limitations under the License. When distributing the software, include this License Header Notice in each file and include the License file at nbbuild/licenses/CDDL-GPL-2-CP. Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the GPL Version 2 section of the License file that accompanied this code. If applicable, add the following below the License Header, with the fields enclosed by brackets [] replaced by your own identifying information: "Portions Copyrighted [year] [name of copyright owner]" Contributor(s): The Original Software is NetBeans. The Initial Developer of the Original Software is Sun Microsystems, Inc. Portions Copyright <YEARS> Sun Microsystems, Inc. All Rights Reserved. If you wish your version of this file to be governed by only the CDDL or only the GPL Version 2, indicate your decision by adding "[Contributor] elects to include this software in this distribution under the [CDDL or GPL Version 2] license." If you do not indicate a single choice of license, a recipient has the option to distribute your version of this file under either the CDDL, the GPL Version 2 or to extend the choice of license to its licensees as provided above. However, if you add GPL Version 2 code and therefore, elected the GPL Version 2 license, then the option applies only if the new code is made subject to such option by the copyright holder. --- (note the use of "Sun Microsystems" instead of Oracle, and the missing "Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners." section) So, I wonder - are files with these headers (and these variantions) OK to relicense? (There will be some header that differ more, but I guess it might make sense to first cover the easier cases above, which, as far as I can tell, are the majority of the code.)

label: code-design

13. Well, Sun became part of Oracle and, though the Sun licenses should have been relicensed to Oracle, in some cases they weren't. Also, when we were preparing the donation, our approach was to make a 'best effort' in terms of relicensing from Sun to Oracle and from other licenses to Oracle, since the intention of the donation was for everything in the ZIP file that was to form the donation to Apache to be donated to Apache and hence the intention was for everything in the ZIP file to ultimately be relicensed to Apache. I can only speak from the point of view of the intention of the 1st code donation, i.e., the ZIP file that has been donated to Apache -- the intention is for everything in that ZIP file to be donated and hence relicensed to Apache.

14. @Gj I agree. Any file that has the Oracle or Sun original license is part of the donation and should have its license header changed to the standard Apache header.

15. Hi, Knowing the intent of both parties, there is extremely little legal risk to accept the grant. Please accept the grant, that's my recommendation as VP, Legal of the ASF. Sincerely, Chris Mattmann VP, Legal, ASF

16. That is great -- and does it mean that we can simply go ahead and relicense everything to Apache? Or do we need to spend time and resources on re-estebalishing the provenance of each and every individual file first?

17. Accepting a grant doesn't mean relicensing everything to Apache. It means importing the code as-is, without restriction. As to establishing the provenance of code, that is the responsibility of the PMC on any code import (e.g., this was done when I was a PMC member helping to bring Apache OODT in from NASA; with Apache Climate from NASA, etc. etc.) In short, the PMC is responsible for establishing the provenance of the code it manages. So I am basically saying, as VP, Legal, I recommend you accept the code grant/donation. Then, during Incubation, as the PMC, sort through the files, figure out what's what, and proceed without restriction. Thanks, Chris

18. In sorting through the files and doing the relicensing, since it's going to be a very large set of changes, we'd like to do one big merge from a fork. I.e., we propose doing a fork of incubator-netbeans to, for example, github.com/geertjanwielenga, and then doing all the license changes there, after which we'd do one big merge into incubator-netbeans.

19. > ...we propose doing a fork of incubator-netbeans to, for example, github.com/geertjanwielenga, .. Can't you do that in a branch of the ASF repository instead? It's better IMO if things stay here.

23. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/7 I am afraid the license here is a little bit more complex. I think the license is probably BSD, at least based on FindBugs: https://github.com/findbugsproject/findbugs/blob/master/findbugs/licenses/LICENSE-jsr305.txt (Its not clear where the Apache license note comes from, but it is probably not correct.) Also, the file contains some re-packaged annotations from net.jcip.annotations, so these are presumably under: https://github.com/findbugsproject/findbugs/blob/master/findbugs/licenses/LICENSE-jcip.txt So we probably need a license file with these both and maybe even a -notice.txt. The good thing on this particular place is that we only need this file for building. The license file should be present even if the license would be Apache. Otherwise, looks OK.

58. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/13 +1

59. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/14 +1

60. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/6 Matthias, you are an Apache Netbeans committer, right? So you should be able to push this directly to the apache repository (https://git-wip-us.apache.org/repos/asf/incubator-netbeans). (I would suggest to rebase the changes before merging so that there's no actual merge commit, but up to you, I am not a git expert.) Please let me know if you need any help. Thanks for working on this!

61. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/17 Looks OK to me.

62. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/19 Looks OK to me.

63. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/6 @svenreimers @jlahoda thanks for taking time for review! I merged the change into master. I'm manually closing this here, as the merge was done as a fast-forward merge and so no merge commit was created.

64. Github user matthiasblaesing closed the pull request at: https://github.com/apache/incubator-netbeans/pull/6

65. GitHub user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/9 I merged the PR changes into master.

66. Github user emilianbold closed the pull request at: https://github.com/apache/incubator-netbeans/pull/9

67. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 The change looks good. If you squash these three commits together, the two commits efd73df and 863393c will cancel each other out and so only the "real" change remains. This keeps the history clean.
68. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/17 I agree this looks good.
69. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/18 Looks good.
70. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/19 The change looks ok, I'd like to know how this META-INF file is used though.
71. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/19 Looks like a Jackpot hints file. Not sure when it's loaded for tests only though...
72. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/19 Ok - I also did not find out the "why", but indeed the path is read from `org.netbeans.modules.java.hints.declarative.DeclarativeHintRegistry` in the `java.hints.declarative` module. The grammar suggests, that the block comment syntax is correct. Thanks for the hint.
73. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/19 Sorry for now answering sooner. This is a test for "openide.nodes/src/META-INF/upgrade/org.openides.nodes.Node.hint". It is parsed by org.netbeans.modules.java.hints.declarative.test.TestParser.parse, and I believe the parser should ignore everything before the first %%TestCase. (In principle, the tests can be also run when the module tests are run, but I doubt that is configured for the nodes module. So the way to run the test is to open it in the IDE.)

Just so we can add comments?
85. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 +1

86. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/24 I had to touch binaries-list to change it to maven coordinates - so adding the license header was a natural reaction. From my POV there is no gain by removing that header again - do you agree?

87. Github user matthiasblaesing commented on a diff in the pull request: https://github.com/apache/incubator-netbeans/pull/23#discussion_r142002449 --- Diff: db.sql.editor/test/unit/src/org/netbeans/modules/db/sql/editor/completion/SelectCompletionQueryTest.java --- @@ -125,11 +125,11 @@ public void runTest() throws Exception { public void testCompletion() throws Exception { StringBuilder sqlData = new StringBuilder(); - List<String> modelData = new ArrayList<String>(); - BufferedReader reader = new BufferedReader(new InputStreamReader(SelectCompletionQueryTest.class.getResource(getName() + ".test").openStream(), "utf-8")); - try { + List<String> modelData = new ArrayList<>(); + try (InputStream is = SelectCompletionQueryTest.class.getResourceAsStream(getName() + ".test"); + BufferedReader reader = new BufferedReader(new InputStreamReader(is, "utf-8"))) { boolean separatorRead = false; - for (String line; (line = reader.readLine()) != null;) { + for (String line = reader.readLine(); line != null; line = reader.readLine()) { --- End diff -- I consider the previous one less readable. The previous version mixed initialization, loop advance and checking and these parts are now separated into their corresponding sections.

88. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/23 Thanks for looking into this. I let the changed for loop in place and updated the usage of `getResource().openStream()` to `getResourceAsStream`.

89. Github user matthiasblaesing commented on a diff in the pull request: https://github.com/apache/incubator-netbeans/pull/16#discussion_r142002680 --- Diff: db.dataview/test/unit/src/org/netbeans/modules/db/dataview/util/TestCaseDataFactory.java --- @@ -39,11 +39,11 @@ public static String DB_SQLINSERT="dbinsert.sql"; public static String DB_SQLSELECT="dbselect.sql"; public static String DB_SQLUPDATE="dbupdate.sql"; - public static String DB_TEXT= "dbdata.txt"; + public static String DB_DATA= "dbdata.properties"; --- End diff -- It was necessary to make it clear, that dbdata is not a plain text file, but a properties file. Else the next reader wonders why the comment header work correctly or where it gets stipped out. For a properties file this is correct by definition.

90. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 @ebarboni There are two thinks I'd like to ask you: - Adjust your git settings to include a name and update the existing commits (see here: https://www.git-tower.com/learn/git/faq/change-author-name-email) - Rewrite the history to squash the two commit on CLI (for GUI support you need to look into the corresponding GUI): Checkout the branch that backs this PR, run `git rebase -i HEAD~3`, now an editor of your choosing is started, holding one row per commit (and some help info), there you can reorder the commits, remove commits and squash them. (I failed to do that on a checkout from your repository, as git cli requires identity information, that your commits are missing, see above)

91. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/27 Looks good.

92. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/26 Looks good. (there are now two positive reviews on this, as @emilianbold reacted with a thumbs up, which is not converted into a information message)

93. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/28 Looks good. (there are now two positive reviews on this, as @emilianbold reacted with a thumbs up, which is not converted into a information message)

94. Github user emilianbold commented on a diff in the pull request: https://github.com/apache/incubator-netbeans/pull/23#discussion_r142003704 --- Diff: db.sql.editor/test/unit/src/org/netbeans/modules/db/sql/editor/completion/SelectCompletionQueryTest.java --- @@ -125,11 +125,11 @@ public void runTest() throws Exception { public void testCompletion() throws Exception { StringBuilder sqlData = new StringBuilder(); - List<String> modelData = new ArrayList<String>(); - BufferedReader reader = new BufferedReader(new InputStreamReader(SelectCompletionQueryTest.class.getResource(getName() + ".test").openStream(), "utf-8")); - try { + List<String> modelData = new ArrayList<>(); + try (InputStream is = SelectCompletionQueryTest.class.getResourceAsStream(getName() + ".test"); + BufferedReader reader = new BufferedReader(new InputStreamReader(is, "utf-8"))) { boolean separatorRead = false; - for (String line; (line = reader.readLine()) != null;) { + for (String line = reader.readLine(); line != null; line = reader.readLine()) { --- End diff -- I believe the canonical trick is to have ```java String line; while((line = reader.readLine()) != null) { ... } ``` And the original `for` just mixed those to limit the scope of the `line` variable to the `for` block... which is nice. Your `for` repeats the `reader.readLine()` call which seems confusing.

95. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/24 ... unless the central decision will be not to use headers and then your file becomes the only one that has to be manually tweaked back.

96. Github user matthiasblaesing commented on a diff in the pull request: https://github.com/apache/incubator-netbeans/pull/23#discussion_r142003802 --- Diff: db.sql.editor/test/unit/src/org/netbeans/modules/db/sql/editor/completion/SelectCompletionQueryTest.java --- @@ -125,11 +125,11 @@ public void runTest() throws Exception { public void testCompletion() throws Exception { StringBuilder sqlData = new StringBuilder(); - List<String> modelData = new ArrayList<String>(); - BufferedReader reader = new BufferedReader(new InputStreamReader(SelectCompletionQueryTest.class.getResource(getName() + ".test").openStream(), "utf-8")); - try { + List<String> modelData = new ArrayList<>(); + try (InputStream is = SelectCompletionQueryTest.class.getResourceAsStream(getName() + ".test"); + BufferedReader reader = new BufferedReader(new InputStreamReader(is, "utf-8"))) { boolean separatorRead = false; - for (String line; (line = reader.readLine()) != null;) { + for (String line = reader.readLine(); line != null; line = reader.readLine()) { --- End diff -- I'll revert my change to this loop and then push to master.

97. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/24 When that central decision is made, there is already at least one file that has this change already `db/external/binaries-list`. In any case the header is not wrong. The file is part of an apache project and was thus donated by oracle and is now covered by the apache license. If there is a consensus, that the license header is not needed, than it can still be left in place or at that time centrally removed. Till then I consider each file I don't have to discuss about a good file.

98. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/23

99. Github user ebarboni commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 @matthiasblaesing thanks a lot for pointer on rebase. Hope its better now.

100. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 @ebarboni thank you, that looks much cleaner. I have one last point: The commit message should reference the tracking bug. You had that in the PR, but that message does not get merged into the history, so I suggest, that you update the commit message to something like: > [NETBEANS-54] Module Review uihandler > > package.html was not updated by the tools You can do this by switching back to the branch backing the PR, and running `git commit --amend`. You can then change the commit message. This changes the commit itself and then you can do another force push.

101. Github user ebarboni commented on the issue: https://github.com/apache/incubator-netbeans/pull/15 Done

102. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/15

112. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 Please have another look at this: - Please ignore the files covered in th "Problems to be solved centrally" of https://cwiki.apache.org/confluence/display/NETBEANS/List+of+Modules+to+Review. For example the .form files were updated centrally from their corresponding .java files. These changes need to removed from this changeset. I suggest you also remove changes that relate to file in the mentioned section. - the latter change might also fix the changes line endings in build.xml

113. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/32 The changes itself look good. Could you please just adjust your git setttings to contain your name and email address as author (see here: https://www.git-tower.com/learn/git/faq/change-author-name-email).

114. Github user juneau001 commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 Thanks for the feedback and sorry for missing those "Problems to be solved centrally".

115. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/7 Hi Dave, Sorry for belated answer. I think the jcip license text should be merged into the existing -license.txt file. Also the "License: " tag should probably be changed to something else than "New BSD" (e.g. "BSD+jcip"). Even if though this is probably not ever going to be used. For notice - I suspect we will need different notices, one at the top level of the repository for things that are in the repository (which this is not), and a different one for binary builds (where the notice should contain exactly what is in the binary, not more, not less, in other words, this will probably differ between the platform and the Java IDE). And there needs to be enough data to construct such notices automatically, I don't think it is realistic to maintain them manually. Hence the request to add -notice.txt to external binaries if needed, so the build will be able to pick them up if needed. But it is not quite clear to me if anything like that is needed for this library.

116. Github user borxa commented on the issue: https://github.com/apache/incubator-netbeans/pull/32 Settings updated

117. Github user dschoorl commented on the issue: https://github.com/apache/incubator-netbeans/pull/7 Hi Jan, Thanks for reviewing again. In no way, I am a legal expert. But I think that by providing the jcip-license.txt file, we meet the requirements of the license stated in article 4b (https://creativecommons.org/licenses/by/2.5/legalcode) and I think no notice is needed? Why do you think needs the jcip license text be merged in the jsr305 one? I believe this is also not done by the findbugs-community who repackaged it with jsr305.jar. Are these -license.txt files somehow processed automatically and do they need a certain structure, such as having a License-tag? Is that described somewhere?

118. GitHub user junichi11 opened a pull request: https://github.com/apache/incubator-netbeans/pull/36 [NETBEANS-54] Module Review api.xml - no external library - checked Rat report: add the license header in two *.dtd. ignore three package-list[1] files, org-netbeans-api-xml.sig - A unit test fails even if the license header is not added. (ClassNotFoundException: org.apache.crimson.parser.XMLReaderImpl) [1] http://docs.oracle.com/javase/8/docs/technotes/tools/windows/javadoc.html#JSWOR663 You can merge this pull request into a Git repository by running: $ git pull https://github.com/junichi11/incubator-netbeans module-review-api.xml Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/36.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #36 ---- commit d94a8cbde4c1cde564e4635751d1799c76a70718 Author: Junichi Yamamoto <junichi11@apache.org> Date: 2017-10-01T22:22:01Z [NETBEANS-54] Module Review api.xml - no external library - checked Rat report: add the license header in two *.dtd. ignore three package-list files, org-netbeans-api-xml.sig - A unit test fails even if the license header is not added. ----

119. Github user junichi11 commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 #21 was merged. So, it seems that this PR includes the commit for removing the license header for .form files.

120. GitHub user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/7 Description of the current -license.txt processing is here: http://wiki.netbeans.org/DevFaqExternalLibraries I think details under Apache are still somewhat unclear, but I think maintaining -license.txt and -notice.txt (if needed) in the library wrapper near the external library is much more maintainable than trying to have a central registry, and that whatever we do will be based on the current design/state. So, I think it would be good to have things prepared for automatic processing as much as possible. Thanks.

121. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/37 [NETBEANS-54] Module Review editor.lib - no external libraries - checked Rat report: modified license header in src/org/netbeans/editor/BaseKit.java - skimmed through the module, did not notice additional problems You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-editor.lib Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/37.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #37 ---- commit 2993d25f8c12ebf6e2b8ec5bdbe4a1f32e447a0c Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-02T09:47:44Z [NETBEANS-54] Module Review editor.lib - no external libraries - checked Rat report: modified license header in src/org/netbeans/editor/BaseKit.java ----

139. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/40 Looks good.
140. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/41 This is nitpicking but as the target is cleanup I hope you understand: - the license file should match the binary `<binaryname>.zip` should be accompanied by `<binaryname>-icense.txt` in this case `guava-15.0-license.jar` - in the license file the version should be corrected to `15.0` Thanks :-)
141. Github user juneau001 commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 @matthiasblaesing Thanks for the note. Very sorry for causing an issue, I thought that you wanted me to remove the license headers from the .form files, per the "Problems to be solved centrally" of https://cwiki.apache.org/confluence/display/NETBEANS/List+of+Modules+to+Review as I originally had added license headers to these files. I believe that I also should remove the license headers from the project.properties, build.xml, and build-impl.xml since they should also be solved centrally...so I should back out all changes that I made since each of the files was in that list? I appreciate the assistance.
142. Github user junichi11 commented on the issue: https://github.com/apache/incubator-netbeans/pull/41 @matthiasblaesing Thanks for looking at it :) Fixed. I hope that my understanding is correct.

149. GitHub user matthiasblaesing opened a pull request: https://github.com/apache/incubator-netbeans/pull/49 [NETBEANS-54] Add license header to binaries-list Add Apache License header to binaries-list. Excluded from this commit are: - db.sql.visualeditor - libs.felix - libs.jna - libs.jna.platform For these PRs are open, that already add a license header. Apart from the license adding/adaption, there are a few whitespace changes, where the file did not contain a final newline. You can merge this pull request into a Git repository by running: $ git pull https://github.com/matthiasblaesing/incubator-netbeans binaries-list Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/49.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #49 ---- commit f44b0c89e18eb7c4b9d19a924e0fd1344763c3c8 Author: Matthias Bläsing <mblaesing@doppel-helix.eu> Date: 2017-10-03T11:13:11Z [NETBEANS-54] Add license header to binaries-list Add Apache License header to binaries-list. Excluded from this commit are: - db.sql.visualeditor - libs.felix - libs.jna - libs.jna.platform For these PRs are open, that already add a license header. ----
150. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 The problem is that you added the license headers, that conflicted with the central change the @jlahoda kindly did (fixing a great many files). Now your changeset removes these headers again. On github you can see in the "Files changed" section what would happen if your PR is merged and in this case the correct headers are removed for form files. So: - please rebase your changes onto master - please revert your changes to the form files - please also revert the change to genfiles.properties (See: https://github.com/apache/incubator-netbeans/pull/46/commits/40a715ad91e47696a8018c48c7ad091b9c4341ec) as that is a generated file The rest looks good. The whitespace changes in build.xml are the removal of trailing spaces, which I think is ok.
151. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/31 Oh - and no reason for apologies! The work is appreciated.

152. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/32 Thank you - I merged the changes into master with 2 positive reviews. I suggest, that you include the full name into the author field, user names look strange. The merge can be found here: https://github.com/apache/incubator-netbeans/commit/9a152a75f50f53219b3b2669b6ab9e69a9beb1d7 Please close this PR yourself.

183. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/47 Please note that this changes fail the build, because the jar from maven central has a different hash. The hash on the central is: DA3584329A263616E277E15462B387ADDD1B208D I skimmed through the differences, and so far it seems to me it is OK to use the jar from central (we presumably would eventually learn if there would be issues anyway). I can do that tonight, unless someone will do that before.
184. Github user junichi11 commented on the issue: https://github.com/apache/incubator-netbeans/pull/47 @jlahoda I'm sorry... Would you please do that?
185. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/47 You know, I was just thinking how super useful it is to have the hash when switching to Maven Central since at least you know it's the same JAR. How could they differ for the same library?
186. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/55 [NETBEANS-54] Module Review editor.completion - No external libraries. - Updated licenses in apichanges.xml and a Bundle.properties file as per rat report. - Tests passing. No additional problems found. You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-editor.completion Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/55.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #55 ---- commit f300576ecf8f5f2ab99b44c56ca3f088bab8dee1 Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-04T07:52:49Z [NETBEANS-54] Module Review editor.completion - No external libraries. - Updated licenses in apichanges.xml and a Bundle.properties file as per rat report. - Tests passing. No additional problems found. ----
187. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/47 I agree the hash is useful (among other things) to verify that the jar from the central is the same. But it is unfortunately not the same in this case. Seems the jar on hg/binaries is the same as a download from the JSch web page, and the jar on maven central is different. My wild guess is that these have been produced by different build processes and different JDKs.
188. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/56 [NETBEANS-54] Module Review editor.errorstripe - No external binaries. - Updated licenses in two layer.xml files. - Two unit tests failed: org.netbeans.modules.editor.errorstripe.AnnotationViewDataImplTest org.netbeans.modules.editor.errorstripe.AnnotationViewTest - No additional problems found. 306. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 Thank you for looking into this. I disagree with your assessment about the license header for the templates. I draw the line between the template and its result. The template itself is ALv2 licensed, but its intention is to create code and that is not covered by the ALv2 license. So the license header belongs into the template if it does not interfere with the generation process and in the cases of the XML templates all templates were freemarker templates, so the ALv2 header I added is only in the template itself, not in the resulting code. In fact the license for the resulting code comes from the project properties.

338. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/87

339. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/95 The situation is already there. With or without Geertjans work a potential automatic system needs to detect present licenses, and if it decided, that the headers are not needed, they are not wrong either (Asuming they don't break tests/functionality). I don't see why we would rip out license headers, that are correct and don't interfere with functions/tests.

340. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/100 [NETBEANS-54] Module Review languages.yaml - No external libraries. - Added license to l10n.list - Two user-facing small templates without a license. - 94 unit test files without license. As this module is a parser/lexer/scanner for yaml files I think it's safer not to modify these files with license headers. You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-languages.yaml Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/100.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #100 ---- commit d37639b01cdd364c4b725129a820bdca5c45d24f Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-08T17:18:58Z [NETBEANS-54] Module Review languages.yaml - No external libraries. - Added license to l10n.list - Two user-facing small templates without a license. - 94 unit test files without license. As this module is a parser/lexer/scanner for yaml files I think it's safer not to modify these files with license headers. ----

341. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/101 [NETBEANS-54] Module Review libs.jsch.agentproxy - Updated external/binaries-list with maven coordinates. - Added 4 notice.txt files. - The rest of the files have proper Apache licenses. You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-libs.jsch.agentproxy Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/101.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #101 ---- commit b20dfcb99c30ea21db62acdf5fb4159a667346d6 Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-08T17:42:57Z [NETBEANS-54] Module Review libs.jsch.agentproxy - Updated external/binaries-list with maven coordinates. - Added 4 notice.txt files. - The rest of the files have proper Apache licenses. ----

342. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/91

343. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/91 Thank you - I squashed your changes together and added an exclusion in the rat report for the test-data.

344. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/91 Thank you, I'll try to add those test files to the exclusion list myself in future PRs.

345. Github user geertjanw commented on the issue: https://github.com/apache/incubator-netbeans/pull/95 Agree with this, i.e., whether we decide to add them for all of these throughout or not, the fact that these specific ones in this module already have them, now that I've added them manually, shouldn't be a problem and we should merge this PR from my point of view.

346. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/101

347. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/95 @geertjanw please close this PR, the changeset was also part of #96 and the changes are thus merged already.

348. Github user geertjanw commented on the issue: https://github.com/apache/incubator-netbeans/pull/95 OK.

349. Github user geertjanw closed the pull request at: https://github.com/apache/incubator-netbeans/pull/95

350. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/99 I agree - this looks good. I don't own a mac, so it would be good if someone with a mac could give it a spin.

351. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/100 I merged this in a858f131260db819b3c6106d7d97f28bc61fe26d and added 73b9472ea4174da890b03465ed727ac876bc1686 exclusions. Please close this PR.

352. Github user jlahoda commented on the issue: https://github.com/apache/incubator-netbeans/pull/99 I've originally forgot to cleanup the build.xml. I've updated the pull request with the cleanup now.

371. Github user geertjanw commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 Looks great and makes sense not to do anything with that patch and .txt data file. Thanks for this review, great.

372. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/83 Just for the records, the issue is https://issues.apache.org/jira/browse/NETBEANS-81

373. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 Please recheck this as this breaks the build. My local build breaks different than the protocol from travis, but reproducible. To check yourself, please run in the repository: ``` git clean -x -f ant ``` The git clean part removes all files, that are not part of the repository. The downloaded file gets a different name and is can't be made available at build and compile time. Hava a look at project.properties - this should do it: ```diff # This patch file was generated by NetBeans IDE # It uses platform neutral UTF-8 encoding and \n newlines. --- a/libs.xerces/nbproject/project.properties +++ b/libs.xerces/nbproject/project.properties @@ -16,6 +16,6 @@ # under the License. is.autoload=true -release.external/xerces-2.8.0.jar=modules/ext/xerces-2.8.0.jar +release.external/xercesImpl-2.8.0.jar=modules/ext/xerces-2.8.0.jar module.jar.verifylinkageignores=org.apache.xerces.util.XMLCatalogResolver spec.version.base=1.39.0 ```

374. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 Sorry, but this breaks the unittests. In these the CSS structure is parsed and the result is compared with a reference file. I would do this: - revert the changes to the files under `css.lib/test/unit/data` - add an exclusion pattern to the rat report task in the `nbbuild/build.xml` with the pattern `css.lib/test/unit/data/**` with a comment, that these are testdata files It would be nice if you could have another look at this.

375. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 Should be ready now. Sorry for the trouble. It would be nice getting a travis warning in case of build failure.

376. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/112

377. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 @emilianbold @junichi11 given that the html module has a GPLv2/wCPE+CDDL license http://mail-archives.apache.org/mod_mbox/incubator-netbeans-dev/201710.mbox/%3CCAEF8jVfgnfUVAzntSRDYE%2BST%3DwreSced3xJ%2BChBOkdX51ExZJw%40mail.gmail.com%3E does this fix the issues you have with this?

378. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 Your wish was already granted - the travis configuration was added to the repository literally hours ago. That's the reason I saw that. :-)

379. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/115 [NETBEANS-54] Module Review libs.jvyamlb - Version 0.2.7 is not available in maven.central - Downgraded to 0.2.6 to see how it behaves in travis build - See issue #82 https://issues.apache.org/jira/browse/NETBEANS-82 You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-libs.jvyamlb Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/115.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #115 ---- commit 79d0b48ad1ce0d9bfa7086612bf85b5ed9c6fa21 Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-10T20:23:35Z [NETBEANS-54] Module Review libs.jvyamlb - Version 0.2.7 is not available in maven.central - Downgraded to 0.2.6 to see how it behaves in travis build - See issue #82 https://issues.apache.org/jira/browse/NETBEANS-82 ----

380. GitHub user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 It would be nice getting a pair of beers in case of build success! :-D

381. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 @matthiasblaesing: so far I have been excluding template files from Rat. They are user visible as far as I can tell and I don't believe it's good for NetBeans to have that. Maybe there is some flag or something in the non-dev builds that hide the licese... I have yet to see the license header disappear when shown.

382. Github user rosslamont commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 My apologies, I assumed tests were part of the default build. Curious: shouldn't travis be running unit tests and picking that up? I will revert the test changes and look into the rat exclusion.

383. GitHub user vieiro opened a pull request: https://github.com/apache/incubator-netbeans/pull/116 [NETBEANS-54] Module Review libs.smack - Updated maven coordinates. - Passing tests. No license headers missing. - Still awaiting for travis beers. You can merge this pull request into a Git repository by running: $ git pull https://github.com/vieiro/incubator-netbeans netbeans-54-module-review-libs.smack Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/116.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #116 ---- commit 9c7f5bafca84797ae4bc625bf8670ff46e942a3f Author: Antonio Vieiro <antonio@vieiro.net> Date: 2017-10-10T21:13:30Z [NETBEANS-54] Module Review libs.smack - Updated maven coordinates. - Passing tests. No license headers missing. - Still awaiting for travis beers. ----

384. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/116 Note: This project (Apache license) didn't seem to have any notice file.

385. Github user rosslamont commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 Done.

386. Github user rosslamont commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 Sorry - should I also add the patch to the rat exclusions? What would the comment be?

387. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 I get the feeling, that we are running in circles: - Junichi established, that there are templates that already today carry a license header (just the wrong one) (In the IDE Tools -> Templates -> Other -> html, verified in 8.2) - I'm only talking about freemarker templates, that offer the option to add a comment header, that does not go into the resulting file (again, try with the html template, you end up with a file without the GPL+CDDL header). Plaintext templates, that are copied verbatim or just allow text replacement won't be touched by

me. - If a developer looks at the templates he should already now that netbeans is ALv2 licensed, else she/he is not even allowed to have it (at least for Germany no right are granted to third parties by default, so if you assume I gave you no license, you are plainly not allowed to use it) - Having headers makes license review easier - Apart from a feeling no argument was raised against adding the license header, in fact for developers it might be good to get into the habit to "survive" seeing a license.

388. Github user dschoorl commented on the issue: https://github.com/apache/incubator-netbeans/pull/7 I added notice file for jcip-annotations instead of a jcip-license file. I changed the jsr305 license file based on the info in http://wiki.netbeans.org/DevFaqExternalLibraries as pointed out by Jan. Unfortunately, the checksum of the artifact at the maven coordinates differs from the original download. The META-INF says it's build with a different JRE version. I have not thoroughly checked the contents of the maven download.

389. Github user emilianbold commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 I really believe this should be discussed on dev@. There are two email threads, one started by me and one by @junichi11 for mentors (which haven't replied). We are not running in circles, you just want license headers everywhere! There are various types of 'templates': 1. example text displayed to users as preview in Options window and elsewhere 2. freemarker templates used internally and 3. freemarker templates the user is also able to see and edit (eg. Open in Editor for Tools | Templates). The general direction I am using is simple: * if a file has the Oracle template I will replace it, regardless. We'll think of the user-facing impact later. * for templates without an existing Oracle license header, I will not add a license header but exclude it from Rat. The only exception where I would add the license header is category 2 where it is clear the end user does not get to see or edit the template. But we have to prove this for each individual file and it's not really worth the trouble because these templates are simple (not much Intelectual Property, really) and the lack of a license header does not imply Public Domain anyhow (the whole of NetBeans does have a license). I don't think it's up to us to teach developers copyright and patent law. A lot of developers are really clueless about the legal ramifications and they will dislike a lot seeing Apache license headers in "their" code generation pipeline (because, aren't they creating derivative works? Actually, they are!). By the time you have them thinking about this (or, maybe even, ask their own legal counsel) you have already lost a customer.

390. GitHub user juneau001 opened a pull request: https://github.com/apache/incubator-netbeans/pull/117 [NETBEANS-54] Modeule Review j2ee.persistence - JPA external library (Java EE) is used for test entity classes, along with junit - checked Rat report: everything has been relicensed to Apache, included in 'central problems' list above, or excluded via Rat. Did not touch the .pass test files. - skimmed through module, did not notice additional problems You can merge this pull request into a Git repository by running: $ git pull https://github.com/juneau001/incubator-netbeans master Alternatively you can review and apply these changes as the patch at: https://github.com/apache/incubator-netbeans/pull/117.patch To close this pull request, make a commit to your master/trunk branch with (at least) the following in the commit message: This closes #117 ---- commit 1d886fda778315e4c6089ab6c7e5a0d9916f571d Author: Josh Juneau <juneau001@gmail.com> Date: 2017-10-11T03:54:37Z [NETBEANS-54] Modeule Review j2ee.persistence ----

391. 402. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/52

403. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/52 The remarks were fixed (templates lost their headers again) and the result merged into master.

404. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 For the record: The content of the two binaries is identical, the files from maven central and the original netbeans file were zipped with different timestamps and differing directory order. Diffoscope output is here: https://try.diffoscope.org/qayzdzqugqge.html To check yourself: unzip both files and run a recursive diff over it.

405. Github user asfgit closed the pull request at: https://github.com/apache/incubator-netbeans/pull/113

406. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 I squashed your two commits together and merged this.

407. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/113 Thanks Matthias. If you ever happen to visit Madrid you know you have some free beers here.

408. Github user matthiasblaesing commented on the issue: https://github.com/apache/incubator-netbeans/pull/114 Sorry! I overlooked the patch case. I did not know it yet, but you can add comments to diff patches: https://stackoverflow.com/questions/18979120/is-it-possible-to-add-a-comment-to-a-diff-file-unified So I suggest to just add an ALv2 header to the file. With regard to the squash question: Please do so, this way the atomic change is contained in one commit.

409. Github user mcdonnell-john commented on the issue: https://github.com/apache/incubator-netbeans/pull/99 @matthiasblaesing I've checked out the PR and it builds fine on my machine. After running it I've not seen any issues with the menu. Been able to open projects. Look at the about dialog, etc. and in general, all menus seem to be working the same as they do on 8.2. Any specific checks you want me to perform?

410. Github user vieiro commented on the issue: https://github.com/apache/incubator-netbeans/pull/116 Please don't commit yet, I think there's a typo here.

The download binaries task has maven central hard-coded, so the binary won't be found. It works for you (and me), because there are multiple fallbacks: - local maven2 cache ($HOME/.m2/repository) - fallback to load the file from `http://hg.netbeans.org/binaries/` I would not change the binary reference, as currently there is no valuable alternative. And I can support your assessment not to change the binary right now. This makes it clear, that this needs to be tackled later.

536. vieiro commented on issue #172: [NETBEANS-54] Module Review o.apache.xml.resolver URL: https://github.com/apache/incubator-netbeans/pull/172#issuecomment-338665582 Mmm... I think this is a very simple use case that just compiles a jar file, not enough for a generalization?. I think (I'm not sure) there're other use cases where you need to download several (hopefully binary) jar files in order to be able to compile the patched sources. Maybe we want to explore that use case before making a generalization. Cheers, Antonio 2017-10-23 14:56 GMT+02:00 Jaroslav Tulach <notifications@github.com>: > *@JaroslavTulach* commented on this pull request. > ------------------------------ > > In o.apache.xml.resolver/build.xml > <https://github.com/apache/incubator-netbeans/pull/172#discussion_r146254955> > : > > > > + <!-- ... 2. 542. matthiasblaesing opened a new pull request #181: [NETBEANS-54] Module Review libs.osgi (followup) URL: https://github.com/apache/incubator-netbeans/pull/181 Maven central does not hold the original netbeans artifact osgi.cmpn-4.2, but a superset of that: <dependency> <groupId>org.osgi</groupId> <artifactId>org.osgi.compendium</artifactId> <version>4.2.0</version> </dependency> That artifact holds not only the compiled binaries, but also the java sources in a subfolder "OSGI-OPT". To get the original netbeans file, the jar is repacked and the folder is stripped. The resulting zip is not identical to the original binary, but the difference is in the zip structure, after expanding the original contents and the new file are identical. This PR is a followup for #104 which introduced a maven coordinate, that can't be satisfied from maven central. There are newer osgi compendium jar on maven central and it looks as if at least 4.3.1 would also work, but updating libraries should be a separate task from this cleanup task. This approach was inspired by @vieiro who first came up with building modified binaries for maven sources. @geertjanw could you please have a look at this and see if it works for you? --- This is an automated message from the Apache Git Service. 557. jlahoda commented on issue #183: [NETBEANS-54] Module Review net.java.html URL: https://github.com/apache/incubator-netbeans/pull/183#issuecomment-338953182 I am sorry, but Jarda sent a pull request this morning changing the Html4J binaries for version 1.5, which is Apache licensed. I am also prototyping a change that is adding the Apache licenses with the appropriate headers, so the licenses are accounted properly. So my suggestion would be not to add this license file. -- This is an automated message from the Apache Git Service. 559. arusinha closed pull request #183: [NETBEANS-54] Module Review net.java.html URL: https://github.com/apache/incubator-netbeans/pull/183 This is a PR merged from a forked repository. As GitHub hides the original diff on merge, it is displayed below for the sake of provenance: As this is a foreign pull request (from a fork), the diff is supplied below (as it won't show otherwise due to GitHub magic): diff --git a/net.java.html/external/net.java.html-1.4-license.txt b/net.java.html/external/net.java.html-1.4-license.txt new file mode 100644 index 000000000..3ea3c261f --- /dev/null +++ b/net.java.html/external/net.java.html-1.4-license.txt @@ -0,0 +1,827 @@ + +COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0 + +1. Definitions. + +1.1. "Contributor" means each individual or entity that +creates or contributes to the creation of Modifications. + +1.2. "Contributor Version" means the combination of the +Original Software, prior Modifications used by a +Contributor (if any), and the Modifications made by that +particular Contributor. + +1.3. "Covered Software" means (a) the Original Software, or +(b) Modifications, or (c) the combination of files +containing Original Software with files containing +Modifications, in each case including portions thereof. + +1.4. "Executable" means the Covered Software in any form +other than Source Code. + +1.5. "Initial Developer" means the individual or entity +that first makes Original Software available under this +License. + +1.6. "Larger Work" means a work which combines Covered +Software or portions thereof with code not governed by the +terms of this License. + +1.7. "License" means this document. + +1.8. "Licensable" means having the right to grant, to the +maximum extent possible, whether at the time of the initial +grant or subsequently acquired, any and all of the rights +conveyed herein. + +1.9. "Modifications" means the Source Code and Executable +form of any of the following: + +A. Any file that results from an addition to, +deletion from or modification of the contents of a +file containing Original Software or previous +Modifications; + +B. Any new file that contains any part of the +Original Software or previous Modification; or + +C. Any new file that is contributed or otherwise made +available under the terms of this License. + +1.10. "Original Software" means the Source Code and +Executable form of computer software code that is +originally released under this License. + +1.11. "Patent Claims" means any patent claim(s), now owned +or hereafter acquired, including without limitation, +method, process, and apparatus claims, in any patent +Licensable by grantor. + +1.12. "Source Code" means (a) the common form of computer +software code in which modifications are made and (b) +associated documentation included in or with such code. + +1.13. "You" (or "Your") means an individual or a legal +entity exercising rights under, and complying with all of +the terms of, this License. For legal entities, "You" +includes any entity which controls, is controlled by, or is +under common control with You. For purposes of this +definition, "control" means (a) the power, direct or +indirect, to cause the direction or management of such +entity, whether by contract or otherwise, or (b) ownership +of more than fifty percent (50%) of the outstanding shares +or beneficial ownership of such entity. + +2. License Grants. + +2.1. The Initial Developer Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, the +Initial Developer hereby grants You a world-wide, +royalty-free, non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Initial Developer, +to use, reproduce, modify, display, perform, +sublicense and distribute the Original Software (or +portions thereof), with or without Modifications, +and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using or selling of Original Software, to make, have +made, use, practice, sell, and offer for sale, and/or +otherwise dispose of the Original Software (or +portions thereof). + +(c) The licenses granted in Sections 2.1(a) and (b) +are effective on the date Initial Developer first +distributes or otherwise makes the Original Software +available to a third party under the terms of this +License. + +(d) Notwithstanding Section 2.1(b) above, no patent +license is granted: (1) for code that You delete from +the Original Software, or (2) for infringements +caused by: (i) the modification of the Original +Software, or (ii) the combination of the Original +Software with other software or devices. + +2.2. Contributor Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, each +Contributor hereby grants You a world-wide, royalty-free, +non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Contributor to +use, reproduce, modify, display, perform, sublicense +and distribute the Modifications created by such +Contributor (or portions thereof), either on an +unmodified basis, with other Modifications, as +Covered Software and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using, or selling of Modifications made by that +Contributor either alone and/or in combination with +its Contributor Version (or portions of such +combination), to make, use, sell, offer for sale, +have made, and/or otherwise dispose of: (1) +Modifications made by that Contributor (or portions +thereof); and (2) the combination of Modifications +made by that Contributor with its Contributor Version +(or portions of such combination). + +(c) The licenses granted in Sections 2.2(a) and +2.2(b) are effective on the date Contributor first +distributes or otherwise makes the Modifications +available to a third party. + +(d) Notwithstanding Section 2.2(b) above, no patent +license is granted: (1) for any code that Contributor +has deleted from the Contributor Version; (2) for +infringements caused by: (i) third party +modifications of Contributor Version, or (ii) the +combination of Modifications made by that Contributor +with other software (except as part of the +Contributor Version) or other devices; or (3) under +Patent Claims infringed by Covered Software in the +absence of Modifications made by that Contributor. + +3. Distribution Obligations. + +3.1. Availability of Source Code. + +Any Covered Software that You distribute or otherwise make +available in Executable form must also be made available in +Source Code form and that Source Code form must be +distributed only under the terms of this License. You must +include a copy of this License with every copy of the +Source Code form of the Covered Software You distribute or +otherwise make available. You must inform recipients of any +such Covered Software in Executable form as to how they can +obtain such Covered Software in Source Code form in a +reasonable manner on or through a medium customarily used +for software exchange. + +3.2. Modifications. + +The Modifications that You create or to which You +contribute are governed by the terms of this License. You +represent that You believe Your Modifications are Your +original creation(s) and/or You have sufficient rights to +grant the rights conveyed by this License. + +3.3. Required Notices. + +You must include a notice in each of Your Modifications +that identifies You as the Contributor of the Modification. +You may not remove or alter any copyright, patent or +trademark notices contained within the Covered Software, or +any notices of licensing or any descriptive text giving +attribution to any Contributor or the Initial Developer. + +3.4. Application of Additional Terms. + +You may not offer or impose any terms on any Covered +Software in Source Code form that alters or restricts the +applicable version of this License or the recipients' +rights hereunder. You may choose to offer, and to charge a +fee for, warranty, support, indemnity or liability +obligations to one or more recipients of Covered Software. +However, you may do so only on Your own behalf, and not on +behalf of the Initial Developer or any Contributor. You +must make it absolutely clear that any such warranty, +support, indemnity or liability obligation is offered by +You alone, and You hereby agree to indemnify the Initial +Developer and every Contributor for any liability incurred +by the Initial Developer or such Contributor as a result of +warranty, support, indemnity or liability terms You offer. + +3.5. Distribution of Executable Versions. + +You may distribute the Executable form of the Covered +Software under the terms of this License or under the terms +of a license of Your choice, which may contain terms +different from this License, provided that You are in +compliance with the terms of this License and that the +license for the Executable form does not attempt to limit +or alter the recipient's rights in the Source Code form +from the rights set forth in this License. If You

+distribute the Covered Software in Executable form under a +different license, You must make it absolutely clear that +any terms which differ from this License are offered by You +alone, not by the Initial Developer or Contributor. You +hereby agree to indemnify the Initial Developer and every +Contributor for any liability incurred by the Initial +Developer or such Contributor as a result of any such terms +You offer. + +3.6. Larger Works. + +You may create a Larger Work by combining Covered Software +with other code not governed by the terms of this License +and distribute the Larger Work as a single product. In such +a case, You must make sure the requirements of this License +are fulfilled for the Covered Software. + +4. Versions of the License. + +4.1. New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license steward. + +4.3. Modified Versions. +

+When You are an Initial Developer and You want to create a +new license for Your Original Software, You may create and +use a modified version of this License if You: (a) rename +the license and remove any references to the name of the +license steward (except to note that the license differs +from this License); and (b) otherwise make it clear that +the license contains terms which differ from this License. + +5. DISCLAIMER OF WARRANTY. + +COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" +BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, +INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED +SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR +PURPOSE OR NON-INFRINGING. THE ENTIRE RISK AS TO THE QUALITY AND +PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY +COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE +INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF +ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF +WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF +ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS +DISCLAIMER. + +6. TERMINATION. + +6.1. This License and the rights granted hereunder will +terminate automatically if You fail to comply with terms +herein and fail to cure such breach within 30 days of +becoming aware of the breach. Provisions which, by their +nature, must remain in effect beyond the termination of +this License shall survive. + +6.2. If You assert a patent infringement claim (excluding +declaratory judgment actions) against Initial Developer or +a Contributor (the Initial Developer or Contributor against +whom You assert such claim is referred to as "Participant") +alleging that the Participant Software (meaning the +Contributor Version where the Participant is a Contributor +or the Original Software where the Participant is the +Initial Developer) directly or indirectly infringes any +patent, then any and all rights granted directly or +indirectly to You by such Participant, the Initial +Developer (if the Initial Developer is not the Participant) +and all Contributors under Sections 2.1 and/or 2.2 of this +License shall, upon 60 days notice from Participant +terminate prospectively and automatically at the expiration +of such 60 day notice period, unless if within such 60 day +period You withdraw Your claim with respect to the +Participant Software against such Participant either +unilaterally or pursuant to a written agreement with +Participant. + +6.3. If You assert a patent infringement claim against +Participant alleging that the Participant Software directly +or indirectly infringes any patent where such claim is +resolved (such as by license or settlement) prior to the +initiation of patent infringement litigation, then the +reasonable value of the licenses granted by such Participant +under Sections 2.1 or 2.2 shall be taken into account in +determining the amount or value of any payment or license. + +6.4. In the event of termination under Sections 6.1 or 6.2 +above, all end user licenses that have been validly granted +by You or any distributor hereunder prior to termination +(excluding licenses granted to You by any distributor) +shall survive termination. + +7. LIMITATION OF LIABILITY. + +UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT +(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE +INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF +COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE +LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR +CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT +LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK +STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER +COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN +INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF +LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL +INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT +APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO +NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR +CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT +APPLY TO YOU. + +8. U.S. GOVERNMENT END USERS. + +The Covered Software is a "commercial item," as that term is +defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial +computer software" (as that term is defined at 48 C.F.R. +ยง 252.227-7014(a)(1)) and "commercial computer software +documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. +1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 +through 227.7202-4 (June 1995), all U.S. Government End Users +acquire Covered Software with only those rights set forth herein. +This U.S. Government Rights clause is in lieu of, and supersedes, +any other FAR, DFAR, or other clause or provision that addresses +Government rights in computer software under this License. + +9. MISCELLANEOUS. + +This License represents the complete agreement concerning subject +matter hereof. If any provision of this License is held to be +unenforceable, such provision shall be reformed only to the +extent necessary to make it enforceable. This License shall be +governed by the law of the jurisdiction specified in a notice +contained within the Original Software (except to the extent +applicable law, if any, provides otherwise), excluding such +jurisdiction's conflict-of-law provisions. Any litigation +relating to this License shall be subject to the jurisdiction of +the courts located in the jurisdiction and venue specified in a +notice contained within the Original Software, with the losing +party responsible for costs, including, without limitation, court +costs and reasonable attorneys' fees and expenses. The +application of the United Nations Convention on Contracts for the +International Sale of Goods is expressly excluded. Any law or +regulation which provides that the language of a contract shall +be construed against the drafter shall not apply to this License. +You agree that You alone are responsible for compliance with the +United States export administration regulations (and the export +control laws and regulation of any other countries) when You use, +distribute or otherwise make available any Covered Software. + +10. RESPONSIBILITY FOR CLAIMS. + +As between Initial Developer and the Contributors, each party is +responsible for claims and damages arising, directly or +indirectly, out of its utilization of rights under this License +and You agree to work with Initial Developer and Contributors to +distribute such responsibility on an equitable basis. Nothing +herein is intended or shall be deemed to constitute any admission +of liability. + +NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND +DISTRIBUTION LICENSE (CDDL) + +The code released under the CDDL shall be governed by the laws +of the State of California (excluding conflict-of-law provisions). +Any litigation relating to this License shall be subject to the +jurisdiction of the Federal Courts of the Northern District of +California and the state courts of the State of California, with +venue lying in Santa Clara County, California. + + +The GNU General Public License (GPL) +Version 2, June 1991 + + Copyright (C) 1989, 1991 Free Software Foundation, Inc. + 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA + Everyone is permitted to copy and distribute verbatim + copies of this license document, but changing it is not + allowed. + + Preamble + +The licenses for most software are designed to take away +your freedom to share and change it. By contrast, the GNU +General Public License is intended to guarantee your freedom +to share and change free software--to make sure the software +is free for all its users. This General Public License +applies to most of the Free Software Foundation's software +and to any other program whose authors commit to using it. +(Some other Free Software Foundation software is covered by +the GNU Library General Public License instead.) You can +apply it to your programs, too. + +When we speak of free software, we are referring to freedom, +not price. Our General Public Licenses are designed to make +sure that you have the freedom to distribute copies of free +software (and charge for this service if you wish), that you +receive source code or can get it if you want it, that you +can change the software or use pieces of it in new free +programs; and that you know you can do these things. + +To protect your rights, we need to make restrictions that +forbid anyone to deny you these rights or to ask you to +surrender the rights. These restrictions translate to +certain responsibilities for you if you distribute copies of +the software, or if you modify it. + +For example, if you distribute copies of such a program, +whether gratis or for a fee, you must give the recipients +all the rights that you have. You must make sure that they, +too, receive or can get the source code. And you must show +them these terms so they know their rights. + +We protect your rights with two steps: (1) copyright the +software, and (2) offer you this license which gives you +legal permission to copy, distribute and/or modify the +software. + +Also, for each author's protection and ours, we want to make +certain that everyone understands that there is no warranty +for this free software. If the software is modified by +someone else and passed on, we want its recipients to know +that what they have is not the original, so that any +problems introduced by others will not reflect on the +original authors' reputations. + +Finally, any free program is threatened constantly by +software patents. We wish to avoid the danger that +redistributors of a free program will individually obtain +patent licenses, in effect making the program proprietary. +To prevent this, we have made it clear that any patent must +be licensed for everyone's free use or not licensed at all. + +The precise terms and conditions for copying, distribution +and modification follow. + +TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND +MODIFICATION + +0. This License applies to any program or other work which +contains a notice placed by the copyright holder saying it +may be distributed under the terms of this General Public +License. The "Program", below, refers to any such program +or work, and a "work based on the Program" means either the +Program or any derivative work under copyright law: that is +to say, a work containing the Program or a portion of it, +either verbatim or with modifications and/or translated into +another language. (Hereinafter, translation is included +without limitation in the term "modification".) Each +licensee is addressed as "you". + +Activities other than copying, distribution and modification +are not covered by this License; they are outside its scope. +The act of running the Program is not restricted, and the +output from the Program is covered only if its contents +constitute a work based on the Program (independent of +having been made by running the Program). Whether that is +true depends on what the Program does. + +1. You may copy and distribute verbatim copies of the +Program's source code as you receive it, in any medium, +provided that you

conspicuously and appropriately publish on +each copy an appropriate copyright notice and disclaimer of +warranty; keep intact all the notices that refer to this +License and to the absence of any warranty; and give any +other recipients of the Program a copy of this License along +with the Program. + +You may charge a fee for the physical act of transferring a +copy, and you may at your option offer warranty protection +in exchange for a fee. + +2. You may modify your copy or copies of the Program or any +portion of it, thus forming a work based on the Program, and +copy and distribute such modifications or work under the +terms of Section 1 above, provided that you also meet all of +these conditions: + + a) You must cause the modified files to carry prominent + notices stating that you changed the files and the date + of any change. + + b) You must cause any work that you distribute or + publish, that in whole or in part contains or is derived + from the Program or any part thereof, to be licensed as + a whole at no charge to all third parties under the + terms of this License. + + c) If the modified program normally reads commands + interactively when run, you must cause it, when started + running for such interactive use in the most ordinary + way, to print or display an announcement including an + appropriate copyright notice and a notice that there is + no warranty (or else, saying that you provide a + warranty) and that users may redistribute the program + under these conditions, and telling the user how to view + a copy of this License. (Exception: if the Program + itself is interactive but does not normally print such + an announcement, your work based on the Program is not + required to print an announcement.) + +These requirements apply to the modified work as a whole. If +identifiable sections of that work are not derived from the +Program, and can be reasonably considered independent and +separate works in themselves, then this License, and its +terms, do not apply to those sections when you distribute +them as separate works. But when you distribute the same +sections as part of a whole which is a work based on the +Program, the distribution of the whole must be on the terms +of this License, whose permissions for other licensees +extend to the entire whole, and thus to each and every part +regardless of who wrote it. + +Thus, it is not the intent of this section to claim rights +or contest your rights to work written entirely by you; +rather, the intent is to exercise the right to control the +distribution of derivative or collective works based on the +Program. + +In addition, mere aggregation of another work not based on +the Program with the Program (or with a work based on the +Program) on a volume of a storage or distribution medium +does not bring the other work under the scope of this +License. + +3. You may copy and distribute the Program (or a work based +on it, under Section 2) in object code or executable form +under the terms of Sections 1 and 2 above provided that you +also do one of the following: + + a) Accompany it with the complete corresponding + machine-readable source code, which must be distributed + under the terms of Sections 1 and 2 above on a medium + customarily used for software interchange; or, + + b) Accompany it with a written offer, valid for at least + three years, to give any third party, for a charge no + more than your cost of physically performing source + distribution, a complete machine-readable copy of the + corresponding source code, to be distributed under the + terms of Sections 1 and 2 above on a medium customarily + used for software interchange; or, + + c) Accompany it with the information you received as to + the offer to distribute corresponding source code. (This + alternative is allowed only for noncommercial + distribution and only if you received the program in + object code or executable form with such an offer, in + accord with Subsection b above.) + +The source code for a work means the preferred form of the +work for making modifications to it. For an executable work, +complete source code means all the source code for all +modules it contains, plus any associated interface +definition files, plus the scripts used to control +compilation and installation of the executable. However, as +a special exception, the source code distributed need not +include anything that is normally distributed (in either +source or binary form) with the major components (compiler, +kernel, and so on) of the operating system on which the +executable runs, unless that component itself accompanies +the executable. + +If distribution of executable or object code is made by +offering access to copy from a designated place, then +offering equivalent access to copy the source code from the +same place counts as distribution of the source code, even +though third parties are not compelled to copy the source +along with the object code. + +4. You may not copy, modify, sublicense, or distribute the +Program except as expressly provided under this License. Any +attempt otherwise to copy, modify, sublicense or distribute +the Program is void, and will automatically terminate your +rights under this License. However, parties who have +received copies, or rights, from you under this License will +not have their licenses terminated so long as such parties +remain in full compliance. + +5. You are not required to accept this License, since you +have not signed it. However, nothing else grants you +permission to modify or distribute the Program or its +derivative works. These actions are prohibited by law if you +do not accept this License. Therefore, by modifying or +distributing the Program (or any work based on the Program), +you indicate your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices. Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the +sharing and reuse of software generally. + +NO WARRANTY + +11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS +NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY +APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE +COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM +"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR +IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED +WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR +PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE +OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE +DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, +REPAIR OR CORRECTION. + +12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED +TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY +WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED +ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, +SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF +THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT +LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR +LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE +PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH +HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF +SUCH DAMAGES. + + END OF TERMS AND CONDITIONS + + How to Apply These Terms to Your New Programs + +If you develop a new program, and you want it to be of the +greatest possible use to the public, the best way to achieve +this is to make it free software which everyone can +redistribute and change under these terms. + +To do so, attach the following notices to the program. It is +safest to attach them to the start of each source file to +most effectively convey the exclusion of warranty; and each +file should have at least the "copyright" line and a pointer +to where the full notice is found. + + One line to give the program's name and a brief idea of + what it does. Copyright (C) <year> <name of author> + + This program is free software; you can redistribute it + and/or modify it under the terms of the GNU General + Public License as published by the Free Software + Foundation; either version 2 of the License, or (at your + option) any later version. + + This program is distributed in the hope that it will be + useful, but WITHOUT ANY WARRANTY; without even the + implied warranty of MERCHANTABILITY or FITNESS FOR A + PARTICULAR PURPOSE. See the GNU General Public License + for more details. + + You should have received a copy of the GNU General + Public License along with this program; if not, write to + the Free Software Foundation, Inc., 59 Temple Place, + Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and +paper mail. + +If the program is interactive, make it output a short notice +like this when it starts in an interactive mode: + + Gnomovision version 69, Copyright (C) year name of + author Gnomovision comes with ABSOLUTELY NO WARRANTY; + for details type `show w'. This is free software, and + you are welcome to redistribute it under certain + conditions; type `show c' for details. + +The hypothetical commands `show w' and `show c' should show +the appropriate parts of the General Public License. Of +course, the commands you use may be called something other +than `show w' and `show c'; they could even be mouse-clicks +or menu items-- whatever suits your program. + +You should also get your employer (if you work as a +programmer) or your school, if any, to sign a "copyright +disclaimer" for the program, if necessary. Here is a sample; +alter the names: + + Yoyodyne, Inc., hereby disclaims all copyright interest in + the program `Gnomovision' (which

makes passes at + compilers) written by James Hacker. + + signature of Ty Coon, 1 April 1989 + Ty Coon, President of Vice + +This General Public License does not permit incorporating +your program into proprietary programs. If your program is a +subroutine library, you may consider it more useful to +permit linking proprietary applications with the library. If +this is what you want to do, use the GNU Library General +Public License instead of this License. + + +"CLASSPATH" EXCEPTION TO THE GPL VERSION 2 + + +Certain source files distributed by Sun Microsystems, Inc. +are subject to the following clarification and special +exception to the GPL Version 2, but only where Sun has expressly +included in the particular source file's header the words +"Sun designates this particular file as subject to the +"Classpath" exception as provided by Sun in the License file +that accompanied this code." + +Linking this library statically or dynamically with other +modules is making a combined work based on this library. +Thus, the terms and conditions of the GNU General Public +License Version 2 cover the whole combination. + +As a special exception, the copyright holders of this +library give you permission to link this library with +independent modules to produce an executable, regardless of +the license terms of these independent modules, and to copy +and distribute the resulting executable under terms of your +choice, provided that you also meet, for each linked +independent module, the terms and conditions of the license +of that module. An independent module is a module which is +not derived from or based on this library. If you modify +this library, you may extend this exception to your version +of the library, but you are not obligated to do so. If you +do not wish to do so, delete this exception statement from +your version. -- This is an automated message from the Apache Git Service. "You" (or "Your") means an individual or a legal +entity exercising rights under, and complying with all of +the terms of, this License. For legal entities, "You" +includes any entity which controls, is controlled by, or is +under common control with You. For purposes of this +definition, "control" means (a) the power, direct or +indirect, to cause the direction or management of such +entity, whether by contract or otherwise, or (b) ownership +of more than fifty percent (50%) of the outstanding shares +or beneficial ownership of such entity. + +2. License Grants. + +2.1. The Initial Developer Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, the +Initial Developer hereby grants You a world-wide, +royalty-free, non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Initial Developer, +to use, reproduce, modify, display, perform, +sublicense and distribute the Original Software (or +portions thereof), with or without Modifications, +and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using or selling of Original Software, to make, have +made, use, practice, sell, and offer for sale, and/or +otherwise dispose of the Original Software (or portions thereof). + +(c) The licenses granted in Sections 2.1(a) and (b) +are effective on the date Initial Developer first +distributes or otherwise makes the Original Software +available to a third party under the terms of this +License. + +(d) Notwithstanding Section 2.1(b) above, no patent +license is granted: (1) for code that You delete from +the Original Software, or (2) for infringements +caused by: (i) the modification of the Original +Software, or (ii) the combination of the Original +Software with other software or devices. + +2.2. Contributor Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, each +Contributor hereby grants You a world-wide, royalty-free, +non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Contributor to +use, reproduce, modify, display, perform, sublicense +and distribute the Modifications created by such +Contributor (or portions thereof), either on an +unmodified basis, with other Modifications, as +Covered Software and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using, or selling of Modifications made by that +Contributor either alone and/or in combination with +its Contributor Version (or portions of such +combination), to make, use, sell, offer for sale, +have made, and/or otherwise dispose of: (1) +Modifications made by that Contributor (or +portions thereof); and (2) the combination of Modifications +made by that Contributor with its Contributor Version +(or portions of such combination). + +(c) The licenses granted in Sections 2.2(a) and +2.2(b) are effective on the date Contributor first +distributes or otherwise makes the Modifications +available to a third party. + +(d) Notwithstanding Section 2.2(b) above, no patent +license is granted: (1) for any code that Contributor +has deleted from the Contributor Version; (2) for +infringements caused by: (i) third party +modifications of Contributor Version, or (ii) the +combination of Modifications made by that +Contributor with other software (except as part of the +Contributor Version) or other devices; or (3) under +Patent Claims infringed by Covered Software in the +absence of Modifications made by that Contributor. + +3. Distribution Obligations. + +3.1. Availability of Source Code. + +Any Covered Software that You distribute or otherwise make +available in Executable form must also be made available in +Source Code form and that Source Code form must be +distributed only under the terms of this License. You must +include a copy of this License with every copy of the +Source Code form of the Covered Software You distribute +or +otherwise make available. You must inform recipients of any +such Covered Software in Executable form as to how they can +obtain such Covered Software in Source Code form in a +reasonable manner on or through a medium customarily used +for software exchange. + +3.2. Modifications. + +The Modifications that You create or to which You +contribute are governed by the terms of this License. You +represent that You believe Your Modifications are Your +original creation(s) and/or You have sufficient rights to +grant the rights conveyed by this License. + +3.3. Required Notices. + +You must include a notice in each of Your Modifications +that identifies You as the Contributor of the Modification. +You may not remove or alter any copyright, patent or +trademark notices contained within the Covered Software, or +any notices of licensing or any descriptive text giving +attribution to any Contributor or the Initial Developer. + +3.4. Application of Additional Terms. + +You may not offer or impose any terms on any Covered +Software in Source Code form that alters or restricts the +applicable version of this License or the recipients' +rights hereunder. You may choose to offer, and to charge a +fee for, warranty, support, indemnity or liability +obligations to one or more recipients of Covered Software. +However, you may do so only on Your own behalf, and not on +behalf of the Initial Developer or any Contributor. You +must make it absolutely clear that any such warranty, +support, indemnity or liability obligation is offered by +You alone, and You hereby agree to indemnify the Initial +Developer and every Contributor for any liability incurred +by the Initial Developer or such Contributor as a result of +warranty, support, indemnity or liability terms You offer. + +3.5. Distribution of Executable Versions. + +You may distribute the Executable form of the Covered +Software under the terms of this License or under the terms +of a license of Your choice, which may contain terms +different from this License, provided that You are in +compliance with the terms of this License and that the +license for the Executable form does not attempt to limit +or alter the recipient's rights in the Source Code form +from the rights set forth in this License. If You +distribute the Covered Software in Executable form under a +different license, You must make it absolutely clear that +any terms which differ from this License are offered by You +alone, not by the Initial Developer or Contributor. You +hereby agree to indemnify the Initial Developer and every +Contributor for any liability incurred by the Initial +Developer or such Contributor as a result of any such terms +You offer. + +3.6. Larger Works. + +You may create a Larger Work by combining Covered Software +with other code not governed by the terms of this License +and distribute the Larger Work as a single product. In such +a case, You must make sure the requirements of this License +are fulfilled for the Covered Software. + +4. Versions of the License. + +4.1. New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license

considered independent and +separate works in themselves, then this License, and its +terms, do not apply to those sections when you distribute +them as separate works. But when you distribute the same +sections as part of a whole which is a work based on the +Program, the distribution of the whole must be on the terms +of this License, whose permissions for other licensees +extend to the entire whole, and thus to each and every part +regardless of who wrote it. + +Thus, it is not the intent of this section to claim rights +or contest your rights to work written entirely by you; +rather, the intent is to exercise the right to control the +distribution of derivative or collective works based on the +Program. + +In addition, mere aggregation of another work not based on +the Program with the Program (or with a work based on the +Program) on a volume of a storage or distribution medium +does not bring the other work under the scope of this +License. + +3. You may copy and distribute the Program (or a work based +on it, under Section 2) in object code or executable form +under the terms of Sections 1 and 2 above provided that you +also do one of the following: + + a) Accompany it with the complete corresponding + machine-readable source code, which must be distributed + under the terms of Sections 1 and 2 above on a medium + customarily used for software interchange; or, + + b) Accompany it with a written offer, valid for at least + three years, to give any third party, for a charge no + more than your cost of physically performing source + distribution, a complete machine-readable copy of the + corresponding source code, to be distributed under the + terms of Sections 1 and 2 above on a medium customarily + used for software interchange; or, + + c) Accompany it with the information you received as to + the offer to distribute corresponding source code. (This + alternative is allowed only for noncommercial + distribution and only if you received the program in + object code or executable form with such an offer, in + accord with Subsection b above.) + +The source code for a work means the preferred form of the +work for making modifications to it. For an executable work, +complete source code means all the source code for all +modules it contains, plus any associated interface +definition files, plus the scripts used to control +compilation and installation of the executable. However, as +a special exception, the source code distributed need not +include anything that is normally distributed (in either +source or binary form) with the major components (compiler, +kernel, and so on) of the operating system on which the +executable runs, unless that component itself accompanies +the executable. + +If distribution of executable or object code is made by +offering access to copy from a designated place, then +offering equivalent access to copy the source code from the +same place counts as distribution of the source code, even +though third parties are not compelled to copy the source +along with the object code. + +4. You may not copy, modify, sublicense, or distribute the +Program except as expressly provided under this License. Any +attempt otherwise to copy, modify, sublicense or distribute +the Program is void, and will automatically terminate your +rights under this License. However, parties who have +received copies, or rights, from you under this License will +not have their licenses terminated so long as such parties +remain in full compliance. + +5. You are not required to accept this License, since you +have not signed it. However, nothing else grants you +permission to modify or distribute the Program or its +derivative works. These actions are prohibited by law if you +do not accept this License. Therefore, by modifying or +distributing the Program (or any work based on the Program), +you indicate your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices. Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the +sharing and reuse of software generally. + +NO WARRANTY + +11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS +NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY +APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE +COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM +"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR +IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED +WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR +PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE +OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE +DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, +REPAIR OR CORRECTION. + +12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED +TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY +WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED +ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, +SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF +THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT +LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR +LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE +PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH +HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF +SUCH DAMAGES. + + END OF TERMS AND CONDITIONS + + How to Apply These Terms to Your New Programs + +If you develop a new program, and you want it to be of the +greatest possible use to the public, the best way to achieve +this is to make it free software which everyone can +redistribute and change under these terms. + +To do so, attach the following notices to the program. It is +safest to attach them to the start of each source file to +most effectively convey the exclusion of warranty; and each +file should have at least the "copyright" line and a pointer +to where the full notice is found. + + One line to give the program's name and a brief idea of + what it does. For purposes of this +definition, "control" means (a) the power, direct or +indirect, to cause the direction or management of such +entity, whether by contract or otherwise, or (b) ownership +of more than fifty percent (50%) of the outstanding shares +or beneficial ownership of such entity. + +2. License Grants. + +2.1. The Initial Developer Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, the +Initial Developer hereby grants You a world-wide, +royalty-free, non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Initial Developer, +to use, reproduce, modify, display, perform, +sublicense and distribute the Original Software (or +portions thereof), with or without Modifications, +and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using or selling of Original Software, to make, have +made, use, practice, sell, and offer for sale, and/or +otherwise dispose of the Original Software (or +portions thereof). + +(c) The licenses granted in Sections 2.1(a) and (b) +are effective on the date Initial Developer first +distributes or otherwise makes the Original Software +available to a third party under the terms of this +License. + +(d) Notwithstanding Section 2.1(b) above, no patent +license is granted: (1) for code that You delete from +the Original Software, or (2) for infringements +caused by: (i) the modification of the Original +Software, or (ii) the combination of the Original +Software with other software or devices. + +2.2. Contributor Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, each +Contributor hereby grants You a world-wide, royalty-free, +non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Contributor to +use, reproduce, modify, display, perform, sublicense +and distribute the Modifications created by such +Contributor (or portions thereof), either on an +unmodified basis, with other Modifications, as +Covered Software and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using, or selling of Modifications made by that +Contributor either alone and/or in combination with +its Contributor Version (or portions of such +combination), to make, use, sell, offer for sale, +have made, and/or otherwise dispose of: (1) +Modifications made by that Contributor (or portions +thereof); and (2) the combination of Modifications +made by that Contributor with its Contributor Version +(or portions of such combination). + +(c) The licenses granted in Sections 2.2(a) and +2.2(b) are effective on the date Contributor first +distributes or otherwise makes the Modifications +available to a third party. + +(d) Notwithstanding Section 2.2(b) above, no patent +license is granted: (1) for any code that Contributor +has deleted from the Contributor Version; (2) for +infringements caused by: (i) third party +modifications of Contributor Version, or (ii) the +combination of Modifications made by that Contributor +with other software (except as part of the +Contributor Version) or other devices; or (3) under +Patent Claims infringed by Covered Software in the +absence of Modifications made by that Contributor. + +3. Distribution Obligations. + +3.1. Availability of Source Code. + +Any Covered Software that You distribute or otherwise make +available in Executable form must also be made available in +Source Code form and that Source Code form must be +distributed only under the terms of this License. You must +include a copy of this License with every copy of the +Source Code form of the Covered Software You distribute or +otherwise make available. You must inform recipients of any +such Covered Software in Executable form as to how they can +obtain such Covered Software in Source Code form in a +reasonable manner on or through a medium customarily used +for software exchange. + +3.2. Modifications. + +The Modifications that You create or to which You +contribute are governed by the terms of this License. You +represent that You believe Your Modifications are Your +original creation(s) and/or You have sufficient rights to +grant the rights conveyed by this License. + +3.3. Required Notices. + +You must include a notice in each of Your Modifications +that identifies You as the Contributor of the Modification. +You may not remove or alter any copyright, patent or +trademark notices contained within the Covered Software, or +any notices of licensing or any descriptive text giving +attribution to any Contributor or the Initial Developer. + +3.4. Application of Additional Terms. + +You may not offer or impose any terms on any Covered +Software in Source Code form that alters or restricts the +applicable version of this License or the recipients' +rights hereunder. You may choose to offer, and to charge a +fee for, warranty, support, indemnity or liability +obligations to one or more recipients of Covered Software. +However, you may do so only on Your own behalf, and not on +behalf of the Initial Developer or any Contributor. You +must make it absolutely clear that any such warranty, +support, indemnity or liability obligation is offered by +You alone, and You hereby agree to indemnify the Initial +Developer and every Contributor for any liability incurred +by the Initial Developer or such Contributor as a result of +warranty, support, indemnity or liability terms You offer. + +3.5. Distribution of Executable Versions. + +You may distribute the Executable form of the Covered +Software under the terms of this License or under the terms +of a license of Your choice, which may contain terms +different from this License, provided that You are in +compliance with the terms of this License and that the +license for the Executable form does not attempt to limit +or alter the recipient's rights in the Source Code form +from the rights set forth in this License. If You +distribute the Covered Software in Executable form under a +different license, You must make it absolutely clear that +any terms which differ from this License are offered by +You alone, not by the Initial Developer or Contributor. You +hereby agree to indemnify the Initial Developer and every +Contributor for any liability incurred by the Initial +Developer or such Contributor as a result of any such terms +You offer. + +3.6. Larger Works. + +You may create a Larger Work by combining Covered Software +with other code not governed by the terms of this License +and distribute the Larger Work as a single product. In such +a case, You must make sure the requirements of this License +are fulfilled for the Covered Software. + +4. Versions of the License. + +4.1. New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license steward. + +4.3. Modified Versions. + +When You are an Initial Developer and You want to create a +new license for Your Original Software, You may create and +use a modified version of this License if You: (a) rename +the license and remove any references to the name of the +license steward (except to note that the license differs +from this License); and (b) otherwise make it clear that +the license contains terms which differ from this License. + +5. DISCLAIMER OF WARRANTY. + +COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" +BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, +INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED +SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR +PURPOSE OR NON-INFRINGING. THE ENTIRE RISK AS TO THE QUALITY AND +PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY +COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE +INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF +ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF +WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF +ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS +DISCLAIMER. + +6. TERMINATION. + +6.1. This License and the rights granted hereunder will +terminate automatically if You fail to comply with terms +herein and fail to cure such breach within 30 days of +becoming aware of the breach. Provisions which, by their +nature, must remain in effect beyond the termination of +this License shall survive. + +6.2. If You assert a patent infringement claim

(excluding +declaratory judgment actions) against Initial Developer or +a Contributor (the Initial Developer or Contributor against +whom You assert such claim is referred to as "Participant") +alleging that the Participant Software (meaning the +Contributor Version where the Participant is a Contributor +or the Original Software where the Participant is the +Initial Developer) directly or indirectly infringes any +patent, then any and all rights granted directly or +indirectly to You by such Participant, the Initial +Developer (if the Initial Developer is not the Participant) +and all Contributors under Sections 2.1 and/or 2.2 of this +License shall, upon 60 days notice from Participant +terminate prospectively and automatically at the expiration +of such 60 day notice period, unless if within such 60 day +period You withdraw Your claim with respect to the +Participant Software against such Participant either +unilaterally or pursuant to a written agreement with +Participant. + 6.3. If You assert a patent infringement claim against +Participant alleging that the Participant Software directly +or indirectly infringes any patent where such claim is +resolved (such as by license or settlement) prior to the +initiation of patent infringement litigation, then the +reasonable value of the licenses granted by such Participant +under Sections 2.1 or 2.2 shall be taken into account in +determining the amount or value of any payment or license. + 6.4. In the event of termination under Sections 6.1 or 6.2 +above, all end user licenses that have been validly granted +by You or any distributor hereunder prior to termination +(excluding licenses granted to You by any distributor) +shall survive termination. + 7. LIMITATION OF LIABILITY. + +UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT +(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE +INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF +COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE +LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR +CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT +LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK +STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER +COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN +INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF +LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL +INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT +APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO +NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR +CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT +APPLY TO YOU. + 8. U.S. GOVERNMENT END USERS. + +The Covered Software is a "commercial item," as that term is +defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial +computer software" (as that term is defined at 48 C.F.R. +ยง 252.227-7014(a)(1)) and "commercial computer software +documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. +1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 +through 227.7202-4 (June 1995), all U.S. Government End Users +acquire Covered Software with only those rights set forth herein. +This U.S. Government Rights clause is in lieu of, and supersedes, +any other FAR, DFAR, or other clause or provision that addresses +Government rights in computer software under this License. + 9. MISCELLANEOUS. + +This License represents the complete agreement concerning subject +matter hereof. If any provision of this License is held to be +unenforceable, such provision shall be reformed only to the +extent necessary to make it enforceable. This License shall be +governed by the law of the jurisdiction specified in a notice +contained within the Original Software (except to the extent +applicable law, if any, provides otherwise), excluding such +jurisdiction's conflict-of-law provisions. Any litigation +relating to this License shall be subject to the jurisdiction of +the courts located in the jurisdiction and venue specified in a +notice contained within the Original Software, with the losing +party responsible for costs, including, without limitation, court +costs and reasonable attorneys' fees and expenses. The +application of the United Nations Convention on Contracts for the +International Sale of Goods is expressly excluded. Any law or +regulation which provides that the language of a contract shall +be construed against the drafter shall not apply to this License. +You agree that You alone are responsible for compliance with the +United States export administration regulations (and the export +control laws and regulation of any other countries) when You use, +distribute or otherwise make available any Covered Software. + 10. RESPONSIBILITY FOR CLAIMS. + +As between Initial Developer and the Contributors, each party is +responsible for claims and damages arising, directly or +indirectly, out of its utilization of rights under this License +and You agree to work with Initial Developer and Contributors to +distribute such responsibility on an equitable basis. Nothing +herein is intended or shall be deemed to constitute any admission +of liability. + NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND +DISTRIBUTION LICENSE (CDDL) + +The code released under the CDDL shall be governed by the laws +of the State of California (excluding conflict-of-law provisions). +Any litigation relating to this License shall be subject to the +jurisdiction of the Federal Courts of the Northern District of +California and the state courts of the State of California, with +venue lying in Santa Clara County, California. + + +The GNU General Public License (GPL) +Version 2, June 1991 + +Copyright (C) 1989, 1991 Free Software Foundation, Inc. + 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA + Everyone is permitted to copy and distribute verbatim + copies of this license document, but changing it is not + allowed. + Preamble + +The licenses for most software are designed to take away +your freedom to share and change it. By contrast, the GNU +General Public License is intended to guarantee your freedom +to share and change free software--to make sure the software +is free for all its users. This General Public License +applies to most of the Free Software Foundation's software +and to any other program whose authors commit to using it. +(Some other Free Software Foundation software is covered by +the GNU Library General Public License instead.) You can +apply it to your programs, too. + +When we speak of free software, we are referring to freedom, +not price. Our General Public Licenses are designed to make +sure that you have the freedom to distribute copies of free +software (and charge for this service if you wish), that you +receive source code or can get it if you want it, that you +can change the software or use pieces of it in new free +programs; and that you know you can do these things. + +To protect your rights, we need to make restrictions that +forbid anyone to deny you these rights or to ask you to +surrender the rights. These restrictions translate to +certain responsibilities for you if you distribute copies of +the software, or if you modify it. + +For example, if you distribute copies of such a program, +whether gratis or for a fee, you must give the recipients +all the rights that you have. You must make sure that they, +too, receive or can get the source code. And you must show +them these terms so they know their rights. + +We protect your rights with two steps: (1) copyright the +software, and (2) offer you this license which gives you +legal permission to copy, distribute and/or modify the +software. + +Also, for each author's protection and ours, we want to make +certain that everyone understands that there is no warranty +for this free software. If the software is modified by +someone else and passed on, we want its recipients to know +that what they have is not the original, so that any +problems introduced by others will not reflect on the +original authors' reputations. + +Finally, any free program is threatened constantly by +software patents. We wish to avoid the danger that +redistributors of a free program will individually obtain +patent licenses, in effect making the program proprietary. +To prevent this, we have made it clear that any patent must +be licensed for everyone's free use or not licensed at all. + +The precise terms and conditions for copying, distribution +and modification follow. + +TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND +MODIFICATION + + 0. This License applies to any program or other work which +contains a notice placed by the copyright holder saying it +may be distributed under the terms of this General Public +License. The "Program", below, refers to any such program or +work, and a "work based on the Program" means either the +Program or any derivative work under copyright law: that is +to say, a work containing the Program or a portion of it, +either verbatim or with modifications and/or translated into +another language. (Hereinafter, translation is included +without limitation in the term "modification".) Each +licensee is addressed as "you". + +Activities other than copying, distribution and modification +are not covered by this License; they are outside its scope. +The act of running the Program is not restricted, and the +output from the Program is covered only if its contents +constitute a work based on the Program (independent of +having been made by running the Program). Whether that is +true depends on what the Program does. + + 1. You may copy and distribute verbatim copies of the +Program's source code as you receive it, in any medium, +provided that you conspicuously and appropriately publish on +each copy an appropriate copyright notice and disclaimer of +warranty; keep intact all the notices that refer to this +License and to the absence of any warranty; and give any +other recipients of the Program a copy of this License along +with the Program. + +You may charge a fee for the physical act of transferring a +copy, and you may at your option offer warranty protection +in exchange for a fee. + + 2. You may modify your copy or copies of the Program or any +portion of it, thus forming a work based on the Program, and +copy and distribute such modifications or work under the +terms of Section 1 above, provided that you also meet all of +these conditions: + + a) You must cause the modified files to carry prominent + notices stating that you changed the files and the date + of any change. + + b) You must cause any work that you distribute or + publish, that in whole or in part contains or is derived + from the Program or any part thereof, to be licensed as + a whole at no charge to all third parties under the + terms of this License. + + c) If the modified program normally reads commands + interactively when run, you must cause it, when started + running for such interactive use in the most ordinary + way, to print or display an announcement including an + appropriate copyright notice and a notice that there is + no warranty (or else, saying that you provide a + warranty) and that users may redistribute the program + under these conditions, and telling the user how to view + a copy of this License. (Exception: if the Program + itself is interactive but does not normally print such + an announcement, your work based on the Program is not + required to print an announcement.) + +These requirements apply to the modified work as a whole. If +identifiable sections of that work are not derived from the +Program, and can be reasonably considered independent and +separate works in themselves, then this License, and its +terms, do not apply to those sections when you distribute +them as separate works. But when you distribute the same +sections as part of a whole which is a work based on the +Program, the distribution of the whole must be on the terms +of this License, whose permissions for other licensees +extend to the entire whole, and thus to each and every part +regardless of who wrote it. + +Thus, it is not the intent of this section to claim rights +or contest your rights to work written entirely by you; +rather, the intent is to exercise the right to control the +distribution of derivative or collective works based on the +Program. + +In addition, mere aggregation of another work not based on +the Program with the Program (or with a work based on the +Program) on a volume of a storage or distribution medium +does not bring the other work under the scope of this +License. + + 3. You may copy and distribute the Program (or a work based +on it, under Section 2) in object code or executable form +under the terms of Sections 1 and 2 above provided that you +also do one of the following: + + a) Accompany it with the complete corresponding + machine-readable source code, which must be distributed + under the terms of Sections 1 and 2 above on a medium + customarily used for software interchange; or, + + b) Accompany it with a written offer, valid for at least + three years, to give any third party, for a charge no + more than your cost of physically performing source + distribution, a complete machine-readable copy of the + corresponding source code, to be distributed under the + terms of Sections 1 and 2 above on a medium customarily + used for software interchange; or, + + c) Accompany it with the information you received as to + the offer to distribute corresponding source code. (This + alternative is allowed only for noncommercial +

distribution and only if you received the program in + object code or executable form with such an offer, in + accord with Subsection b above.) + +The source code for a work means the preferred form of the +work for making modifications to it. For an executable work, +complete source code means all the source code for all +modules it contains, plus any associated interface +definition files, plus the scripts used to control +compilation and installation of the executable. However, as +a special exception, the source code distributed need not +include anything that is normally distributed (in either +source or binary form) with the major components (compiler, +kernel, and so on) of the operating system on which the +executable runs, unless that component itself accompanies +the executable. + +If distribution of executable or object code is made by +offering access to copy from a designated place, then +offering equivalent access to copy the source code from the +same place counts as distribution of the source code, even +though third parties are not compelled to copy the source +along with the object code. + +4. You may not copy, modify, sublicense, or distribute the +Program except as expressly provided under this License. Any +attempt otherwise to copy, modify, sublicense or distribute +the Program is void, and will automatically terminate your +rights under this License. However, parties who have +received copies, or rights, from you under this License will +not have their licenses terminated so long as such parties +remain in full compliance. + +5. You are not required to accept this License, since you +have not signed it. However, nothing else grants you +permission to modify or distribute the Program or its +derivative works. These actions are prohibited by law if you +do not accept this License. Therefore, by modifying or +distributing the Program (or any work based on the Program), +you indicate your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices. Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the +sharing and reuse of software generally. + +NO WARRANTY + +11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS +NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY +APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE +COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM +"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR +IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED +WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR +PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE +OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE +DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, +REPAIR OR CORRECTION. + +12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED +TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY +WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED +ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, +SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF +THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT +LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR +LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE +PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH +HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF +SUCH DAMAGES. + + END OF TERMS AND CONDITIONS + + How to Apply These Terms to Your New Programs + +If you develop a new program, and you want it to be of the +greatest possible use to the public, the best way to achieve +this is to make it free software which everyone can +redistribute and change under these terms. + +To do so, attach the following notices to the program. It is +safest to attach them to the start of each source file to +most effectively convey the exclusion of warranty; and each +file should have at least the "copyright" line and a pointer +to where the full notice is found. + + One line to give the program's name and a brief idea of + what it does. Copyright (C) <year> <name of author> + + This program is free software; you can redistribute it + and/or modify it under the terms of the GNU General + Public License as published by the Free Software + Foundation; either version 2 of the License, or (at your + option) any later version. + + This program is distributed in the hope that it will be + useful, but WITHOUT ANY WARRANTY; without even the + implied warranty of MERCHANTABILITY or FITNESS FOR A + PARTICULAR PURPOSE. See the GNU General Public License + for more details. + + You should have received a copy of the GNU General + Public License along with this program; if not, write to + the Free Software Foundation, Inc., 59 Temple Place, + Suite 330, Boston, MA 02111-1307 USA + +Also add information on how to contact you by electronic and +paper mail. + +If the program is interactive, make it output a short notice +like this when it starts in an interactive mode: + + Gnomovision version 69, Copyright (C) year name of + author Gnomovision comes with ABSOLUTELY NO WARRANTY; + for details type `show w'. This is free software, and + you are welcome to redistribute it under certain + conditions; type `show c' for details. + +The hypothetical commands `show w' and `show c' should show +the appropriate parts of the General Public License. Of +course, the commands you use may be called something other +than `show w' and `show c'; they could even be mouse-clicks +or menu items-- whatever suits your program. + +You should also get your employer (if you work as a +programmer) or your school, if any, to sign a "copyright +disclaimer" for the program, if necessary. Here is a sample; +alter the names: + + Yoyodyne, Inc., hereby disclaims all copyright interest in + the program `Gnomovision' (which makes passes at + compilers) written by James Hacker. + + signature of Ty Coon, 1 April 1989 + Ty Coon, President of Vice + +This General Public License does not permit incorporating +your program into proprietary programs. If your program is a +subroutine library, you may consider it more useful to +permit linking proprietary applications with the library. If +this is what you want to do, use the GNU Library General +Public License instead of this License. + +"CLASSPATH" EXCEPTION TO THE GPL VERSION 2 + +Certain source files distributed by Sun Microsystems, Inc. +are subject to the following clarification and special +exception to the GPL Version 2, but only where Sun has expressly +included in the particular source file's header the words +"Sun designates this particular file as subject to the +"Classpath" exception as provided by Sun in the License file +that accompanied this code." + +Linking this library statically or dynamically with other +modules is making a combined work based on this library. +Thus, the terms and conditions of the GNU General Public +License Version 2 cover the whole combination. + +As a special exception, the copyright holders of this +library give you permission to link this library with +independent modules to produce an executable, regardless of +the license terms of these independent modules, and to copy +and distribute the resulting executable under terms of your +choice, provided that you also meet, for each linked +independent module, the terms and conditions of the license +of that module. An independent module is a module which is +not derived from or based on this library. If you modify +this library, you may extend this exception to your version +of the library, but you are not obligated to do so. If you +do not wish to do so, delete this exception statement from +your version. --- This is an automated message from the Apache Git Service. 565. arusinha closed pull request #186: [NETBEANS-54] Module Review net.java.html.boot.fx URL: https://github.com/apache/incubator-netbeans/pull/186 This is a PR merged from a forked repository. As GitHub hides the original diff on merge, it is displayed below for the sake of provenance: As this is a foreign pull request (from a fork), the diff is supplied below (as it won't show otherwise due to GitHub magic): diff --git a/net.java.html.boot.fx/external/net.java.html.boot.fx-1.4-license.txt b/net.java.html.boot.fx/external/net.java.html.boot.fx-1.4-license.txt new file mode 100644 index 000000000..3ea3c261f --- /dev/null +++ b/net.java.html.boot.fx/external/net.java.html.boot.fx-1.4-license.txt @@ -0,0 +1,827 @@ + +COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0 + +1. Definitions. + +1.1. "Contributor" means each individual or entity that +creates or contributes to the creation of Modifications. + +1.2.

"Contributor Version" means the combination of the +Original Software, prior Modifications used by a +Contributor (if any), and the Modifications made by that +particular Contributor. + +1.3. "Covered Software" means (a) the Original Software, or +(b) Modifications, or (c) the combination of files +containing Original Software with files containing +Modifications, in each case including portions thereof. + +1.4. "Executable" means the Covered Software in any form +other than Source Code. + +1.5. "Initial Developer" means the individual or entity +that first makes Original Software available under this +License. + +1.6. "Larger Work" means a work which combines Covered +Software or portions thereof with code not governed by the +terms of this License. + +1.7. "License" means this document. + +1.8. "Licensable" means having the right to grant, to the +maximum extent possible, whether at the time of the initial +grant or subsequently acquired, any and all of the rights +conveyed herein. + +1.9. "Modifications" means the Source Code and Executable +form of any of the following: + +A. Any file that results from an addition to, +deletion from or modification of the contents of a +file containing Original Software or previous +Modifications; + +B. Any new file that contains any part of the +Original Software or previous Modification; or + +C. Any new file that is contributed or otherwise made +available under the terms of this License. + +1.10. "Original Software" means the Source Code and +Executable form of computer software code that is +originally released under this License. + +1.11. "Patent Claims" means any patent claim(s), now owned +or hereafter acquired, including without limitation, +method, process, and apparatus claims, in any patent +Licensable by grantor. + +1.12. "Source Code" means (a) the common form of computer +software code in which modifications are made and (b) +associated documentation included in or with such code. + +1.13. "You" (or "Your") means an individual or a legal +entity exercising rights under, and complying with all of +the terms of, this License. For legal entities, "You" +includes any entity which controls, is controlled by, or is +under common control with You. For purposes of this +definition, "control" means (a) the power, direct or +indirect, to cause the direction or management of such +entity, whether by contract or otherwise, or (b) ownership +of more than fifty percent (50%) of the outstanding shares +or beneficial ownership of such entity. + +2. License Grants. + +2.1. The Initial Developer Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, the +Initial Developer hereby grants You a world-wide, +royalty-free, non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Initial Developer, +to use, reproduce, modify, display, perform, +sublicense and distribute the Original Software (or +portions thereof), with or without Modifications, +and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using or selling of Original Software, to make, have +made, use, practice, sell, and offer for sale, and/or +otherwise dispose of the Original Software (or +portions thereof). + +(c) The licenses granted in Sections 2.1(a) and (b) +are effective on the date Initial Developer first +distributes or otherwise makes the Original Software +available to a third party under the terms of this +License. + +(d) Notwithstanding Section 2.1(b) above, no patent +license is granted: (1) for code that You delete from +the Original Software, or (2) for infringements +caused by: (i) the modification of the Original +Software, or (ii) the combination of the Original +Software with other software or devices. + +2.2. Contributor Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, each +Contributor hereby grants You a world-wide, royalty-free, +non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Contributor to +use, reproduce, modify, display, perform, sublicense +and distribute the Modifications created by such +Contributor (or portions thereof), either on an +unmodified basis, with other Modifications, as +Covered Software and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using, or selling of Modifications made by that +Contributor either alone and/or in combination with +its Contributor Version (or portions of such +combination), to make, use, sell, offer for sale, +have made, and/or otherwise dispose of: (1) +Modifications made by that Contributor (or portions +thereof); and (2) the combination of Modifications +made by that Contributor with its Contributor Version +(or portions of such combination). + +(c) The licenses granted in Sections 2.2(a) and +2.2(b) are effective on the date Contributor first +distributes or otherwise makes the Modifications +available to a third party. + +(d) Notwithstanding Section 2.2(b) above, no patent +license is granted: (1) for any code that Contributor +has deleted from the Contributor Version; (2) for +infringements caused by: (i) third party +modifications of Contributor Version, or (ii) the +combination of Modifications made by that Contributor +with other software (except as part of the +Contributor Version) or other devices; or (3) under +Patent Claims infringed by Covered Software in the +absence of Modifications made by that Contributor. + +3. Distribution Obligations. + +3.1. Availability of Source Code. + +Any Covered Software that You distribute or otherwise make +available in Executable form must also be made available in +Source Code form and that Source Code form must be +distributed only under the terms of this License. You must +include a copy of this License with every copy of the +Source Code form of the Covered Software You distribute +or +otherwise make available. You must inform recipients of any +such Covered Software in Executable form as to how they can +obtain such Covered Software in Source Code form in a +reasonable manner on or through a medium customarily used +for software exchange. + +3.2. Modifications. + +The Modifications that You create or to which You +contribute are governed by the terms of this License. You +represent that You believe Your Modifications are Your +original creation(s) and/or You have sufficient rights to +grant the rights conveyed by this License. + +3.3. Required Notices. + +You must include a notice in each of Your Modifications +that identifies You as the Contributor of the Modification. +You may not remove or alter any copyright, patent or +trademark notices contained within the Covered Software, or +any notices of licensing or any descriptive text giving +attribution to any Contributor or the Initial Developer. + +3.4. Application of Additional Terms. + +You may not offer or impose any terms on any Covered +Software in Source Code form that alters or restricts the +applicable version of this License or the recipients' +rights hereunder. You may choose to offer, and to charge a +fee for, warranty, support, indemnity or liability +obligations to one or more recipients of Covered Software. +However, you may do so only on Your own behalf, and not on +behalf of the Initial Developer or any Contributor. You +must make it absolutely clear that any such warranty, +support, indemnity or liability obligation is offered by +You alone, and You hereby agree to indemnify the Initial +Developer and every Contributor for any liability incurred +by the Initial Developer or such Contributor as a result of +warranty, support, indemnity or liability terms You offer. + +3.5. Distribution of Executable Versions. + +You may distribute the Executable form of the Covered +Software under the terms of this License or under the terms +of a license of Your choice, which may contain terms +different from this License, provided that You are in +compliance with the terms of this License and that the +license for the Executable form does not attempt to limit +or alter the recipient's rights in the Source Code form +from the rights set forth in this License. If You +distribute the Covered Software in Executable form under a +different license, You must make it absolutely clear that +any terms which differ from this License are offered by You +alone, not by the Initial Developer or Contributor. You +hereby agree to indemnify the Initial Developer and every +Contributor for any liability incurred by the Initial +Developer or such Contributor as a result of any such terms +You offer. + +3.6. Larger Works. + +You may create a Larger Work by combining Covered Software +with other code not governed by the terms of this License +and distribute the Larger Work as a single product. In such +a case, You must make sure the requirements of this License +are fulfilled for the Covered Software. + +4. Versions of the License. + +4.1. New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license steward. + +4.3. Modified Versions. + +When You are an Initial Developer and You want to create a +new license for Your Original Software, You may create and +use a modified version of this License if You: (a) rename +the license and remove any references to the name of the +license steward (except to note that the license differs +from this License); and (b) otherwise make it clear that +the license contains terms which differ from this License. + +5. DISCLAIMER OF WARRANTY. + +COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" +BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, +INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED +SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR +PURPOSE OR NON-INFRINGING. THE ENTIRE RISK AS TO THE QUALITY AND +PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY +COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE +INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF +ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF +WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF +ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS +DISCLAIMER. + +6. TERMINATION. + +6.1. This License and the rights granted hereunder will +terminate automatically if You fail to comply with terms +herein and fail to cure such breach within 30 days of +becoming aware of the breach. Provisions which, by their +nature, must remain in effect beyond the termination of +this License shall survive. + +6.2. If You assert a patent infringement claim (excluding +declaratory judgment actions) against Initial Developer or +a Contributor (the Initial Developer or Contributor against +whom You assert such claim is referred to as "Participant") +alleging that the Participant Software (meaning the +Contributor Version where the Participant is a Contributor +or the Original Software where the Participant is the +Initial Developer) directly or indirectly infringes any +patent, then any and all rights granted directly or +indirectly to You by such Participant, the Initial +Developer (if the Initial Developer is not the Participant) +and all Contributors under Sections 2.1 and/or 2.2 of this +License shall, upon 60 days notice from Participant +terminate prospectively and automatically at the expiration +of such 60 day notice period, unless if within such 60 day +period You withdraw Your claim with respect to the +Participant Software against such Participant either +unilaterally or pursuant to a written agreement with +Participant. + +6.3. If You assert a patent infringement claim against +Participant alleging that the Participant Software directly +or indirectly infringes any patent where such claim is +resolved (such as by license or settlement) prior to the +initiation of patent infringement litigation, then the +reasonable value of the licenses granted by such Participant +under Sections 2.1 or 2.2 shall be taken into account in +determining the amount or value of any payment or license. + +6.4. In the event of termination under Sections 6.1 or 6.2 +above, all end user licenses that have been validly granted +by You or any distributor hereunder prior to termination +(excluding licenses granted to You by any distributor) +shall survive termination. + +7. LIMITATION OF LIABILITY. + +UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT +(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL

your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices. Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the +sharing and reuse of software generally. + +NO WARRANTY + +11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS +NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY +APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE +COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM +"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR +IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED +WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR +PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE +OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE +DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, +REPAIR OR CORRECTION. + +12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED +TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY +WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED +ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, +SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF +THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT +LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR +LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE +PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH +HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF +SUCH DAMAGES. + + END OF TERMS AND CONDITIONS + + How to Apply These Terms to Your New Programs + +If you develop a new program, and you want it to be of the +greatest possible use to the public, the best way to achieve +this is to make it free software which everyone can +redistribute and change under these terms. + +To do so, attach the following notices to the program. It is +safest to attach them to the start of each source file to +most effectively convey the exclusion of warranty; and each +file should have at least the "copyright" line and a pointer +to where the full notice is found. + + One line to give the program's name and a brief idea of + what it does. Copyright (C) <year> <name of author> + + This program is free software; you can redistribute it + and/or modify it under the terms of the GNU General + Public License as published by the Free Software + Foundation; either version 2 of the License, or (at your + option) any later version. + + This program is distributed in the hope that it will be + useful, but WITHOUT ANY WARRANTY; without even the + implied warranty of MERCHANTABILITY or FITNESS FOR A + PARTICULAR PURPOSE. See the GNU General Public + License for more details. + + You should have received a copy of the GNU General + Public License along with this program; if not, write to + the Free Software Foundation, Inc., 59 Temple Place, + Suite 330, Boston, MA 02111-1307 USA + +Also add information on how to contact you by electronic and +paper mail. + +If the program is interactive, make it output a short notice +like this when it starts in an interactive mode: + + Gnomovision version 69, Copyright (C) year name of + author Gnomovision comes with ABSOLUTELY NO WARRANTY; + for details type `show w'. This is free software, and + you are welcome to redistribute it under certain + conditions; type `show c' for details. + +The hypothetical commands `show w' and `show c' should show +the appropriate parts of the General Public License. Of +course, the commands you use may be called something other +than `show w' and `show c'; they could even be mouse-clicks +or menu items--whatever suits your program. + +You should also get your employer (if you work as a +programmer) or your school, if any, to sign a "copyright +disclaimer" for the program, if necessary. Here is a sample; +alter the names: + + Yoyodyne, Inc., hereby disclaims all copyright interest + in the program `Gnomovision' (which makes passes at + compilers) written by James Hacker. + + signature of Ty Coon, 1 April 1989 + Ty Coon, President of Vice + +This General Public License does not permit incorporating +your program into proprietary programs. If your program is a +subroutine library, you may consider it more useful to +permit linking proprietary applications with the library. If +this is what you want to do, use the GNU Library General +Public License instead of this License. + + +"CLASSPATH" EXCEPTION TO THE GPL VERSION 2 + +Certain source files distributed by Sun Microsystems, Inc. +are subject to the following clarification and special +exception to the GPL Version 2, but only where Sun has expressly +included in the particular source file's header the words +"Sun designates this particular file as subject to the +"Classpath" exception as provided by Sun in the License file +that accompanied this code." + +Linking this library statically or dynamically with other +modules is making a combined work based on this library. +Thus, the terms and conditions of the GNU General Public +License Version 2 cover the whole combination. + +As a special exception, the copyright holders of this +library give you permission to link this library with +independent modules to produce an executable, regardless of +the license terms of these independent modules, and to copy +and distribute the resulting executable under terms of your +choice, provided that you also meet, for each linked +independent module, the terms and conditions of the license +of that module. An independent module is a module which is +not derived from or based on this library. If you modify +this library, you may extend this exception to your version +of the library, but you are not obligated to do so. If you +do not wish to do so, delete this exception statement from +your version.

New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license steward. + +4.3. Modified Versions. + +When You are an Initial Developer and You want to create a +new license for Your Original Software, You may create and +use a modified version of this License if You: (a) rename +the license and remove any references to the name of the +license steward (except to note that the license differs +from this License); and (b) otherwise make it clear that +the license contains terms which differ from this License. + +5. DISCLAIMER OF WARRANTY. + +COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" +BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, +INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED +SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR +PURPOSE OR NON-INFRINGING. THE ENTIRE RISK AS TO THE QUALITY AND +PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY +COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE +INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF +ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF +WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF +ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS +DISCLAIMER. + +6. TERMINATION. + +6.1. This License and the rights granted hereunder will +terminate automatically if You fail to comply with terms +herein and fail to cure such breach within 30 days of +becoming aware of the breach. Provisions which, by their +nature, must remain in effect beyond the termination of +this License shall survive. + +6.2. If You assert a patent infringement claim (excluding +declaratory judgment actions) against Initial Developer or +a Contributor (the Initial Developer or Contributor against +whom You assert such claim is referred to as "Participant") +alleging that the Participant Software (meaning the +Contributor Version where the Participant is a Contributor +or the Original Software where the Participant is the +Initial Developer) directly or indirectly infringes any +patent, then any and all rights granted directly or +indirectly to You by such Participant, the Initial +Developer (if the Initial Developer is not the Participant) +and all Contributors under Sections 2.1 and/or 2.2 of this +License shall, upon 60 days notice from Participant +terminate prospectively and automatically at the expiration +of such 60 day notice period, unless if within such 60 day +period You withdraw Your claim with respect to the +Participant Software against such Participant either +unilaterally or pursuant to a written agreement with +Participant. + +6.3. If You assert a patent infringement claim against +Participant alleging that the Participant Software directly +or indirectly infringes any patent where such claim is +resolved (such as by license or settlement) prior to the +initiation of patent infringement litigation, then the +reasonable value of the licenses granted by such +Participant under Sections 2.1 or 2.2 shall be taken into +account in determining the amount or value of any payment +or license. + +6.4. In the event of termination under Sections 6.1 or 6.2 +above, all end user licenses that have been validly granted +by You or any distributor hereunder prior to termination +(excluding licenses granted to You by any distributor) +shall survive termination. + +7. LIMITATION OF LIABILITY. + +UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT +(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE +INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF +COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE +LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR +CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT +LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK +STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER +COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN +INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF +LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL +INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT +APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO +NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR +CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT +APPLY TO YOU. + +8. U.S. GOVERNMENT END USERS. + +The Covered Software is a "commercial item," as that term is +defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial +computer software" (as that term is defined at 48 C.F.R. +ยง 252.227-7014(a)(1)) and "commercial computer software +documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. +1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 +through 227.7202-4 (June 1995), all U.S. Government End Users +acquire Covered Software with only those rights set forth herein. +This U.S. Government Rights clause is in lieu of, and supersedes, +any other FAR, DFAR, or other clause or provision that addresses +Government rights in computer

software under this License. + +9. MISCELLANEOUS. + +This License represents the complete agreement concerning subject +matter hereof. If any provision of this License is held to be +unenforceable, such provision shall be reformed only to the +extent necessary to make it enforceable. This License shall be +governed by the law of the jurisdiction specified in a notice +contained within the Original Software (except to the extent +applicable law, if any, provides otherwise), excluding such +jurisdiction's conflict-of-law provisions. Any litigation +relating to this License shall be subject to the jurisdiction of +the courts located in the jurisdiction and venue specified in a +notice contained within the Original Software, with the losing +party responsible for costs, including, without limitation, court +costs and reasonable attorneys' fees and expenses. The +application of the United Nations Convention on Contracts for the +International Sale of Goods is expressly excluded. Any law or +regulation which provides that the language of a contract shall +be construed against the drafter shall not apply to this License. +You agree that You alone are responsible for compliance with the +United States export administration regulations (and the export +control laws and regulation of any other countries) when You use, +distribute or otherwise make available any Covered Software. + +10. RESPONSIBILITY FOR CLAIMS. + +As between Initial Developer and the Contributors, each party is +responsible for claims and damages arising, directly or +indirectly, out of its utilization of rights under this License +and You agree to work with Initial Developer and Contributors to +distribute such responsibility on an equitable basis. Nothing +herein is intended or shall be deemed to constitute any admission +of liability. + +NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND +DISTRIBUTION LICENSE (CDDL) + +The code released under the CDDL shall be governed by the laws +of the State of California (excluding conflict-of-law provisions). +Any litigation relating to this License shall be subject to the +jurisdiction of the Federal Courts of the Northern District of +California and the state courts of the State of California, with +venue lying in Santa Clara County, California. + + +The GNU General Public License (GPL) +Version 2, June 1991 + + Copyright (C) 1989, 1991 Free Software Foundation, Inc. + 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA + Everyone is permitted to copy and distribute verbatim + copies of this license document, but changing it is not + allowed. + + Preamble + +The licenses for most software are designed to take away +your freedom to share and change it. By contrast, the GNU +General Public License is intended to guarantee your freedom +to share and change free software--to make sure the software +is free for all its users. This General Public License +applies to most of the Free Software Foundation's software +and to any other program whose authors commit to using it. +(Some other Free Software Foundation software is covered by +the GNU Library General Public License instead.) You can +apply it to your programs, too. + +When we speak of free software, we are referring to freedom, +not price. Our General Public Licenses are designed to make +sure that you have the freedom to distribute copies of free +software (and charge for this service if you wish), that you +receive source code or can get it if you want it, that you +can change the software or use pieces of it in new free +programs; and that you know you can do these things. + +To protect your rights, we need to make restrictions that +forbid anyone to deny you these rights or to ask you to +surrender the rights. These restrictions translate to +certain responsibilities for you if you distribute copies of +the software, or if you modify it. + +For example, if you distribute copies of such a program, +whether gratis or for a fee, you must give the recipients +all the rights that you have. You must make sure that they, +too, receive or can get the source code. And you must show +them these terms so they know their rights. + +We protect your rights with two steps: (1) copyright the +software, and (2) offer you this license which gives you +legal permission to copy, distribute and/or modify the +software. + +Also, for each author's protection and ours, we want to make +certain that everyone understands that there is no warranty +for this free software. If the software is modified by +someone else and passed on, we want its recipients to know +that what they have is not the original, so that any +problems introduced by others will not reflect on the +original authors' reputations. + +Finally, any free program is threatened constantly by +software patents. We wish to avoid the danger that +redistributors of a free program will individually obtain +patent licenses, in effect making the program proprietary. +To prevent this, we have made it clear that any patent must +be licensed for everyone's free use or not licensed at all. + +The precise terms and conditions for copying, distribution +and modification follow. + +TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND +MODIFICATION + +0. This License applies to any program or other work which +contains a notice placed by the copyright holder saying it +may be distributed under the terms of this General Public +License. The "Program", below, refers to any such program or +work, and a "work based on the Program" means either the +Program or any derivative work under copyright law: that is +to say, a work containing the Program or a portion of it, +either verbatim or with modifications and/or translated into +another language. (Hereinafter, translation is included +without limitation in the term "modification".) Each +licensee is addressed as "you". + +Activities other than copying, distribution and modification +are not covered by this License; they are outside its scope. +The act of running the Program is not restricted, and the +output from the Program is covered only if its contents +constitute a work based on the Program (independent of +having been made by running the Program). Whether that is +true depends on what the Program does. + +1. You may copy and distribute verbatim copies of the +Program's source code as you receive it, in any medium, +provided that you conspicuously and appropriately publish on +each copy an appropriate copyright notice and disclaimer of +warranty; keep intact all the notices that refer to this +License and to the absence of any warranty; and give any +other recipients of the Program a copy of this License along +with the Program. + +You may charge a fee for the physical act of transferring a +copy, and you may at your option offer warranty protection +in exchange for a fee. + +2. You may modify your copy or copies of the Program or any +portion of it, thus forming a work based on the Program, and +copy and distribute such modifications or work under the +terms of Section 1 above, provided that you also meet all of +these conditions: + + a) You must cause the modified files to carry prominent + notices stating that you changed the files and the date + of any change. + + b) You must cause any work that you distribute or + publish, that in whole or in part contains or is derived + from the Program or any part thereof, to be licensed as + a whole at no charge to all third parties under the + terms of this License. + + c) If the modified program normally reads commands + interactively when run, you must cause it, when started + running for such interactive use in the most ordinary + way, to print or display an announcement including an + appropriate copyright notice and a notice that there is + no warranty (or else, saying that you provide a + warranty) and that users may redistribute the program + under these conditions, and telling the user how to view + a copy of this License. (Exception: if the + Program itself is interactive but does not normally print such + an announcement, your work based on the Program is not + required to print an announcement.) + +These requirements apply to the modified work as a whole. If +identifiable sections of that work are not derived from the +Program, and can be reasonably considered independent and +separate works in themselves, then this License, and its +terms, do not apply to those sections when you distribute +them as separate works. But when you distribute the same +sections as part of a whole which is a work based on the +Program, the distribution of the whole must be on the terms +of this License, whose permissions for other licensees +extend to the entire whole, and thus to each and every part +regardless of who wrote it. + +Thus, it is not the intent of this section to claim rights +or contest your rights to work written entirely by you; +rather, the intent is to exercise the right to control the +distribution of derivative or collective works based on the +Program. + +In addition, mere aggregation of another work not based on +the Program with the Program (or with a work based on the +Program) on a volume of a storage or distribution medium +does not bring the other work under the scope of this +License. + +3. You may copy and distribute the Program (or a work based +on it, under Section 2) in object code or executable form +under the terms of Sections 1 and 2 above provided that you +also do one of the following: + + a) Accompany it with the complete corresponding + machine-readable source code, which must be distributed + under the terms of Sections 1 and 2 above on a medium + customarily used for software interchange; or, + + b) Accompany it with a written offer, valid for at least + three years, to give any third party, for a charge no + more than your cost of physically performing source + distribution, a complete machine-readable copy of the + corresponding source code, to be distributed under the + terms of Sections 1 and 2 above on a medium customarily + used for software interchange; or, + + c) Accompany it with the information you received as to + the offer to distribute corresponding source code. (This + alternative is allowed only for noncommercial + distribution and only if you received the program in + object code or executable form with such an offer, in + accord with Subsection b above.) + +The source code for a work means the preferred form of the +work for making modifications to it. For an executable work, +complete source code means all the source code for all +modules it contains, plus any associated interface +definition files, plus the scripts used to control +compilation and installation of the executable. However, as +a special exception, the source code distributed need not +include anything that is normally distributed (in either +source or binary form) with the major components (compiler, +kernel, and so on) of the operating system on which the +executable runs, unless that component itself accompanies +the executable. + +If distribution of executable or object code is made by +offering access to copy from a designated place, then +offering equivalent access to copy the source code from the +same place counts as distribution of the source code, even +though third parties are not compelled to copy the source +along with the object code. + +4. You may not copy, modify, sublicense, or distribute the +Program except as expressly provided under this License. Any +attempt otherwise to copy, modify, sublicense or distribute +the Program is void, and will automatically terminate your +rights under this License. However, parties who have received copies, or rights, from you +under this License will not have their licenses terminated so long as such parties +remain in full compliance. + +5. You are not required to accept this License, since you +have not signed it. However, nothing else grants you +permission to modify or distribute the Program or its +derivative works. These actions are prohibited by law if you +do not accept this License. Therefore, by modifying or +distributing the Program (or any work based on the Program), +you indicate your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices.

Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the +sharing and reuse of software generally. + +NO WARRANTY + +11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS +NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY +APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE +COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM +"AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR +IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED +WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR +PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE +OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE +DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, +REPAIR OR CORRECTION. + +12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED +TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY +WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED +ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, +SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF +THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT +LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR +LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE +PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH +HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF +SUCH DAMAGES. + + END OF TERMS AND CONDITIONS + + How to Apply These Terms to Your New Programs + +If you develop a new program, and you want it to be of the +greatest possible use to the public, the best way to achieve +this is to make it free software which everyone can +redistribute and change under these terms. + +To do so, attach the following notices to the program. It is +safest to attach them to the start of each source file to +most effectively convey the exclusion of warranty; and each +file should have at least the "copyright" line and a pointer +to where the full notice is found. + + One line to give the program's name and a brief idea of + what it does. Copyright (C) <year> <name of author> + + This program is free software; you can redistribute it + and/or modify it under the terms of the GNU General + Public License as published by the Free Software + Foundation; either version 2 of the License, or (at your + option) any later version. + + This program is distributed in the hope that it will be + useful, but WITHOUT ANY WARRANTY; without even the + implied warranty of MERCHANTABILITY or FITNESS FOR A + PARTICULAR PURPOSE. See the GNU General Public License + for more details. + + You should have received a copy of the GNU General + Public License along with this program; if not, write to + the Free Software Foundation, Inc., 59 Temple Place, + Suite 330, Boston, MA 02111-1307 USA + +Also add information on how to contact you by electronic and +paper mail. + +If the program is interactive, make it output a short notice +like this when it starts in an interactive mode: + + Gnomovision version 69, Copyright (C) year name of + author Gnomovision comes with ABSOLUTELY NO WARRANTY; + for details type `show w'. This is free software, and + you are welcome to redistribute it under certain + conditions; type `show c' for details. + +The hypothetical commands `show w' and `show c' should show +the appropriate parts of the General Public License. Of +course, the commands you use may be called something other +than `show w' and `show c'; they could even be mouse-clicks +or menu items--whatever suits your program. + +You should also get your employer (if you work as a +programmer) or your school, if any, to sign a "copyright +disclaimer" for the program, if necessary. Here is a sample; +alter the names: + + Yoyodyne, Inc., hereby disclaims all copyright interest in + the program `Gnomovision' (which makes passes at + compilers) written by James Hacker. + + signature of Ty Coon, 1 April 1989 + Ty Coon, President of Vice + +This General Public License does not permit incorporating +your program into proprietary programs. If your program is a +subroutine library, you may consider it more useful to +permit linking proprietary applications with the library. If +this is what you want to do, use the GNU Library General +Public License instead of this License. + + +"CLASSPATH" EXCEPTION TO THE GPL VERSION 2 + + +Certain source files distributed by Sun Microsystems, Inc. +are subject to the following clarification and special +exception to the GPL Version 2, but only where Sun has expressly +included in the particular source file's header the words +"Sun designates this particular file as subject to the +"Classpath" exception as provided by Sun in the License file +that accompanied this code." + +Linking this library statically or dynamically with other +modules is making a combined work based on this library. +Thus, the terms and conditions of the GNU General Public +License Version 2 cover the whole combination. + +As a special exception, the copyright holders of this +library give you permission to link this library with +independent modules to produce an executable, regardless of +the license terms of these independent modules, and to copy +and distribute the resulting executable under terms of your +choice, provided that you also meet, for each linked +independent module, the terms and conditions of the license +of that module. An independent module is a module which is +not derived from or based on this library. If you modify +this library, you may extend this exception to your version +of the library, but you are not obligated to do so. If you +do not wish to do so, delete this exception statement from +your version. --- This is an automated message from the Apache Git Service. This PR is still a bit strange. For some reason you managed to push three commits into this. Two held the same change with different authors and one merged these two commits. Whatever I removed the merge and the commit with the wrong author and so this is done. -- This is an automated message from the Apache Git Service. To respond to the

579. vieiro commented on issue #172: [NETBEANS-54] Module Review o.apache.xml.resolver URL: https://github.com/apache/incubator-netbeans/pull/172#issuecomment-339065700 We'll either: 1- Add the complete source files to avoid patching (I'm worried about licensing issues here). 2- Build a patch utility in Java (NetBeans has some stuff for this). 1 is simpler, but 2 is more elegant. I think I'll try 2. It's worth having a pure-java patch utility that can be handy in some other situations. Regarding the 'patch" utility for Windows, maybe Google is of some help (I don't use Windows myself). -- This is an automated message from the Apache Git Service. 580. lbruun opened a new pull request #191: [NETBEANS-54] Module Review swing.validation URL: https://github.com/apache/incubator-netbeans/pull/191 Project includes `ValidationAPI.jar` (CDDL licensed), originally hosted on Kenai, now GitHub. Changed dead references to Kenai to their equivalent GitHub coordinates. Note: Even if the `ValidationAPI.jar` file is using the `org.netbeans` package namespace it is not part of the grant, as far as I can tell. Therefore it is still CDDL licensed. Should anyone want to recreate the binary from source: The binary uses Kenai SVN commit no as the version number. Since the project was transferred to GitHub with full commit history, it is possible to find the equivalent point in time in GitHub, namely end-of-day Nov 17, 2011. The URL is noted in `ValidationAPI-license.txt` file. -- This is an automated message from the Apache Git Service. To respond to the message, please log on GitHub and use the URL above to go to the specific comment. For queries about this service, please contact Infrastructure at: users@infra.apache.org

581. vieiro opened a new pull request #192: [NETBEANS-54] Module Review o.apache.xml.resolver (Build fails on sys… URL: https://github.com/apache/incubator-netbeans/pull/192 Build fails on systems without the 'patch' command line tool. - The ant 'patch' task requires an external 'patch' tool that is not availble in all systems. - As a temporary solution I've added the patched sources to make the build run. - Later on, we may want to reuse some code from the 'diff' module to implement an ant patch task in pure Java. -- This is an automated message from the Apache Git Service. Some entities + * (document types, XML entities, and notations) have names and all of them + * can have either public or system identifiers or both. (In XML, only a + * notation can have a public identifier without a system identifier, but + * the methods implemented in this class obey the Catalog semantics + * from the SGML + * days when system identifiers were optional.)</p> + * + * <p>The system identifiers returned by the resolution methods in this + * class are valid, i.e. usable by, and in fact constructed by, the + * <tt>java.net.URL</tt> class. Unfortunately, this class seems to behave in + * somewhat non-standard ways and the system identifiers returned may + * not be directly usable in a browser or filesystem context. + * + * <p>This class recognizes all of the Catalog entries defined in + * TR9401:1997:</p> + * + * + * BASE + * changes the base URI for resolving relative system + * identifiers. The + * initial base URI is the URI of the location of the catalog (which is, + * in turn, relative to the location of the current working directory + * at + * startup, as returned by the <tt>user.dir</tt> system property). + * CATALOG + * processes other catalog files. An included catalog occurs + * logically + * at the end of the including catalog. + * DELEGATE_PUBLIC + * specifies alternate catalogs for some public identifiers. The delegated + * catalogs are not loaded until they are needed, but they are cached + * once loaded. + * DELEGATE_SYSTEM + * specifies alternate catalogs for some system identifiers. The delegated + * catalogs are not loaded until they are needed, but they are cached + * once loaded. + * DELEGATE_URI + * specifies alternate catalogs for some URIs. The delegated + * catalogs are not loaded until they are needed, but they are cached + * once loaded. + * REWRITE_SYSTEM + * specifies alternate prefix for a system identifier. + * REWRITE_URI + * specifies alternate prefix for a URI. + * SYSTEM_SUFFIX + * maps any system identifier that ends with a particular suffix to another + * system identifier. + * URI_SUFFIX + * maps any URI that ends with a particular suffix to another URI. + * DOCTYPE + * associates the names of root elements with URIs. (In other words, an XML + * processor might infer the doctype of an XML document that does not include + * a doctype declaration by looking for the DOCTYPE entry in the + * catalog which matches the name of the root element of the document.) + * DOCUMENT + * provides a default document. + * DTDDECL + * recognized and silently ignored. Not relevant for XML. + * ENTITY + * associates entity names with URIs. + * LINKTYPE + * recognized and silently ignored. Not relevant for XML. +

* NOTATION + * associates notation names with URIs. + * OVERRIDE + * changes the override behavior. Initial behavior is set by the + * system property <tt>xml.catalog.override</tt>. The default initial + * behavior is 'YES', that is, entries in the catalog override + * system identifiers specified in the document. + * PUBLIC + * maps a public identifier to a system identifier. + * SGMLDECL + * recognized and silently ignored. Not relevant for XML. + * SYSTEM + * maps a system identifier to another system identifier. + * URI + * maps a URI to another URI. + * + * + * <p>Note that BASE entries are treated as described by RFC2396. In + * particular, this has the counter-intuitive property that after a BASE + * entry identifying "http://example.com/a/b/c" as the base URI, + * the relative URI "foo" is resolved to the absolute URI + * "http://example.com/a/b/foo". You must provide the trailing slash if + * you do not want the final component of the path to be discarded as a + * filename would in a URI for a resource: "http://example.com/a/b/c/". + * </p> + * + * <p>Note that subordinate catalogs (all catalogs except the first, + * including CATALOG and DELEGATE* catalogs) are only loaded if and when + * they are required.</p> + * + * <p>This class relies on classes which implement the CatalogReader + * interface to actually load catalog files. This allows the catalog + * semantics to be implemented for TR9401 text-based catalogs, XML + * catalogs, or any number of other storage formats.</p> + * + * <p>Additional catalogs may also be loaded with the + * {@link #parseCatalog} method.</p> + * </dd> + * </dl> + * + * <p>Change Log:</p> + * <dl> + * <dt>2.0</dt> + * <dd><p>Rewrite to use CatalogReaders.</p></dd> + * <dt>1.1</dt> + * <dd><p>Allow quoted components in <tt>xml.catalog.files</tt> + * so that URLs containing colons can be used on Unix. + * The string passed to <tt>xml.catalog.files</tt> can now + * have the form:</p> + * <pre> + * unquoted-path-with-no-sep-chars:"double-quoted path with or without sep chars":'single-quoted path with or without sep chars' + * </pre> + * <p>(Where ":" is the separater character in this example.)</p> + * <p>If an unquoted path contains an embedded double or single quote + * character, no special processig is performed on that character. Definitions. + +1.1. "Contributor" means each individual or entity that +creates or contributes to the creation of Modifications. + +1.2. "Contributor Version" means the combination of the +Original Software, prior Modifications used by a +Contributor (if any), and the Modifications made by that +particular Contributor. + +1.3. "Covered Software" means (a) the Original Software, or +(b) Modifications, or (c) the combination of files +containing Original Software with files containing +Modifications, in each case including portions thereof. + +1.4. "Executable" means the Covered Software in any form +other than Source Code. + +1.5. "Initial Developer" means the individual or entity +that first makes Original Software available under this +License. + +1.6. "Larger Work" means a work which combines Covered +Software or portions thereof with code not governed by the +terms of this License. + +1.7. "License" means this document. + +1.8. "Licensable" means having the right to grant, to the +maximum extent possible, whether at the time of the initial +grant or subsequently acquired, any and all of the rights +conveyed herein. + +1.9. "Modifications" means the Source Code and Executable +form of any of the following: + +A. Any file that results from an addition to, +deletion from or modification of the contents of a +file containing Original Software or previous +Modifications; + +B. Any new file that contains any part of the +Original Software or previous Modification; or + +C. Any new file that is contributed or otherwise made +available under the terms of this License. + +1.10. "Original Software" means the Source Code and +Executable form of computer software code that is +originally released under this License. + +1.11. "Patent Claims" means any patent claim(s), now owned +or hereafter acquired, including without limitation, +method, process, and apparatus claims, in any patent +Licensable by grantor. + +1.12. "Source Code" means (a) the common form of computer +software code in which modifications are made and (b) +associated documentation included in or with such code. + +1.13. "You" (or "Your") means an individual or a legal +entity exercising rights under, and complying with all of +the terms of, this License. For legal entities, "You" +includes any entity which controls, is controlled by, or is +under common control with You. For purposes of this +definition, "control" means (a) the power, direct or +indirect, to cause the direction or management of such +entity, whether by contract or otherwise, or (b) ownership +of more than fifty percent (50%) of the outstanding shares +or beneficial ownership of such entity. + +2. License Grants. + +2.1. The Initial Developer Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to third party intellectual property claims, the +Initial Developer hereby grants You a world-wide, +royalty-free, non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Initial Developer, +to use, reproduce, modify, display, perform, +sublicense and distribute the Original Software (or +portions thereof), with or without Modifications, +and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using or selling of Original Software, to make, have +made, use, practice, sell, and offer for sale, and/or +otherwise dispose of the Original Software (or +portions thereof). + +(c) The licenses granted in Sections 2.1(a) and (b) +are effective on the date Initial Developer first +distributes or otherwise makes the Original Software +available to a third party under the terms of this +License. + +(d) Notwithstanding Section 2.1(b) above, no patent +license is granted: (1) for code that You delete from +the Original Software, or (2) for infringements +caused by: (i) the modification of the Original +Software, or (ii) the combination of the Original +Software with other software or devices. + +2.2. Contributor Grant. + +Conditioned upon Your compliance with Section 3.1 below and +subject to

third party intellectual property claims, each +Contributor hereby grants You a world-wide, royalty-free, +non-exclusive license: + +(a) under intellectual property rights (other than +patent or trademark) Licensable by Contributor to +use, reproduce, modify, display, perform, sublicense +and distribute the Modifications created by such +Contributor (or portions thereof), either on an +unmodified basis, with other Modifications, as +Covered Software and/or as part of a Larger Work; and + +(b) under Patent Claims infringed by the making, +using, or selling of Modifications made by that +Contributor either alone and/or in combination with +its Contributor Version (or portions of such +combination), to make, use, sell, offer for sale, +have made, and/or otherwise dispose of: (1) +Modifications made by that Contributor (or portions +thereof); and (2) the combination of Modifications +made by that Contributor with its Contributor Version +(or portions of such combination). + +(c) The licenses granted in Sections 2.2(a) and +2.2(b) are effective on the date Contributor first +distributes or otherwise makes the Modifications +available to a third party. + +(d) Notwithstanding Section 2.2(b) above, no patent +license is granted: (1) for any code that Contributor +has deleted from the Contributor Version; (2) for +infringements caused by: (i) third party +modifications of Contributor Version, or (ii) the +combination of Modifications made by that Contributor +with other software (except as part of the +Contributor Version) or other devices; or (3) under +Patent Claims infringed by Covered Software in the +absence of Modifications made by that Contributor. + +3. Distribution Obligations. + +3.1. Availability of Source Code. + +Any Covered Software that You distribute or otherwise make +available in Executable form must also be made available in +Source Code form and that Source Code form must be +distributed only under the terms of this License. You must +include a copy of this License with every copy of the +Source Code form of the Covered Software You distribute or +otherwise make available. You must inform recipients of any +such Covered Software in Executable form as to how they can +obtain such Covered Software in Source Code form in a +reasonable manner on or through a medium customarily used +for software exchange. + +3.2. Modifications. + +The Modifications that You create or to which You +contribute are governed by the terms of this License. You +represent that You believe Your Modifications are Your +original creation(s) and/or You have sufficient rights to +grant the rights conveyed by this License. + +3.3. Required Notices. + +You must include a notice in each of Your Modifications +that identifies You as the Contributor of the Modification. +You may not remove or alter any copyright, patent or +trademark notices contained within the Covered Software, or +any notices of licensing or any descriptive text giving +attribution to any Contributor or the Initial Developer. + +3.4. Application of Additional Terms. + +You may not offer or impose any terms on any Covered +Software in Source Code form that alters or restricts the +applicable version of this License or the recipients' +rights hereunder. You may choose to offer, and to charge a +fee for, warranty, support, indemnity or liability +obligations to one or more recipients of Covered Software. +However, you may do so only on Your own behalf, and not on +behalf of the Initial Developer or any Contributor. You +must make it absolutely clear that any such warranty, +support, indemnity or liability obligation is offered by +You alone, and You hereby agree to indemnify the Initial +Developer and every Contributor for any liability incurred +by the Initial Developer or such Contributor as a result of +warranty, support, indemnity or liability terms You offer. + +3.5. Distribution of Executable Versions. + +You may distribute the Executable form of the Covered +Software under the terms of this License or under the terms +of a license of Your choice, which may contain terms +different from this License, provided that You are in +compliance with the terms of this License and that the +license for the Executable form does not attempt to limit +or alter the recipient's rights in the Source Code form +from the rights set forth in this License. If You +distribute the Covered Software in Executable form under a +different license, You must make it absolutely clear that +any terms which differ from this License are offered by You +alone, not by the Initial Developer or Contributor. You +hereby agree to indemnify the Initial Developer and every +Contributor for any liability incurred by the Initial +Developer or such Contributor as a result of any such terms +You offer. + +3.6. Larger Works. + +You may create a Larger Work by combining Covered Software +with other code not governed by the terms of this License +and distribute the Larger Work as a single product. In such +a case, You must make sure the requirements of this License +are fulfilled for the Covered Software. + +4. Versions of the License. + +4.1. New Versions. + +Sun Microsystems, Inc. is the initial license steward and +may publish revised and/or new versions of this License +from time to time. Each version will be given a +distinguishing version number. Except as provided in +Section 4.3, no one other than the license steward has the +right to modify this License. + +4.2. Effect of New Versions. + +You may always continue to use, distribute or otherwise +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. If the Initial Developer includes a +notice in the Original Software prohibiting it from being +distributed or otherwise made available under any +subsequent version of the License, You must distribute and +make the Covered Software available under the terms of the +version of the License under which You originally received +the Covered Software. Otherwise, You may also choose to +use, distribute or otherwise make the Covered Software +available under the terms of any subsequent version of the +License published by the license steward. + +4.3. Modified Versions. + +When You are an Initial Developer and You want to create a +new license for Your Original Software, You may create and +use a modified version of this License if You: (a) rename +the license and remove any references to the name of the +license steward (except to note that the license differs +from this License); and (b) otherwise make it clear that +the license contains terms which differ from this License. + +5. DISCLAIMER OF WARRANTY. + +COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" +BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, +INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED +SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR +PURPOSE OR NON-INFRINGING. THE ENTIRE RISK AS TO THE QUALITY AND +PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY +COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE +INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF +ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF +WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF +ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS +DISCLAIMER. + +6. TERMINATION. + +6.1. This License and the rights granted hereunder will +terminate automatically if You fail to comply with terms +herein and fail to cure such breach within 30 days of +becoming aware of the breach. Provisions which, by their +nature, must remain in effect beyond the termination of +this License shall survive. + +6.2. If You assert a patent infringement claim (excluding +declaratory judgment actions) against Initial Developer or +a Contributor (the Initial Developer or Contributor against +whom You assert such claim is referred to as "Participant") +alleging that the Participant Software (meaning the +Contributor Version where the Participant is a Contributor +or the Original Software where the Participant is the +Initial Developer) directly or indirectly infringes any +patent, then any and all rights granted directly or +indirectly to You by such Participant, the Initial +Developer (if the Initial Developer is not the Participant) +and all Contributors under Sections 2.1 and/or 2.2 of this +License shall, upon 60 days notice from Participant +terminate prospectively and automatically at the expiration +of such 60 day notice period, unless if within such 60 day +period You withdraw Your claim with respect to the +Participant Software against such Participant either +unilaterally or pursuant to a written agreement with +Participant. + +6.3. If You assert a patent infringement claim against +Participant alleging that the Participant Software directly +or indirectly infringes any patent where such claim is +resolved (such as by license or settlement) prior to the +initiation of patent infringement litigation, then the +reasonable value of the licenses granted by such Participant +under Sections 2.1 or 2.2 shall be taken into account in +determining the amount or value of any payment or license. + +6.4. In the event of termination under Sections 6.1 or 6.2 +above, all end user licenses that have been validly granted +by You or any distributor hereunder prior to termination +(excluding licenses granted to You by any distributor) +shall survive termination. + +7. LIMITATION OF LIABILITY. + +UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT +(INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE +INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF +COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE +LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR +CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT +LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK +STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER +COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN +INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF +LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL +INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT +APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO +NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR +CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT +APPLY TO YOU. + +8. U.S. GOVERNMENT END USERS. + +The Covered Software is a "commercial item," as that term is +defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial +computer software" (as that term is defined at 48 C.F.R. +§ 252.227-7014(a)(1)) and "commercial computer software +documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. +1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 +through 227.7202-4 (June 1995), all U.S. Government End Users +acquire Covered Software with only those rights set forth herein. +This U.S. Government Rights clause is in lieu of, and supersedes, +any other FAR, DFAR, or other clause or provision that addresses +Government rights in computer software under this License. + +9. MISCELLANEOUS. + +This License represents the complete agreement concerning subject +matter hereof. If any provision of this License is held to be +unenforceable, such provision shall be reformed only to the +extent necessary to make it enforceable. This License shall be +governed by the law of the jurisdiction specified in a notice +contained within the Original Software (except to the extent +applicable law, if any, provides otherwise), excluding such +jurisdiction's conflict-of-law provisions. Any litigation +relating to this License shall be subject to the jurisdiction of +the courts located in the jurisdiction and venue specified in a +notice contained within the Original Software, with the losing +party responsible for costs, including, without limitation, court +costs and reasonable attorneys' fees and expenses. The +application of the United Nations Convention on Contracts for the +International Sale of Goods is expressly excluded. Any law or +regulation which provides that the language of a contract shall +be construed against the drafter shall not apply to this License. +You agree that You alone are responsible for compliance with the +United States export administration regulations (and the export +control laws and regulation of any other countries) when You use, +distribute or otherwise make available any Covered Software. + +10. RESPONSIBILITY FOR CLAIMS. + +As between Initial Developer and the Contributors, each party is +responsible for claims and damages arising, directly or +indirectly, out of its utilization of rights under this License +and You agree to work with Initial Developer and Contributors to +distribute such responsibility on an equitable basis. Nothing +herein is intended or shall be deemed to constitute any admission +of liability. + +NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND +DISTRIBUTION LICENSE (CDDL) + +The code released under the CDDL shall be governed by the laws +of the State of California (excluding conflict-of-law

provisions). +Any litigation relating to this License shall be subject to the +jurisdiction of the Federal Courts of the Northern District of +California and the state courts of the State of California, with +venue lying in Santa Clara County, California. + + +The GNU General Public License (GPL) +Version 2, June 1991 + + Copyright (C) 1989, 1991 Free Software Foundation, Inc. + 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA + Everyone is permitted to copy and distribute verbatim + copies of this license document, but changing it is not + allowed. + + Preamble + +The licenses for most software are designed to take away +your freedom to share and change it. By contrast, the GNU +General Public License is intended to guarantee your freedom +to share and change free software--to make sure the software +is free for all its users. This General Public License +applies to most of the Free Software Foundation's software +and to any other program whose authors commit to using it. +(Some other Free Software Foundation software is covered by +the GNU Library General Public License instead.) You can +apply it to your programs, too. + +When we speak of free software, we are referring to freedom, +not price. Our General Public Licenses are designed to make +sure that you have the freedom to distribute copies of free +software (and charge for this service if you wish), that you +receive source code or can get it if you want it, that you +can change the software or use pieces of it in new free +programs; and that you know you can do these things. + +To protect your rights, we need to make restrictions that +forbid anyone to deny you these rights or to ask you to +surrender the rights. These restrictions translate to +certain responsibilities for you if you distribute copies of +the software, or if you modify it. + +For example, if you distribute copies of such a program, +whether gratis or for a fee, you must give the recipients +all the rights that you have. You must make sure that they, +too, receive or can get the source code. And you must show +them these terms so they know their rights. + +We protect your rights with two steps: (1) copyright the +software, and (2) offer you this license which gives you +legal permission to copy, distribute and/or modify the +software. + +Also, for each author's protection and ours, we want to make +certain that everyone understands that there is no warranty +for this free software. If the software is modified by +someone else and passed on, we want its recipients to know +that what they have is not the original, so that any +problems introduced by others will not reflect on the +original authors' reputations. + +Finally, any free program is threatened constantly by +software patents. We wish to avoid the danger that +redistributors of a free program will individually obtain +patent licenses, in effect making the program proprietary. +To prevent this, we have made it clear that any patent must +be licensed for everyone's free use or not licensed at all. + +The precise terms and conditions for copying, distribution +and modification follow. + +TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND +MODIFICATION + +0. This License applies to any program or other work which +contains a notice placed by the copyright holder saying it +may be distributed under the terms of this General Public +License. The "Program", below, refers to any such program or +work, and a "work based on the Program" means either the +Program or any derivative work under copyright law: that is +to say, a work containing the Program or a portion of it, +either verbatim or with modifications and/or translated into +another language. (Hereinafter, translation is included +without limitation in the term "modification".) Each +licensee is addressed as "you". + +Activities other than copying, distribution and modification +are not covered by this License; they are outside its scope. +The act of running the Program is not restricted, and the +output from the Program is covered only if its contents +constitute a work based on the Program (independent of +having been made by running the Program). Whether that is +true depends on what the Program does. + +1. You may copy and distribute verbatim copies of the +Program's source code as you receive it, in any medium, +provided that you conspicuously and appropriately publish on +each copy an appropriate copyright notice and disclaimer of +warranty; keep intact all the notices that refer to this +License and to the absence of any warranty; and give any +other recipients of the Program a copy of this License along +with the Program. + +You may charge a fee for the physical act of transferring a +copy, and you may at your option offer warranty protection +in exchange for a fee. + +2. You may modify your copy or copies of the Program or any +portion of it, thus forming a work based on the Program, and +copy and distribute such modifications or work under the +terms of Section 1 above, provided that you also meet all of +these conditions: + + a) You must cause the modified files to carry prominent + notices stating that you changed the files and the date + of any change. + + b) You must cause any work that you distribute or + publish, that in whole or in part contains or is derived + from the Program or any part thereof, to be licensed as + a whole at no charge to all third parties under the + terms of this License. + + c) If the modified program normally reads commands + interactively when run, you must cause it, when started + running for such interactive use in the most ordinary + way, to print or display an announcement including an + appropriate copyright notice and a notice that there is + no warranty (or else, saying that you provide a + warranty) and that users may redistribute the program + under these conditions, and telling the user how to view + a copy of this License. (Exception: if the + Program itself is interactive but does not normally print such + an announcement, your work based on the Program is not + required to print an announcement.) + +These requirements apply to the modified work as a whole. If +identifiable sections of that work are not derived from the +Program, and can be reasonably considered independent and +separate works in themselves, then this License, and its +terms, do not apply to those sections when you distribute +them as separate works. But when you distribute the same +sections as part of a whole which is a work based on the +Program, the distribution of the whole must be on the terms +of this License, whose permissions for other licensees +extend to the entire whole, and thus to each and every part +regardless of who wrote it. + +Thus, it is not the intent of this section to claim rights +or contest your rights to work written entirely by you; +rather, the intent is to exercise the right to control the +distribution of derivative or collective works based on the +Program. + +In addition, mere aggregation of another work not based on +the Program with the Program (or with a work based on the +Program) on a volume of a storage or distribution medium +does not bring the other work under the scope of this +License.

3. You may copy and distribute the Program (or a work based +on it, under Section 2) in object code or executable form +under the terms of Sections 1 and 2 above provided that you +also do one of the following: + + a) Accompany it with the complete corresponding + machine-readable source code, which must be distributed + under the terms of Sections 1 and 2 above on a medium + customarily used for software interchange; or, + + b) Accompany it with a written offer, valid for at least + three years, to give any third party, for a charge no + more than your cost of physically performing source + distribution, a complete machine-readable copy of the + corresponding source code, to be distributed under the + terms of Sections 1 and 2 above on a medium customarily + used for software interchange; or, + + c) Accompany it with the information you received as to + the offer to distribute corresponding source code. (This + alternative is allowed only for noncommercial + distribution and only if you received the program in + object code or executable form with such an offer, in + accord with Subsection b above.) + +The source code for a work means the preferred form of the +work for making modifications to it. For an executable work, +complete source code means all the source code for all +modules it contains, plus any associated interface +definition files, plus the scripts used to control +compilation and installation of the executable. However, as +a special exception, the source code distributed need not +include anything that is normally distributed (in either +source or binary form) with the major components +(compiler, +kernel, and so on) of the operating system on which the +executable runs, unless that component itself accompanies +the executable. + +If distribution of executable or object code is made by +offering access to copy from a designated place, then +offering equivalent access to copy the source code from the +same place counts as distribution of the source code, even +though third parties are not compelled to copy the source +along with the object code. + +4. You may not copy, modify, sublicense, or distribute the +Program except as expressly provided under this License. Any +attempt otherwise to copy, modify, sublicense or distribute +the Program is void, and will automatically terminate your +rights under this License. However, parties who have +received copies, or rights, from you under this License will +not have their licenses terminated so long as such parties +remain in full compliance. + +5. You are not required to accept this License, since you +have not signed it. However, nothing else grants you +permission to modify or distribute the Program or its +derivative works. These actions are prohibited by law if you +do not accept this License. Therefore, by modifying or +distributing the Program (or any work based on the Program), +you indicate your acceptance of this License to do so, and +all its terms and conditions for copying, distributing or +modifying the Program or works based on it. + +6. Each time you redistribute the Program (or any work based +on the Program), the recipient automatically receives a +license from the original licensor to copy, distribute or +modify the Program subject to these terms and conditions. +You may not impose any further restrictions on the +recipients' exercise of the rights granted herein. You are +not responsible for enforcing compliance by third parties to +this License. + +7. If, as a consequence of a court judgment or allegation of +patent infringement or for any other reason (not limited to +patent issues), conditions are imposed on you (whether by +court order, agreement or otherwise) that contradict the +conditions of this License, they do not excuse you from the +conditions of this License. If you cannot distribute so as +to satisfy simultaneously your obligations under this +License and any other pertinent obligations, then as a +consequence you may not distribute the Program at all. For +example, if a patent license would not permit royalty-free +redistribution of the Program by all those who receive +copies directly or indirectly through you, then the only way +you could satisfy both it and this License would be to +refrain entirely from distribution of the Program. + +If any portion of this section is held invalid or +unenforceable under any particular circumstance, the balance +of the section is intended to apply and the section as a +whole is intended to apply in other circumstances. + +It is not the purpose of this section to induce you to +infringe any patents or other property right claims or to +contest validity of any such claims; this section has the +sole purpose of protecting the integrity of the free +software distribution system, which is implemented by public +license practices. Many people have made generous +contributions to the wide range of software distributed +through that system in reliance on consistent application of +that system; it is up to the author/donor to decide if he or +she is willing to distribute software through any other +system and a licensee cannot impose that choice. + +This section is intended to make thoroughly clear what is +believed to be a consequence of the rest of this License. + +8. If the distribution and/or use of the Program is +restricted in certain countries either by patents or by +copyrighted interfaces, the original copyright holder who +places the Program under this License may add an explicit +geographical distribution limitation excluding those +countries, so that distribution is permitted only in or +among countries not thus excluded. In such case, this +License incorporates the limitation as if written in the +body of this License. + +9. The Free Software Foundation may publish revised and/or +new versions of the General Public License from time to +time. Such new versions will be similar in spirit to the +present version, but may differ in detail to address new +problems or concerns. + +Each version is given a distinguishing version number. If +the Program specifies a version number of this License which +applies to it and "any later version", you have the option +of following the terms and conditions either of that version +or of any later version published by the Free Software +Foundation. If the Program does not specify a version number +of this License, you may choose any version ever published +by the Free Software Foundation. + +10. If you wish to incorporate parts of the Program into +other free programs whose distribution conditions are +different, write to the author to ask for permission. For +software which is copyrighted by the Free Software +Foundation, write to the Free Software Foundation; we +sometimes make exceptions for this. Our decision will be +guided by the two goals of preserving the free status of all +derivatives of our free software and of promoting the

ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM -CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT. - -1. DEFINITIONS - -"Contribution" means: - - a) in the case of the initial Contributor, the initial code and -documentation distributed under this Agreement, and -b) in the case of each subsequent Contributor: - -i) changes to the Program, and - -ii) additions to the Program; - -where such changes and/or additions to the Program originate from and are -distributed by that particular Contributor. A Contribution 'originates' from a -Contributor if it was added to the Program by such Contributor itself or anyone -acting on such Contributor's behalf. Contributions do not include additions to -the Program which: (i) are separate modules of software distributed in -conjunction with the Program under their own license agreement, and (ii) are not -derivative works of the Program. - -"Contributor" means any person or entity that distributes the Program. - -"Licensed Patents " mean patent claims licensable by a Contributor which are -necessarily infringed by the use or sale of its Contribution alone or when -combined with the Program. - -"Program" means the Contributions distributed in accordance with this Agreement. - -"Recipient" means anyone who receives the Program under this Agreement, -including all Contributors. - -2. GRANT OF RIGHTS - -a) Subject to the terms of this Agreement, each Contributor hereby grants -Recipient a non-exclusive, worldwide, royalty-free copyright license to -reproduce, prepare derivative works of, publicly display, publicly perform, -distribute and sublicense the Contribution of such Contributor, if any, and such -derivative works, in source code and object code form. -b) Subject to the terms of this Agreement, each Contributor hereby grants -Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed -Patents to make, use, sell, offer to sell, import and otherwise transfer the -Contribution of such Contributor, if any, in source code and object code form. -This patent license shall apply to the combination of the Contribution and the -Program if, at the time the Contribution is added by the Contributor, such -addition of the Contribution causes such combination to be covered by the -Licensed Patents. The patent license shall not apply to any other combinations -which include the Contribution. No hardware per se is licensed hereunder. - -c) Recipient understands that although each Contributor grants the licenses to -its Contributions set forth herein, no assurances are provided by any -Contributor that the Program does not infringe the patent or other intellectual -property rights of any other entity. Each Contributor disclaims any liability to -Recipient for claims brought by any other entity based on infringement of -intellectual property rights or otherwise. As a condition to exercising the -rights and licenses granted hereunder, each Recipient hereby assumes sole -responsibility to secure any other intellectual property rights needed, if any. -For example, if a third party patent license is required to allow Recipient to -distribute the Program, it is Recipient's responsibility to acquire that license -before distributing the Program. - -d) Each Contributor represents that to its knowledge it has sufficient copyright -rights in its Contribution, if any, to grant the copyright license set forth in -this Agreement. - -3. REQUIREMENTS - -A Contributor may choose to distribute the Program in object code form under its -own license agreement, provided that: - -a) it complies with the terms and conditions of this Agreement; and - -b) its license agreement: - -i) effectively disclaims on behalf of all Contributors all warranties and -conditions, express and implied, including warranties or conditions of title and -non-infringement, and implied warranties or conditions of merchantability and -fitness for a particular purpose; - -ii) effectively excludes on behalf of all Contributors all liability for -damages, including direct, indirect, special, incidental and
